DEPARTMENT OF DEFENSE (AFHSC)

West Africa Ebola Surveillance Summary #90

12 MAR 2015 (next report 19 MAR 2015)

CASE REPORT: Since the previous summary (6 MAR), there has been an increase of 120 confirmed and 357 suspected and/or probable Ebola virus disease (EVD) cases, (+171 total deaths), bringing the total to 24,525 cases (10,026 deaths). The new cases and deaths are reported from Guinea, Liberia, and Sierra Leone. Liberia has reported no confirmed EVD cases since 19 FEB and as of 5 MAR has no hospitalized cases. The total includes past cases and deaths from Senegal, Nigeria, the United States, Spain, Mali, and the United Kingdom; the [United Kingdom](#) was declared EVD-free on 10 MAR. The [UK reported on 12 MAR](#) that one of its soldiers, a health care worker, was diagnosed with EVD in Sierra Leone and was flown to London for treatment.

According to WHO's 11 MAR 2015 [situation report](#), in the week ending 8 MAR confirmed case incidence in Guinea rose from 51 in the prior week to 58 cases, while Sierra Leone reported a decrease from 81 to 58 cases. In Guinea, the relatively low proportion of new cases among known contacts, the relatively high proportion of EVD-positive deaths occurring in the community, and the ongoing practice of unsafe burials indicate continued difficulties engaging effectively with affected communities. New cases in Guinea were clustered in and around the capital, Conakry, and the nearby prefectures of Boffa, Coyah, Dabreka, Forecariah, and Kindia. In Sierra Leone, WHO said cases were reported from five northern and western districts around the capital, Freetown, and the neighboring districts of Bombali, Kambia, Port Loko, and Western Rural.

On 20 JAN 2015, WHO's fourth Emergency Committee meeting on the 2014 EVD outbreak [unanimously agreed](#) that the outbreak continues to constitute a Public Health Emergency of International Concern (PHEIC) and that all previous temporary recommendations remain in effect with some additional advice on exit screening and active surveillance in border areas.

DoD SURVEILLANCE GUIDELINES: On 31 OCT 2014, the Under Secretary of Defense for Personnel and Readiness USD(P&R) [issued a memorandum](#) providing guidance for training, screening, and monitoring for DoD personnel deployed to Ebola outbreak areas. The USD(P&R) also published electronic versions of the [Ebola risk evaluation form](#) (DD2990) and [redeployment risk assessment form](#) (DD2991). On 5 JAN 2015, the Armed Forces Health Surveillance Center published [updated guidelines](#) for the detection and reporting of DoD cases of EVD.

MEDICAL COUNTERMEASURES: There are no approved vaccines or specific treatments for EVD. On 9 DEC 2014, [HHS offered liability protections](#) to drug makers developing Ebola vaccines. Of [four drug candidates](#), ZMapp, TKM-Ebola, brincidofovir, and favipiravir, the latter two started [trials in West Africa](#) in JAN 2015. An official trial of ZMapp has [started in Liberia](#); NIAID is negotiating to extend the trial into Sierra Leone in order to enroll the 200 patients needed for the study. WHO, with Guinea, Sierra Leone, and Liberia, continues to develop capacity to collect and use convalescent sera from recovered Ebola patients to experimentally treat ill patients in West Africa. A comparison of the four Ebola vaccines being actively tested can be found on page 4 of this report, along with the current pharmaceutical treatments. WHO, with the Guinean Ministry of Health, Médecins Sans Frontières (MSF), Epicentre, and The Norwegian Institute of Public Health (NIPH), will launch a Phase III trial in Guinea on 7 March to test the VSV-EBOV vaccine for efficacy in preventing Ebola. WHO approved the [first rapid test for Ebola](#), developed by Corgenix; it is reportedly easy to perform, requires no electricity and gives a result within 15 minutes. Stada, a German pharmaceutical firm, [will launch a new test](#) for Ebola in MAR 2015; tests will be distributed to aid organizations in West Africa.

DEPARTMENT OF DEFENSE (AFHSC)

West Africa Ebola Surveillance Summary #90

12 MAR 2015

DoD RESPONSE: DoD Press Secretary Admiral Kirby said on 27 FEB 2015, “We’ve got about 1,180 Department of Defense personnel in the area of operations in Liberia, and we expect that they’ll start to [deploy home](#) probably in April.” On 11 FEB, President Obama said that approximately 100 DoD personnel would remain as the response transitions to support provided mostly by civilian employees of government agencies and volunteers. In Liberia, three USG supported laboratories will reportedly retain full operations (the Liberian Institute of Biomedical Research in Margibi, Cuttington University in Bong, and the ELWA facility in Montserrado). DoD has completed and transferred to USAID all ten planned ETUs.

On 8 JAN 2015, SECDEF signed a memo delegating authority to use DoD aircraft to transport Ebola symptomatic or exposed DoD personnel. On 17 DEC 2014, the CJCS issued an updated [CJCSI 4220.01A](#), implementing SECDEF’s 21-day controlled monitoring policy. The updated policy lays out who is affected and how the monitoring will be conducted, including naming seven monitoring sites: Ft. Bliss, TX; JB Langley-Eustis, VA; Ft. Hood, TX; Ft. Bragg, NC; and JB Lewis-McCord, WA in CONUS, plus USAG Baumholder, Germany and Caserma Del Din, Vicenza, Italy, OCONUS. On 7 NOV 2014, [DoD issued guidance](#) on medical care of DoD civilians deployed to Ebola outbreak areas.

