## Table of Variables

Name	Content/Topic
<b>SAMPLING VARIABLES</b>	
MPRID	Unique MPR identifier
MPCSMPL	Sampling rank
SVCSMPL	Sampling service
SEXSMPL	Sampling sex
AGESMPL	Sampling age
BGCSMPL	Sampling beneficiary group
REGSMPL	Sampling region
ENBGSMPL	Enrollment by beneficiary category
STRATUM	Sampling stratum
FNSTATUS	Final Status
KEYCOUNT	Number of key questions answered
POSTSTR	Post-Stratification Identifier
<b>DEERS VARIABLES</b>	
MRTLSTAT	Marital status
RACEETHN	Race/Ethnicity
DAGEQY	Age as of February 28, 2002
PCM	Primary care manager, civilian or military
LEGDDSCD	DEERS Dependent Code
PNLCATCD	Personnel Category Code (Duty Status)
MBRRELCD	Member Relationship Code
DBENCAT	Beneficiary Category
DMEDELG	Medical Privilege Code
DSPONSVC	Derived Sponsor Branch of Service
MEDTYPE	Medicare Type
PATCAT	Aggregate Beneficiary Category
ENLSMPL	Enrollment sampling group
ENRID	Enrollment DMISID
ULOCDMIS	Unit DMISID
DCATCH	Catchment area

Name	Content/Topic
<b>QUESTIONNAIRE RESPONSES</b>	
C02001	Are you an adult responsible for the child listed on the envelope?
C02002	Which health plan did you use for all or most of your child's health care in the last 12 months?
C02003	In the last 12 months, how many months in a row was your child enrolled in this health plan?
C02004A	Which of the following health care plans is your child currently covered by? TRICARE Prime
C02004B	Which of the following health care plans is your child currently covered by? TRICARE Extra/Standard (CHAMPUS)
C02004C	Which of the following health care plans is your child currently covered by? Federal Employees Health Benefit Program (FEHBP)
C02004D	Which of the following health care plans is your child currently covered by? Medicaid
C02004E	Which of the following health care plans is your child currently covered by? A civilian HMO (such as Kaiser)
C02004F	Which of the following health care plans is your child currently covered by? Other civilian insurance (such as Blue Cross)
C02004G	Which of the following health care plans is your child currently covered by? Uniform Services Family Health Plan (USFHP)
C02004H	Which of the following health care plans is your child currently covered by? Not sure
C02004I	Which of the following health care plans is your child currently covered by? My child did not use any health plan in the last 12 months
C02005	Do you have one person you think of as your child's personal doctor or nurse?
C02006	With the choices your child's health plan gave you, how much of a problem, if any, was it to get a personal doctor or nurse for your child you are happy with?
C02007	In the last 12 months, when your child went to his or her personal doctor or nurse's office or clinic, how often did the doctor or nurse talk with you about how your child is feeling, growing, or behaving?
C02008	How would you rate your child's personal doctor or nurse now?
C02009	Does your child have a TRICARE primary care manager?
C02010	Do you know the name of your child's TRICARE primary care manager?
C02011	In the last 12 months, how much of a problem was it for your child to see his or her TRICARE primary care manager?
C02012	Does your child's TRICARE primary care manager work in a military treatment facility or in a civilian treatment facility?
C02013	In the last 12 months, did you or a doctor think your child needed to see a specialist?
C02014	In the last 12 months, how much of a problem, if any, was it to get a referral to a specialist that your child needed to see?
C02015	In the last 12 months, did your child see a specialist?
C02016	How would you rate your child's specialist?
C02017	In the last 12 months, was the specialist your child saw most often the same doctor as your child's personal doctor?

