**c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.**

DelWorks DR ArtPix EZ2GO is a flexible high-resolution Digital Radiography (DR) system designed to provide fast and smooth radiography examinations of patient imaging. Images may be transferred via a network using DICOM protocol for printing and storage in PACS. ArtPix application software used with both wired and wireless flat panel detectors. The ArtPix software is used for acquiring medical diagnostic x-ray images. The PC communicates over TCP/IP. The PC contains one on-board NIC card, connected to the Department of Defense (DoD) network which is used to send patient studies to the PACS archive and the Modality Worklist if necessary. The system may transfer patient files with images to PACS via DICOM for permanent storage.

The system collects patient name and a generic patient identification at a minimum. The image is associated with a particular patient via patient name and a case number. Optional data can be entered as determined by each site for medical purposes: Gender, Date of Birth, Race/Ethnicity, gender, and disability information.

The Personally Identifiable Information (PII) collected includes personal information and demographic information including Protected Health Information (PHI). The categories of people in which PII is collected includes: All Active Duty Service Members, Retirees, Veterans, and their families. In addition, PII is collected from both members of the general public and Federal employees and/or contractors.

Cyberlog is responsible for the risk management framework (RMF) process, and gaining an approval from DHA J6 Risk Management Executive Division (RMED). Local sites are responsible for day to day operations, maintenance, and management of the device. Sites are responsible for ensuring the device is configured to meet CyberLOG and RMED approved configurations. DoD personnel working within the Medical Treatment Facility (MTF) may have general user capabilities to use the device in a clinical environment. They may also have administrative access as deemed by the vendor.

This device is owned and operated by DHA's CyberLOG.

**d. Why is the PII collected and/or what is the intended use of the PII?** (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII is collected to verify an individual with their medical diagnostic reports and ensure accuracy when these reports are integrated in the medical records for that individual.

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

The opportunity to object is only available at the source system where the PII was initially collected.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes  No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

The opportunity to consent is only available at the source system where the PII was initially collected.

DelWorks collects PII directly from other DoD information systems, and the system owners should monitor the SORN compliance posture of those source systems. The system may also transfer patient files with images to PACS via DICOM for permanent storage.

k. Does this DoD Information system or electronic collection require a Privacy Act System of Records Notice (SORN)?

A Privacy Act SORN is required if the information system or electronic collection contains information about U.S. citizens or lawful permanent U.S. residents that is retrieved by name or other unique identifier. PIA and Privacy Act SORN information must be consistent.

Yes  No

If "Yes," enter SORN System Identifier

SORN Identifier, not the Federal Register (FR) Citation. Consult the DoD Component Privacy Office for additional information or <http://dpcl.dod.mil/Privacy/SORNs/>

or

If a SORN has not yet been published in the Federal Register, enter date of submission for approval to Defense Privacy, Civil Liberties, and Transparency Division (DPCLTD). Consult the DoD Component Privacy Office for this date

For PII not collected or maintained in a system of records, the collection or maintenance of the PII must be necessary to discharge the requirements of a statute or Executive Order.**

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be similar.

(2) If a SORN does not apply, cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply).
