

# DEPARTMENT OF DEFENSE (AFHSC) Seasonal Influenza Surveillance Summary

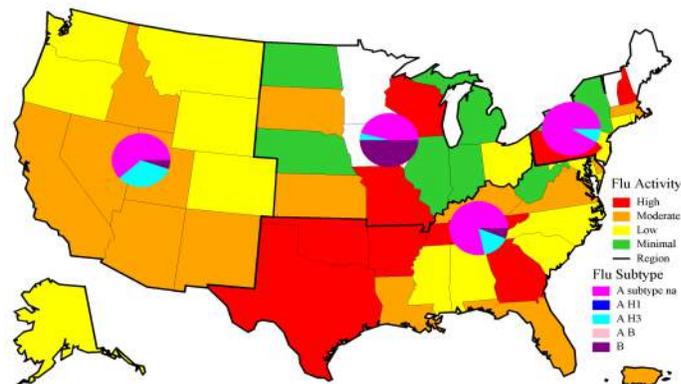

Northern Command -- Week 06 (08 Feb—14 Feb 2015)

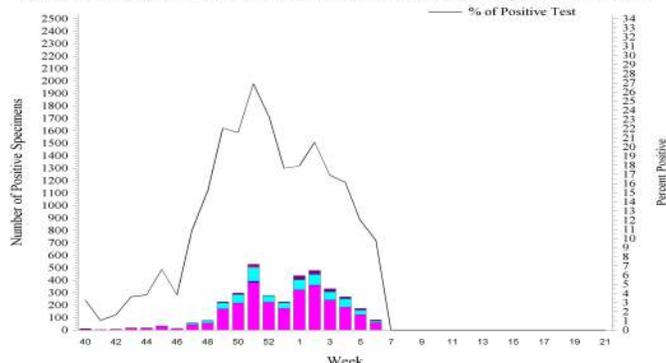

## NORTHCOM week 06<sup>1,2</sup>

- ◆ Flu activity was highly variable throughout NORTHCOM during this reporting period.
- ◆ A/H3N2 remains the predominant circulating virus.
- ◆ ILI and P&I activity in service members remained stable and above baseline.
- ◆ The cumulative percentages of positive lab tests remained stable from week 4 to week 5. The rates were 16.6% for service members and 17.0% for dependents.
- ◆ As of 19 February, immunization coverage among DoD service members reached 95%.
- ◆ There were 3 hospitalized cases associated with influenza among dependents.

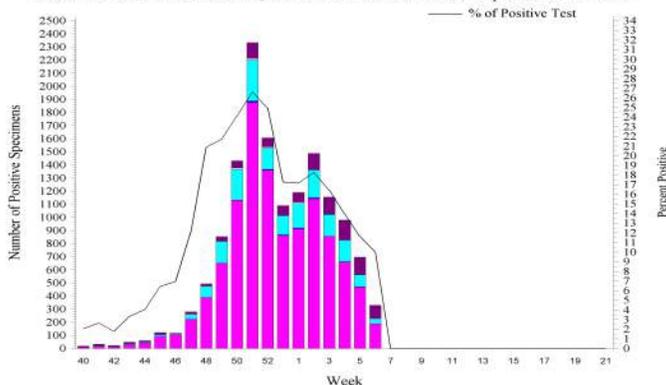

NORTHCOM Service Members, Influenza Activity and Virus Subtype, During the Last 2 Weeks

NORTHCOM Service Members, Influenza Positive Tests Reported to AFHSC

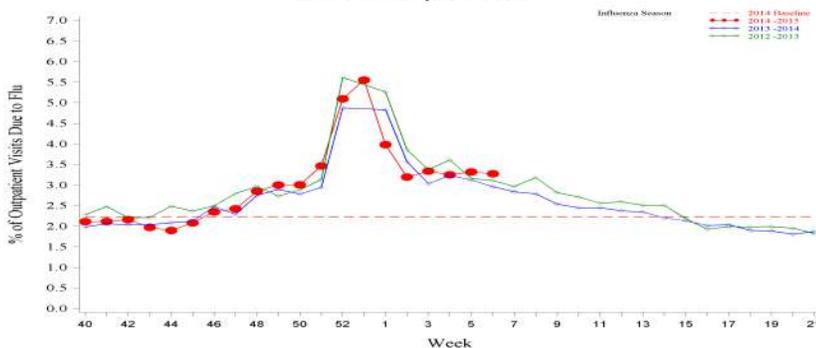

NORTHCOM Beneficiaries, Influenza Positive Tests Reported to AFHSC

## 2014 – 2015 NORTHCOM Season Totals<sup>1,2</sup>

	A/H1N1	A/H3N2	A/Untyped	Flu B	% Positive
Service Members	11	700	2633	204	16.6
Dependents	53	2013	11033	1172	17.0

