

# Program Executive Office Defense Healthcare Management Systems

The mission of the Program Executive Office Defense Healthcare Management Systems (PEO DHMS) is to efficiently improve healthcare for the active duty military, Veterans, and beneficiaries by establishing seamless medical data sharing between the Department of Defense (DoD), the Department of Veterans Affairs (VA), and the private sector; and modernizing the electronic health record (EHR) for the military health system.

## PROGRAM OVERVIEW

PEO DHMS, an acquisition organization, oversees four program management offices. These four offices acquire, deliver, and support information technology and services that enable nationwide interoperability and modernization of the military's EHR. In July 2015, the DoD purchased a new EHR planned for deployment by end of calendar year 2016. Officially named MHS GENESIS, this modernized EHR integrates inpatient and outpatient records, replacing select DoD legacy healthcare systems.

Modernization and interoperability require collective support from and collaboration with a number of stakeholders. Strategically aligning different organizational visions and goals creates guiding principles for success and provides a path forward for achieving interoperability.

### MODERNIZATION

- Ensures and enables sustainability, flexibility and interoperability to improve the continuity of care
- Enables system improvements through upgrades of hardware, software, and interfaces
- Promotes efficiencies in safe, high quality healthcare delivery

### INTEROPERABILITY

- Engages the private sector
- Continues to partner with the VA
- Collaborates with the Office of the National Coordinator Health Information Technology (ONC)