Name	Content/Topic
C02018	In the last 12 months, did you call a doctor's office or clinic during regular office hours to get help or advice for your child?
C02019	In the last 12 months, when you called during regular office hours, how often did you get the help or advice you needed for your child?
C02020	In the last 12 months, did you make any appointments for your child with a doctor or other health provider for regular or routine health care?
C02021	In the last 12 months, how often did your child get an appointment for regular or routine health care as soon as you wanted?
C02022	In the last 12 months, how many days did your child usually have to wait between making an appointment for regular or routine care and actually see a provider?
C02023	In the last 12 months, did your child have an illness or injury that needed care right away from a doctor's office, clinic, or emergency room?
C02024	In the last 12 months, when your child needed care right away for an illness or injury, how often did your child get care as soon as you wanted?
C02025	In the last 12 months, how long did your child usually have to wait between trying to get care and actually seeing a provider for an illness or injury?
C02026	In the last 12 months, did your child need an appointment for well-patient care, such as a physical exam or check-up?
C02027	In the last 12 months, when your child needed an appointment for well-patient care, how often did your child get an appointment as soon as you wanted?
C02028	In the last 12 months, when your child needed an appointment for well-patient care, how long did your child have to wait between trying to get care and actually seeing a provider?
C02029	In the last 12 months, how many times did your child go to an emergency room?
C02030	In the last 12 months (not counting times your child went to an emergency room) how many times did your child go to a doctor's office or clinic?
C02031	In the last 12 months, how much of a problem, if any, was it to get care for your child that you or a doctor believed necessary?
C02032	In the last 12 months, how much of a problem, if any, were delays in your child's health care while you waited for approval from your child's health plan?
C02033	In the last 12 months, how often did your child wait in the doctor's office or clinic more than 15 minutes past the appointment time to see the person your child went to see?
C02034	In the last 12 months, how often did office staff at your child's doctor's office or clinic treat you and your child with courtesy and respect?
C02035	In the last 12 months, how often were office staff at your child's doctor's office or clinic as helpful as you thought they should be?
C02036	In the last 12 months, how often did your child's doctors or other health providers listen carefully to you?
C02037	In the last 12 months, how often did your child's doctors or other health providers explain things in a way you could understand?
C02038	In the last 12 months, how often did your child's doctors or other health providers show respect for what you had to say?
C02039	Is your child old enough to talk with doctors about his or her health care?

Name	Content/Topic
C02040	In the last 12 months, how often did doctors or other health providers explain things in a way your child could understand?
C02041	In the last 12 months, how often did doctors or other health providers spend enough time with your child?
C02042	How would you rate all your child's health care?
C02043	In the last 12 months, what type of facility did your child go to most often for health care?
C02044	In the last 12 months, did you or anyone else send in any claims for your child to your child's health plan?
C02045	In the last 12 months, how often did your child's health plan handle your child's claims in a reasonable time?
C02046	In the last 12 months, how often did your child's health plan handle your child's claims correctly?
C02047	In the last 12 months, before your child went for care, how often did your child's health plan make it clear how much you would have to pay?
C02048	In the last 12 months, did you look for any information in written materials from your child's health plan?
C02049	In the last 12 months, how much of a problem, if any, was it to find or understand information in the written materials?
C02050	In the last 12 months, did you call the health plan's customer service to get information or help for your child?
C02051	In the last 12 months, how much of a problem, if any, was it to get the help you needed when you called your child's health plan's customer service?
C02052	In the last 12 months, have you called or written your child's health plan with a complaint or problem?
C02053	How long did it take for your child's health plan to resolve your complaints?
C02054	Was your complaint or problem settled to your satisfaction?
C02055	In the last 12 months, did you have any experiences with paperwork for your child's health plan?
C02056	In the last 12 months, how much of a problem, if any, did you have with paperwork for your child's health plan?
C02057	How would you rate your child's health plan now?
C02058	To what extent do you agree or disagree that TRICARE Prime makes it hard to get the health care services my child needs?
C02059	To what extent do you agree or disagree that TRICARE Prime makes it hard for my child to see the health care provider I prefer?
C02060	To what extent do you agree or disagree that TRICARE Prime's health benefits do not meet my child's needs?
C02061	To what extent do you agree or disagree that TRICARE Prime provides high quality health care?
C02062	In general, how would you rate your child's overall health now?
C02063	Does your child currently need or use medicine prescribed by a doctor (other than vitamins)?
C02064	Is this because of a medical, behavioral, or other health condition?