NORTHCOM Service Members, 2014-2015 and Previous 2 Influenza Seasons ILI and P&I Outpatient Visits

## Immunization Coverage for all Commands (As of 18 February 2015)

All components	All Services	Army	Marines	Navy	Coast Guard	Air Force
Seasonal Influenza Vaccine	95%	93%	94%	94%	96%	98%

Sources: Immunization Healthcare Branch (DHA), ARMY-MEDPROS, MARINES-MRRS, NAVY-MRRS, COAST GUARD-MRRS, AIR FORCE-AFCITA

- ◆ NHRC laboratory-confirmed influenza cases, US Military Basic Trainees:

### European Command -- Week 06

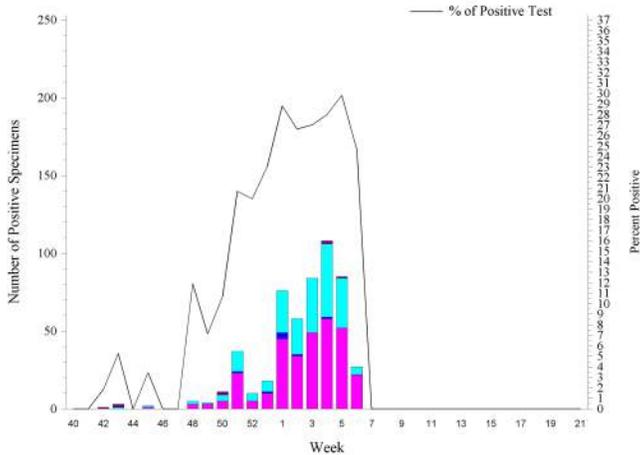

EUCOM week 06<sup>1,4,5</sup>

- ◆ High influenza activity was seen in Italy and Germany.
- ◆ The predominant circulating virus was A/H3N2.
- ◆ ILI and P&I activity increased slightly and was above baseline and previous seasons.
- ◆ The cumulative percentage of positive lab tests for service members and dependents was 20.8% and 19.8%, respectively.
- ◆ There was 1 hospitalized case associated with influenza in a service member and 1 in a dependent.

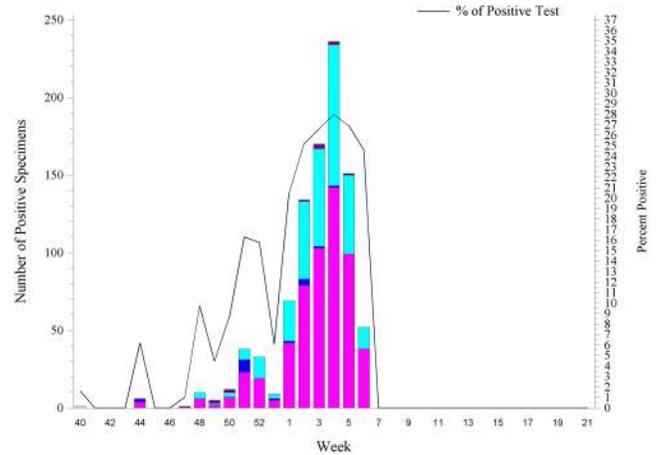

EUCOM Service Members, Influenza Activity and Virus Subtype, During the Last 2 Weeks

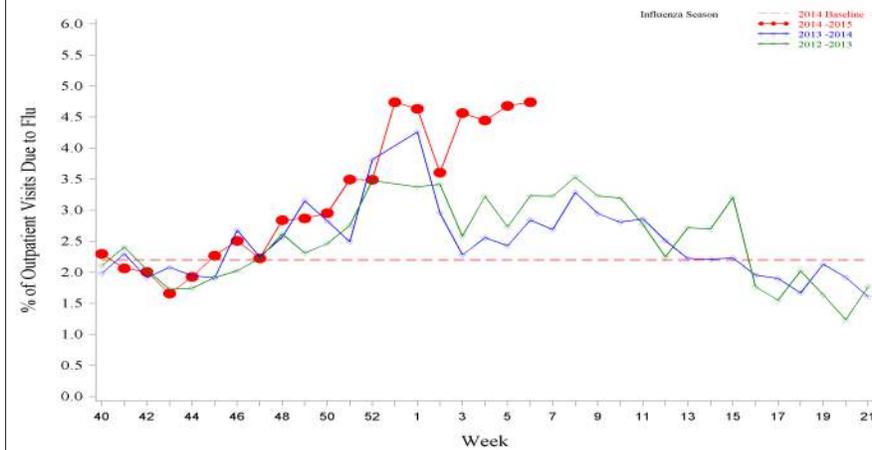

EUCOM Service Members, Influenza Positive Tests Reported to AFHSC

EUCOM Beneficiaries, Influenza Positive Tests Reported to AFHSC

EUCOM Service Members, 2014-2015 and Previous 2 Influenza Seasons ILI and P&I Outpatient Visits

