### ICD-10 Impacted Forms & Publications: *“It’s Not All About Training & Systems”*

*“If you are aware of additional forms or publications, notify your IPT representative.”*

**Background:** The ICD-10 IPT Forms and Publications (F&P) Sub-workgroup (SWG) is tasked with ensuring all DoD-level forms or publications that currently reference ICD-9 codes are updated for ICD-10 and ready for use before the 1 October 2014 national compliance date. Membership includes representation from each Service, the Office of the Chief Medical Officer, the Uniform Business Office, Personnel and Readiness Offices, and other MHS stakeholders. The F&P SWG also coordinated a DoD Health Affairs policy to establish the Military Health System’s (MHS) intent to transition to ICD-10.

**Assessing Document Readiness for ICD-10:** Initially, 26 documents were identified that contain either general or specific references to ICD-9 codes. These documents include DoD Instructions (DoDIs), Directive Type Memorandums (DTMs), DoD Directives, (DoDDs), DoD Regulations and DoD Forms (DD Forms). Primarily, each document was identified using the Defense Technical Information Center (DTIC) website. The Office of Primary Responsibility (OPR) for each document was identified. OPRs are working within their organizations and with the F&P SWG to make revisions. Of the 26 documents identified, 15 remain to be updated.

**Call to Action:** In order to allow time to complete the review, approval, and publication process, the F&P SWG recommends, where possible, draft updates be completed by April 2014 and ready for use by 1 October 2014.

The Services, in other forums, are involved in the coordination of updates to DoD-level instructions and directives that may impact their Service forms or publications.

Therefore, they can work in parallel to revise their impacted Service-specific documents to reference updated DoD-level documents. It is important to note that the F&P SWG will not revise Service-level forms or publications. Services and their staff at Military Treatment Facilities are responsible for updating their Service-specific documents.

While the F&P SWG completed active document discovery in May of 2011, the SWG will continue to add documents to the list as needed. If you are aware of any additional forms or publications that may be impacted by the transition to ICD-10, please contact your IPT representative (see page 2).

**Each MTF is responsible for updating local forms and publications.**

Continued collaboration between TMA and the Services, will be key in the successful implementation and use of ICD-10. The MHS ICD-10 IPT is working diligently to ensure that the MHS enterprise is ready for the 1 October 2014 national ICD-10 compliance date.
