Stryker AIRO Mobile CT Scanner AI (AIRO) is a mobile computed tomography (CT) system. Its design accommodates intra-operative use, providing an innovative imaging tool for use by surgeons in operating rooms and is used for cranial, spinal and neurosurgery procedures. The AIRO CT scanner system is a mobile imaging platform used during surgery to obtain a high-resolution CT scan of a patient. The surgical column and patient support are controlled using an integrated keypad or a wireless remote control. AIRO includes a hand-held control unit for imaging, transport, service, calibration, and remote control used for the integrated table column and associated tabletops. PHI is collected on active duty military and retiree population. AIRO Mobile is owned and operated by DHA CyberLOG.

This system collects and stores personal X-Ray images, and names to be viewed by radiology and surgical staff.

d. Why is the PII collected and/or what is the intended use of the PII? *(e.g., verification, identification, authentication, data matching, mission-related use, administrative use)*

The intended use and reason the PII is collected is for data matching of the individual with his/her medical diagnostic reports and to ensure accuracy when these reports are integrated in the individuals medical records. The intended use of the PII is provide continuity of patient care.

e. Do individuals have the opportunity to object to the collection of their PII? Yes [x] No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Stryker AIRO Mobile CT Scanner_AI receives PII from system-to-system interface; therefore, the opportunity to object is only available at the source system.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes [x] No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

Stryker AIRO Mobile CT Scanner_AI receives PII from system-to-system interface; therefore, the opportunity to consent is only available at the source system.