2014-2015 EUCOM Season Totals <sup>1,4,5</sup>						
	A/H1N1	A/H3N2	A/Untyped	Influenza B	AB	% Positive
Service Members	8	203	310	8	0	20.8
Dependents	18	327	569	12	1	19.8

### Pacific Command -- Week 06

PACOM week 06<sup>1,6,7</sup>

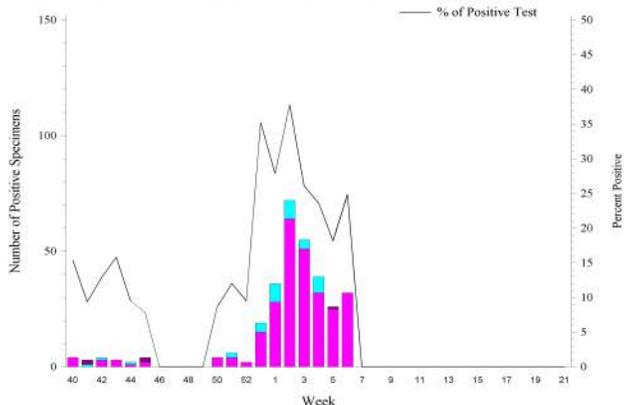

- ◆ Influenza activity remained high in Hawaii and was moderate in South Korea.
- ◆ ILI and P&I increased and was above baseline.
- ◆ The cumulative percent of positive lab tests for service members and dependents was 20.3% and 26.0%, respectively.

PACOM Service Members, Influenza Activity and Virus Subtype, During the Last 2 Weeks South Korea and Japan

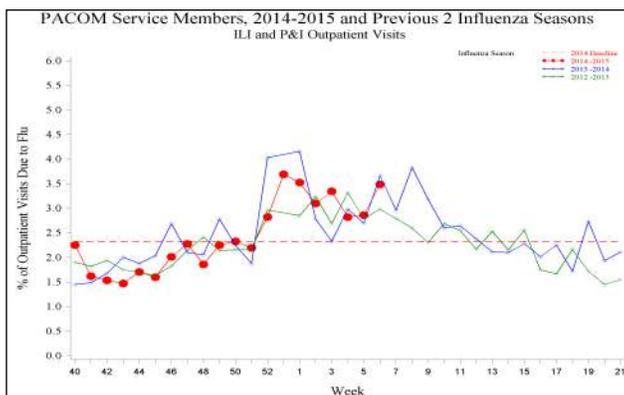

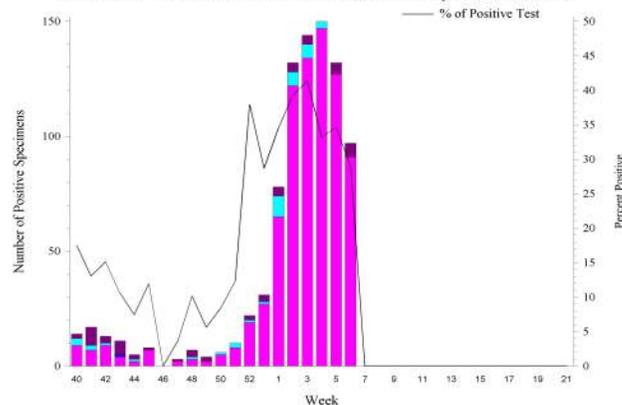

PACOM: GUAM and HI Influenza activity and HL7 Test Positive						
Area Name	Influenza Activity	HL7 Type				
		A(H1)	A(H3)	A Untyped	B	AB
GUAM	1: Minimal	0	0	2	0	0
HI	4: High	0	0	165	8	0

PACOM Service Members, Influenza Positive Tests Reported to AFHSC

PACOM Beneficiaries, Influenza Positive Tests Reported to AFHSC

2014-2015 PACOM Season Totals <sup>1,6,7</sup>					
	A/H1N1	A/H3N2	A/Untyped	Flu B	% Positive
Service Members	0	36	270	5	21.9
Dependents	1	47	790	58	27.6

### Central and Africa Commands -- Week 06

#### CENTCOM and AFRICOM week 06<sup>1,8,9</sup>

- ◆ Flu activity was minimal to low throughout CENTCOM and AFRICOM.
- ◆ ILI and P&I activity decreased but was above baseline.