Name	Content/Topic
C02065	Is this because of ANY health condition that has lasted or is expected to last for at least 12 months?
C02066	Does your child need or use more medical, mental health, or educational services than is usual for most children the same age?
C02067	Is this because of a medical, behavioral, or other health condition?
C02068	Is this because of a health condition that has lasted or is expected to last for at least 12 months?
C02069	Is your child limited or prevented in any way in his or her ability to do the things most children of the same age can do?
C02070	Is this because of a medical, behavioral, or other health condition?
C02071	Is this because of a health condition that has lasted or is expected to last for at least 12 months?
C02072	Does your child need to get special therapy, such as physical, occupational, or speech therapy?
C02073	Is this because of a medical, behavioral, or other health condition?
C02074	Is this because of a health condition that has lasted or is expected to last for at least 12 months?
C02075	Does your child have any kind of emotional, developmental, or behavioral problem for which he or she needs or gets treatment or counseling?
C02076	Is this because of a health condition that has lasted or is expected to last at least 12 months?
C02077	When was the last time your child had a routine preventive care appointment, such as a physical examination or a well baby/child check-up?
C02078	What is your child's age right now?
C02079	Is your child male or female?
C02080	Is your child of Hispanic or Latino origin or descent?
C02081A	What is your child's race - White?
C02081B	What is your child's race - Black or African American?
C02081C	What is your child's race - Asian?
C02081D	What is your child's race - Native Hawaiian or other Pacific Islander?
C02081E	What is your child's race - American Indian or Alaska Native?
C02082	What is your age now?
C02083	Are you male or female?
C02084	What is the highest grade or level of school that you have completed?
C02085	How are you related to the child?

#### NRC SURVEY FIELDING VARIABLES

FLAG_FIN	Final disposition
DUPFLAG	Multiple response indicator

#### CODING SCHEME FLAGS AND COUNTS

N2	Coding Scheme flag for Note 2
N3	Coding Scheme flag for Note 3
N4	Coding Scheme flag for Note 4

Name	Content/Topic
N5	Coding Scheme flag for Note 5
N6	Coding Scheme flag for Note 6
N7	Coding Scheme flag for Note 7
N8	Coding Scheme flag for Note 8
N9	Coding Scheme flag for Note 9
N10	Coding Scheme flag for Note 10
N11	Coding Scheme flag for Note 11
N12	Coding Scheme flag for Note 12
N13	Coding Scheme flag for Note 13
N14	Coding Scheme flag for Note 14
N15	Coding Scheme flag for Note 15
N16	Coding Scheme flag for Note 16
N17	Coding Scheme flag for Note 17
N18	Coding Scheme flag for Note 18
N19	Coding Scheme flag for Note 19
N20	Coding Scheme flag for Note 20
MISS_1	Count of skip pattern violations
MISS_4	Count of incomplete grid errors
MISS_5	Count of scalable response of "don't know" or "not sure"
MISS_6	Count of not applicable/valid skips
MISS_7	Count of out-of-range errors
MISS_8	Count of multiple response errors
MISS_9	Count of no response (invalid skip)
MISS_TOT	Total number of missing responses
<b>CONSTRUCTED VARIABLES</b>	
CONUS	CONUS/OCONUS Indicator
XENRLLMT	Beneficiary's enrollment status in TRICARE Prime
XENR_PCM	TRICARE Enrollment by PCM type
XINS_COV	Insurance Coverage
XBNFGRP	Constructed beneficiary group
KMILWAT1	Waited less than 4 weeks for well-patient visit at military facility (coded in binary form 1 / 2)
KCIVWAT1	Waited less than 4 weeks for well-patient visit at civilian facility (coded in binary form 1 / 2)
KMILOFFC	Waited less than 30 minutes at military facility (coded in binary form 1 / 2)
KCIVOFFC	Waited less than 30 minutes at civilian facility (coded in binary form 1 / 2)
KBGPRB1	Big problem getting referrals to a specialist (coded in binary form 1 / 2)