FDA has issued [Emergency Use Authorizations \(EUA\)](#) for several in vitro diagnostics for detection of Ebola virus. Under the EUAs, the DoD EZ1 real time RT-PCR Ebola Zaire virus detection assay developed by USAMRIID is approved for human diagnostic testing at the following DoD labs: USAMRIID, Landstuhl RMC, NIDDL at NMRC, NHRC, NAMRU-3, NAMRU-6, William Beaumont AMC, Carl R. Darnall AMC, Madigan AMC, Tripler AMC, and SAAMC. In Liberia, the Navy’s mobile lab and the USAMRIID-supported Liberian Institute for Biological Research in Monrovia are qualified to perform Ebola diagnostic testing on U.S. personnel. Joint Base Langley-Eustis, Carl R. Darnall AMC, Wright-Patterson MC, WRNMMC, SAAMC, Madigan AMC, Womack AMC, Landstuhl RMC, Eisenhower AMC, and NIDDL have been approved as BioFire FilmArray NGDS BT-E Assay testing sites. The Corgenix ReEBOV Rapid Antigen Test was the most recent assay approved under the EUA on 24 FEB. The Roche [LightMix® Ebola Zaire rRT-PCR Test](#) was approved for the presumptive detection of Ebola Zaire virus in individuals with signs and symptoms of Ebola disease, on 23 DEC 2014.

USG AND GLOBAL RESPONSE: Current information and guidance is available at the [CDC](#) and [WHO](#) Ebola web sites. On 11 FEB, the White House press office released a [fact sheet](#) outlining the international and domestic efforts made in response to Ebola in the U.S. and West Africa. On 26 FEB, CDC published [additional MMWR articles](#); ‘Community quarantine to interrupt Ebola virus transmission’, ‘Systems for rapidly detecting and treating persons with Ebola virus disease’, and ‘Implementation of Ebola case-finding using a village chieftaincy taskforce in a remote outbreak’.

TRAVEL ADVISORY: The CDC is maintaining its [Warning - Level 3, Avoid Nonessential Travel](#) advisory for Guinea, Sierra Leone, and Liberia. [All flights carrying travelers from the affected West African nations](#) must enter the U.S. through one of the five designated airports that are conducting enhanced screening for EVD (JFK, Newark Liberty, Washington Dulles, Chicago O’Hare, and Atlanta Hartsfield-Jackson). U.S. military aircraft do not need to be re-routed to one of these airports, provided that Customs and Border Protections has been assured that the established DoD screening protocols will take place at the arrival location. On 28 OCT 2014, the CDC recommended that state public health departments [begin direct active post-arrival monitoring for 21 days](#) along with other movement restrictions based on a traveler’s exposure risk category using CDC definitions. On 20 JAN 2015, WHO reaffirmed the need to avoid unnecessary interference with international travel and trade.

Text updated from the previous report will be printed in red; items in (+xx) represent the change in number from the previous AFHSC summary (6 MAR 2015).

West Africa Ebola Surveillance Summary #90

12 MAR 2015

Latest Available Ebola Case Counts in or Related to West Africa, 2014-2015

Country (as of date)	EVD Cases All / Lab Confirmed	Deaths All / Lab Confirmed	EVD Cases in HCW / Deaths	Contacts Being Followed
Guinea (9 MAR)	3,306 (+58) / 2,886 (+46)	2,179 (+32) / 1,784 (+29)	173 (+1) / 90	1,855
Liberia (5 MAR)	9,507 (+258) / 3,150	4,177 (+60) / NA	372 / 180	102
Sierra Leone (10 MAR)	11,677 (+160) / 8,463 (+74)	3,655 (+79) / 3,289 (+79)	295 / 221	8,090
United Kingdom (22 JAN)	1 / 1 ***	0 / 0	1 / 0***	0
United States (4 DEC)	4 / 4* **	1 / 1	3 / 0	0
Mali (21 DEC)	8 / 7	6 / 5	2 / 2	0
Nigeria (17 SEP)	20 / 19	8 / 7	11 / 5	0
Senegal (20 SEP)	1 / 1*	0 / 0	0 / 0	0
Spain (2 DEC)	1 / 1	0 / 0	1 / 0	0
Total	24,525 (+476) / 14,532 (+120)	10,026 (+171) / 5,086 (+108)†	858 (+1) / 498	10,047

Case Fatality Proportion: As of 4 MAR 2015, the WHO said the case fatality rate in the three intense-transmission countries among cases for whom a definitive outcome is recorded is between 50% and 66%. For hospitalized patients, the case fatality rate is 66% in Guinea, 50% in Liberia, and 66% in Sierra Leone.

†Excluding Liberia / *Imported from Liberia / **1 imported from Guinea / ***Imported from Sierra Leone / NA = Not Available

Shaded countries have been declared Ebola transmission-free by WHO.

The total number of cases is subject to change due to reclassification, retrospective investigation, consolidation of cases and laboratory data, and enhanced surveillance.

Text updated from the previous report will be printed in red; items in (+xx) represent the change in number from the previous AFHSC summary (6 MAR 2015).

All information has been verified unless noted otherwise. Sources include WHO, CDC, and health agencies in Guinea, Liberia, Sierra Leone, Mali, and the UK.