CENTCOM, Influenza Activity, During the Last 2 Weeks

### Southern Command -- Week 06 (Local Nationals Only)

#### In SOUTHCOM during week 06<sup>10</sup>

- ◆ Influenza activity was low.

2014-2015 SOUTHCOM Season Totals Among Local Nationals <sup>10</sup>				
	A/H1N1	A/H3N2	A/Untyped	Influenza B
Colombia	0	10	0	4
Peru	13	139	2	55

## **Description:**

Maps, figures and tables are stratified by Combatant Commands (CCMD). The map provides a measure of influenza activity by state or country within each CCMD for the past two weeks for service members. Influenza activity is defined by the percentage of outpatient visits associated with influenza (defined as having an Influenza-like Illness (ILI) or Pneumonia and Influenza (P&I) diagnosis) for each week compared to baseline levels of influenza activity. Additionally, a pie graph by US region or country is generated to display the distribution of influenza types and subtype identified from positive laboratory tests for the past two weeks combined.

## **Influenza activity: Percentage of Outpatient Visits Associated with Influenza:**

The percentage of all outpatient visits for influenza (defined as having an ILI or P&I diagnosis) is calculated each week for (1) all service members, regardless of component and (2) all other DoD beneficiaries. This data is presented as a map of the past two weeks' activity and a figure to display the entire season's data compared to the two prior seasons and baseline. For the map, the activity level compares the mean reported percent of visits due to influenza for the past two weeks to the mean reported percent of visits due to influenza during baseline weeks. Baseline weeks are defined as non-influenza weeks (weeks 22-39) over the past 3 years.

There are four activity levels reported on each map. The activity level corresponds to the number of standard deviations (SD) below, at or above the mean for the current week compared to the mean of the baseline weeks. Activity levels are classified as minimal, low, moderate, and high. Minimal activity corresponds to an influenza percentage that is less than 2 SD above the mean. Low activity corresponds to an influenza percentage that is equal to or greater than 2 SD above the mean, but less than 4 SD above the mean. Moderate activity corresponds to an influenza percentage that is equal to or greater than 4 SD above the mean, but less than 6 SD above the mean. High activity corresponds to an influenza percentage that is equal to or greater than 6 SD above the mean.

## **Influenza Positive Tests:**

Only lab results from PCR or viral culture assays are reported. Influenza types/subtypes are categorized as influenza A not subtyped (A subtype na), influenza A/H1 (A H1), influenza A/H3 (A H3), influenza A and B co-infection (A B), and influenza B (B).

Map: Each US region or country with available data contains a pie chart that displays the distribution of influenza types and subtypes for that area for the past two weeks combined. Two weeks of data are combined instead of using just the current week's data due to delays in reporting of laboratory results.

Figure and Table: Each week, using the total number of influenza laboratory tests performed and the positive test results, the proportions positive for each serotype of influenza are calculated for service members and dependents separately.

## **Data Sources and Case Definitions:**

Medical encounter and demographic data from the Armed Forces Health Surveillance Center's (AFHSC) Defense Medical Surveillance System (DMSS) are used to generate this report. In addition, health-level 7 (HL-7) laboratory data is provided by the Navy and Marine Corps Public Health Center (NMCPHC) EpiData Center Division. ICD-9 codes from outpatient encounters are used to identify influenza activity. The outcome of influenza is defined using the combined codes for ILI (79.99, 382.9, 460, 461.9, 465.8, 465.9, 466.0, 486, 487.0, 487.1, 487.8, 488, 490, 780.6, or 786.2) and P&I (480-488). An individual can only be counted as a case once per week.

## **NORTHCOM Regions:**

The regions on the NORTHCOM map (bold, black outlines) are defined using the four US Census regions, with the exception of Hawaii and Guam which are a part of PACOM. *Northeast:* Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, New Jersey, New York, Pennsylvania, Puerto Rico, and the U.S. Virgin Islands. *South:* Delaware, the District of Columbia, Maryland, Virginia, West Virginia, Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Arkansas, Louisiana, Texas., and Oklahoma. *Midwest:* Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin, Iowa, Kansas, Missouri, Nebraska, North Dakota, and South Dakota. *West:* New Mexico, Colorado, Montana, Utah, Wyoming, Arizona, California, Nevada, Alaska, Idaho, Oregon, and Washington.

**(All data are preliminary and subject to change as updated data is received)**