Name	Content/Topic
KBGPRB2	Big problem getting necessary care (coded in binary form 1 / 2)
KMILOP	Outpatient visits to military facility
KCIVOP	Outpatient visits to civilian facility
KCIVINS	Beneficiary covered by civilian insurance
SUPREG	CONUS regions grouped into 3 super regions
WEIGHTS	
BWT	Base-sample weight
POP	DEERS population by CELLNAME for weights
WRWT	Final survey weight
WRWT1	Replicated/Jackknife weight 1
WRWT2	Replicated/Jackknife weight 2
WRWT3	Replicated/Jackknife weight 3
WRWT4	Replicated/Jackknife weight 4
WRWT5	Replicated/Jackknife weight 5
WRWT6	Replicated/Jackknife weight 6
WRWT7	Replicated/Jackknife weight 7
WRWT8	Replicated/Jackknife weight 8
WRWT9	Replicated/Jackknife weight 9
WRWT10	Replicated/Jackknife weight 10
WRWT11	Replicated/Jackknife weight 11
WRWT12	Replicated/Jackknife weight 12
WRWT13	Replicated/Jackknife weight 13
WRWT14	Replicated/Jackknife weight 14
WRWT15	Replicated/Jackknife weight 15
WRWT16	Replicated/Jackknife weight 16
WRWT17	Replicated/Jackknife weight 17
WRWT18	Replicated/Jackknife weight 18
WRWT19	Replicated/Jackknife weight 19
WRWT20	Replicated/Jackknife weight 20
WRWT21	Replicated/Jackknife weight 21
WRWT22	Replicated/Jackknife weight 22
WRWT23	Replicated/Jackknife weight 23
WRWT24	Replicated/Jackknife weight 24
WRWT25	Replicated/Jackknife weight 25
WRWT26	Replicated/Jackknife weight 26

Name	Content/Topic
WRWT27	Replicated/Jackknife weight 27
WRWT28	Replicated/Jackknife weight 28
WRWT29	Replicated/Jackknife weight 29
WRWT30	Replicated/Jackknife weight 30
WRWT31	Replicated/Jackknife weight 31
WRWT32	Replicated/Jackknife weight 32
WRWT33	Replicated/Jackknife weight 33

## Alphabetical Table of Variables

	Page
AGESMPL -Age.....	90
BGCSMPL -Beneficiary Group .....	90
BWT -Basic Sampling Weight.....	150
C02001 -Are you adult responsible for child.....	108
C02002 -Which hlth plan did you use most .....	108
C02003 -In last 12 mos,# mos in a row cvrd w/Pln.....	108
C02004A -Child covered by TRICARE Prime .....	109
C02004B -Child covered by TRICARE Extra/Standard .....	109
C02004C -Child covered by Fed. Emp Health Benefit .....	109
C02004D -Child covered by Medicaid .....	109
C02004E -Child covered by Civilian HMO .....	109
C02004F -Child covered by Other Civilian Ins. ....	110
C02004G -Child covered by USFHP .....	110
C02004H -Not sure who Child covered by .....	110
C02004I -Child did not use health plan last 12mos .....	110
C02005 -Does child have personal Dr/Nurse .....	110
C02006 -How much prblm to get personal Dr/Nurse.....	111
C02007 -Talk about feeling/growing/behaving .....	111
C02008 -Rating of childs personal Dr/Nurse .....	111
C02009 -Does child have primary care manager .....	112
C02010 -Know name of childs Primary care mgr .....	112
C02011 -In last 12 mos how much prblm to see PCM .....	112
C02012 -Is primary care mgr military or civilian.....	113
C02013 -Did you think child needed to see spclst.....	113
C02014 -How much prblm to get referral to spclst .....	113
C02015 -In last 12 mos did child see specialist.....	114
C02016 -Rating of specialist seen most often .....	114
C02017 -Specialist same as personal Dr .....	114
C02018 -Call during reg. Hrs to get help/advice .....	115
C02019 -Called during reg Hrs did you get hlp.....	115
C02020 -Make appt for regular/routine hlthcre .....	115
C02021 -How oftn get appt for care soon as wntd .....	115
C02022 -Wait btwn mking appt and seeing provider.....	116
C02023 -Have illness/injury need care right away.....	116
C02024 -Get needed care as soon as wanted .....	116
C02025 -Wait btwn trying to & seeing provider .....	117
C02026 -Appointment for well-patient care .....	117
C02027 -Get appt for well-patient care .....	117
C02028 -Wait to see provider for well-patnt care .....	118
C02029 -Times to ER .....	118
C02030 -Times to Dr office/Clinic (excluding ER) .....	118
C02031 -Problem to get necessary care .....	119
C02032 -Problem wait for approval .....	119
C02033 -How oftn wait >15 mins.....	119
C02034 -How often staff treat w/courtesy & respect .....	120
C02035 -How oftn were staff helpful.....	120
C02036 -How oftn did staff listen carefully .....	120
C02037 -How oftn did staff explain things to you .....	121
C02038 -How oftn staff respect what had to say .....	121
C02039 -Child old enough to talk to Dr.....	121
C02040 -Dr explain in way for child to undrstnd .....	122

C02041	-How often spend enough time w/child .....	122
C02042	-Rating of child's healthcare.....	123
C02043	-Type of facility child used most often .....	123
C02044	-Send in any claims.....	123
C02045	-Handle claim in reasonable time.....	124
C02046	-Handle claim correctly.....	124
C02047	-Plan make clear how much to pay.....	124
C02048	-Look for info/written material.....	125
C02049	-Find/understand info in written material .....	125
C02050	-Call customer service to get info.....	125
C02051	-Problem get help when call customer svc .....	125
C02052	-Called/written plan with complaint.....	126
C02053	-How long to resolve complaint .....	126
C02054	-Complaint/problem settled to satisfaction .....	126
C02055	-Experience with paperwork.....	127
C02056	-Problem with paperwork .....	127
C02057	-Rating of experience with child hlth plan.....	127
C02058	-TRICARE Prime: Hard to get Health care .....	128
C02059	-TRICARE Prime: Hard to see Health care provider.....	128
C02060	-TRICARE Prime: Hlth benefits do not meet needs.....	128
C02061	-TRICARE Prime: Provides high quality hlth care .....	129
C02062	-Rate child overall health.....	129
C02063	-Child use medicine prescribed by Dr .....	129
C02064	-Medicine b/c medical,behavioral,other.....	129
C02065	-Medicine b/c condtn expected last>=12 mos.....	130
C02066	-More medical,mntl,education svcs thn usual .....	130
C02067	-Use svcs b/c medical, behavioral, oth.....	130
C02068	-Svcs b/c condition expected last>=12 mos.....	130
C02069	-Limited/prevented in ability.....	131
C02070	-Limited b/c medical, behavioral, other .....	131
C02071	-Limited b/c condition expected last>=1yr .....	131
C02072	-Get special therapy .....	131
C02073	-Therapy b/c medical, behavioral, other .....	132
C02074	-Therapy b/c condition expected last>=1yr .....	132
C02075	-Problem for which gets trtmnt/counseling.....	132
C02076	-Trtmnt/counseling b/c conditn last>=1yr .....	132
C02077	-Last time routine preventive care appt.....	133
C02078	-Child's age now.....	133
C02079	-Is child male or female .....	133
C02080	-Is child Hispanic/Latino .....	133
C02081A	-Child race: White .....	134
C02081B	-Child race: Black .....	134
C02081C	-Child race: Asian.....	134
C02081D	-Child race: Native Hawaiian/Pacific Islander .....	134
C02081E	-Child race: Am. Indian/Alaskan.....	134
C02082	-Your age now .....	135
C02083	-Are you male or female.....	135
C02084	-Highest grade/level you completed .....	135
C02085	-How related to child.....	136
CONUS	-CONUS - CONUS/OCONUS Indicator .....	147
DAGEQY	-Age (As of 28 February 2002).....	92
DBENCAT	-Beneficiary Category .....	94
DCATCH	-Catchment Area .....	101
DHSRGN	-Health Service Region .....	106
DMEDELG	-Medical Privilege Code .....	94
DSPONSVC	-Derived Sponsor Branch of Service.....	95
DUPFLAG	-Multiple Response Indicator.....	136
ENBGSMPL	-Enrollment by beneficiary category .....	91

ENLSMPL	-Enrollment Sampling Group.....	106
ENRID	-Enrollment DMISID .....	96
FIELDAGE	-Age (As of 1 July 2002).....	93
FLAG_FIN	-Final Disposition.....	136
FNSTATUS	-Final Status .....	106
KBGPRB1	-Big problem getting referrals to spclst .....	149
KBGPRB2	-Big problem getting necessary care.....	149

## Introduction

This Codebook and Users' Guide provides programmers and analysts with a tool to assist them in creating their own cross-tabulations and basic statistical estimates using the 2002 Child Health Care Survey of DoD Beneficiaries (HCSDB). It is intended for users wanting to create tables and to perform analyses other than those in the reports associated with this project.

Any user who wishes to recreate specific tables from the analytic report should also refer to "The 2002 Health Care Survey of DoD Beneficiaries: Child Technical Manual." That document outlines the procedures required to reproduce the child report cards using HCSDB data.

This chapter explains how to use this guide, reviews the survey, briefly describes the sample design, and concludes with a list of other documents on the HCSDB data that may be useful for policymakers, administrators, or other users.

### How to Use This Guide

Chapter 2 describes the database conventions and types of variables in the database. This chapter explains the relationship of the raw survey data to the cleaned and constructed variables preferred for data analyses.

Chapter 3 provides table-making instructions in both SAS and SPSS, presenting the basic computer programming code needed to tabulate the data in SAS and the interactive steps for generating tables in SPSS. Either package may be used. While we assume that most users have some knowledge of computer systems and statistical processing, examples of how to create tables and the resulting output are given to simplify the process of tabulating the data. Because of the complex sample design, users interested in measuring the precision of their results will need to use a statistical package capable of calculating standard errors for stratified surveys, such as SUDAAN<sup>TM</sup> or WesVar PC<sup>®</sup>. Sample programming code is included to estimate standard errors using methods that are appropriate for the complex sample design.

Chapter 4 is the codebook describing each variable in the database, including a list of all possible values of the variable, weighted and unweighted frequency counts and percent occurrences for each value, and the values' interpretation or formatting. The codebook helps users assess the availability of certain measures, specify variables of interest, and identify all possible values of a variable. The variables are listed in the order of their position on the data file, where they are grouped according to source as follows:

- Sampling variables used to place beneficiaries in appropriate strata
- Information from the Defense Enrollment Eligibility Reporting System (DEERS) at the time of sampling
- Questionnaire responses: cleaned and recoded
- Variables created during the fielding of the survey
- Coding Scheme flags and missing value counts
- Constructed variables for analysis

We also provide an alphabetical quick-reference list to help the user locate each variable after the table of contents.

Users who wish to know more about the technical aspects of the database creation, construction of new variables, or MPR's report production procedures should refer to "The 2002 Health Care Survey of DoD Beneficiaries: Child Technical Manual," available from the TRICARE Management Activity Office.

### **What is the HCSDB?**

The HCSDB is an annual health care survey that was first fielded in 1995 for active duty military personnel, retirees, and their adult family members. In 1996 and 1997, the survey was expanded to include topics related to health care of children. In those years, the survey consisted of two separate questionnaires: Form A for adults and Form C for children's topics. The 1998 HCSDB did not include a child survey. With the 1999 HCSDB, fielding of the child survey was resumed. The survey is sponsored by the Assistant Secretary of Defense (Health Affairs) [OASD (HA)], under authority of the National Defense Authorization Act for Fiscal Year 1993 (P.L. 102-484). The child survey assesses parents' satisfaction with and access to their child's health care, TRICARE Prime, communication and customer service related to pediatric care. Note that prior to 2002, the title of the survey referred to the survey reference period. For example, the survey fielded in 2000 described children's experiences beginning in 1999 and was known as the 1999 Child HCSDB. Beginning in 2002, the survey title refers to the year the survey was fielded.

The 2002 Child HCSDB was closely modeled on the Consumer Assessment of Health Plans Survey (CAHPS) 2.0 H survey instruments so that findings for children in the MHS could be compared with the results of CAHPS surveys of privately insured children in the civilian sector. Most of the survey questions are identical to the CAHPS questions. CAHPS is a survey program sponsored by the Agency for Health Care Research and Quality (AHRQ), U.S. Department of Health and Human Services, and the Picker Institute. The program is designed to monitor the satisfaction and access of civilian health care plan beneficiaries. A few of the questions are "CAHPS-like" but are modified slightly to better fit the MHS context; some questions are unique to issues related to TRICARE. The annotated child questionnaire appears in Appendix A.

The Child HCSDB covers the following topics:

- **Health Plan.** This section collects data on TRICARE Prime enrollment and the use of supplemental insurance and/or other private insurance by the child in the past 12 months.
- **Your Child's Personal Doctor or Nurse.** In this section, respondents are asked about their relationship with their child's personal doctor or nurse. They are asked to rate their child's personal doctor or nurse on a scale of 0 to 10 where 0 is the worst and 10 is the best. There are additional questions on problems receiving care from a TRICARE primary care manager.
- **Getting Health Care from a Specialist.** This section collects information about the child's need for and access to care from specialists. Respondents rate the specialist that their child sees most frequently on a scale from 0 to 10 where 0 is the worst and 10 is the best.
- **Calling Doctors' Offices.** In this section, parents are asked about access to care and how frequently they obtain information by telephone.
- **Your Child's Health Care in the Last 12 Months.** This section collects information on where children of DoD beneficiaries received most of their care in the past 12 months. These are questions on both military and civilian care. This section also contains questions about general and specific care at the facility the child used the most. These questions cover topics such as availability of providers and their staff, convenience, and courtesy and respect shown by providers and their staff. These questions are similar in content and format to questions in CAHPS.
- **Your Child's Health Plan.** This section is designed to measure beneficiaries' satisfaction with their child's primary health plan. Respondents are asked to rate their child's health plan on a scale of 0 to 10, where 0 is the worst and 10 is the best. Additionally, respondents are asked questions

on problems with claims processing for their child, finding and understanding written materials from their child's health plan, customer service, processing paperwork, and resolving complaints.

- **Your Child's Health.** This section collects information about the child's overall health. Questions regarding the child's health, any other condition that is limiting, use of medication, use of special therapies, treatment or counseling are included in this section. This section also includes questions about the child's use of medical, mental health, or educational services or the need for more services.
- **About Your Child and You.** This section collects demographic information about the child, including age, gender, and race. Respondents also report their age, gender, education level, and relationship to the child.

### **Sample Design Overview**

The sample of beneficiaries for the child HCSDb was drawn from an extract file of the DEERS database of military health system (MHS) beneficiaries with a reference date of February 28, 2002. The DEERS extract file includes all eligible MHS beneficiaries as follows:

- Younger than eighteen years of age on February 28, 2002 and residing only in the United States.
- Eligible for military health care benefits as of February 28, 2002.
- Sponsor of the child beneficiary must have been a member of one of the following: Army, Navy, Air Force, Marine Corps, Coast Guard, Public Health Service (PHS), or National Oceanic and Atmospheric Administration (NOAA).
- The sponsor of the child must have been one of the following: active duty, recalled to active duty, academy student/Navy OCS, National Guard, Reserve, transitional loss (RIF), or retired.

A stratified probability sample design was used to select DoD health care beneficiaries for the 2002 Child HCSDb. Strata were defined by a combination of geographic area, age group, and enrollment status. Specific information on the sample design appears in, "The 2002 Health Care Survey of DoD Beneficiaries: Child Sample Report", Mathematica Policy Research, Washington, D.C.

From a sample of 35,000, 11,401 sponsors of children in MHS completed and returned the 2002 Child HCSDb questionnaire between June 2002 and September 2002, yielding a response rate of 32.4%. Information on developing response rates can be found in "The 2002 Health Care Survey of DoD Beneficiaries: Child Technical Manual".

### **Other Documents on the 2002 HCSDb**

This document is intended for programmers and analysts using the 2002 Child HCSDb data. Following is a list of other documents that may be requested from the TRICARE Management Activity Office:

- The 2002 Health Care Survey of DoD Beneficiaries: Child Sample Design
- The 2002 Health Care Survey of DoD Beneficiaries: Child Technical Manual

Chapter

2

---

## Description of the Child HCSDB Database

This chapter presents the procedures for developing the database, and presents the database file layout.

### Variable Naming Conventions

The conventions used to name variables on the 2002 Child HCSDB data file are listed below and summarized in Tables 2.1.

- **Survey Variables.** Survey variable names consist of up to eight alphanumeric characters that start with an alpha character ("C" for Child survey variables), followed by a year designation ("00") and ending with question number and, if necessary, one alpha character to identify the relevant survey question. For example, the variable representing the first question on the Child survey is given the name C02001. Recoded variables have the same names as on the survey. The original ones are suffixed with "\_O" (these will not be on the public release file).
- **Coding Scheme Flags and Counts.** Coding Scheme flags, variables N1-30, reference the notes in the Coding Scheme for Child Survey. N2, for example, is set when checking the values of C02005, C02006 through C02008. See the Coding Scheme in Appendix C for more information. Coding Scheme counts are sums of missing value responses for each questionnaire; each of these variable names begins with the 4 characters "MISS".
- **Constructed Independent Variables.** Independent variables are prefixed with an "X." These include original survey variables modified as a result of data cleaning or recoding and newly constructed variables that did not previously exist on the survey file. For example, since the variable PCM was modified as a result of data cleaning and recoding, it was renamed XENR\_PCM.
- **Constructed Dependent Variables.** All newly constructed dependent variables are prefixed with a "K".
- **Weighting Variables.** Weighting variables are prefixed with a "W."

TABLE 2.1

NAMING CONVENTIONS FOR 2002 HCSDB VARIABLES  
(VARIABLES REPRESENTING SURVEY QUESTIONS)

1 <sup>st</sup> Character: Survey Type	2 <sup>nd</sup> – 3 <sup>rd</sup> Characters: Survey Year	4 <sup>th</sup> – 6 <sup>th</sup> Characters: Question #	Additional Characters: Additional Information
C= Health Beneficiaries (17 and younger, Child Questionnaire)	02	001-084	A to I are used to label responses associated with a multiple response question

## (Constructed Variables)

1 <sup>st</sup> Characters: Variable Group	Additional Characters: Additional Information
N=Coding scheme notes	Number referring to Note, e.g., N2
X=Constructed independent variable	Descriptive text, e.g., XENRLLMT
K=Constructed dependent variables	Descriptive text, e.g., KMILOP (Total number of outpatient visits to a military facility)

## Cleaning and Editing Conventions

Data quality procedures are found in the Coding Scheme tables. The complete Coding Scheme appears in Appendix C. It contains detailed instructions for all editing procedures used to correct data inconsistencies and errors. Editing procedures check for appropriate response values and consistent responses throughout the questionnaire. The steps to insure data quality include the following:

- **Initial Cleaning.** Missing value flags were encoded when NRC created the SAS dataset:
  - Skipped items were encoded with SAS missing value code of ‘.’.
  - Multiple responses, where there should be a single response, were encoded with SAS missing value ‘.A’.
  - Incomplete grid responses were encoded as SAS missing value ‘.I’ with two exceptions: 1) If there was a response in the right column(s) and none in the left column(s), the missing grids were zero-filled; 2) if there was a response in the left column(s) and none in the right column(s), the field was right-adjusted and then zero-filled.
- **Data Cleaning and Recoding of Variables – Implementation of the Coding Scheme.** Skip patterns were checked for consistency, and questions that were skipped legitimately were recoded with the SAS missing value of “.N”; questions that were answered, but should have been skipped, were recoded with a SAS missing value of “.C”. When possible, variables were backward coded or forward coded to make all responses consistent within a sequence. Numeric values were checked, and values that were out of range were flagged with the SAS missing value of “.O”.
- **Frequency Checks.** Formatted and unformatted frequency tables for all variables in the 2002 Child HCSDb data file appear in Chapter 4 of this document. These frequency tables and other relevant cross tabulations were used to examine the range of values recorded for each data item to determine the type and magnitude of missing values. All value labels have been checked for accuracy.

## Record Selection Criteria

Blank returns, nonrespondents, and any respondents found to be ineligible for MHS benefits were removed from the database. In addition, among eligible respondents with a non-blank questionnaire, a questionnaire must be “complete” to be included in the database.

To determine if a child questionnaire is “complete”, 27 key questions were chosen. At least 50 percent of these key items (fourteen or more) must be answered for a questionnaire. The key questions are: 2, 3, 5, 9, 13, 18, 20, 23, 26, 29, 30, 43, 44, 48, 49, 50, 52, 55, 57, 58, 78, 79, 81, 82, 83, 84, and 85. These key questions were adapted from the complete questionnaire rule developed by AHRQ for CAHPS surveys.

We retained 11,401 eligible respondents.

## Weighting Procedures

The analysis of survey data from complex sample designs, such as the 2002 Child HCSDb, requires weights to do the following:

- Compensate for variable probabilities of selection
- Adjust for differential response rates
- Improve the precision of the survey-based estimates through post-stratification [for details, see Brick and Kalton (1996) and references cited therein]

- Sampling weights are equivalent to the reciprocal of the probability of each respondent's selection into the sample. Sampling weights are further adjusted for nonresponse within classes defined by sampling strata: a cross-classification of enrollment status, geographic area, and beneficiary group. These nonresponse-adjusted weights are then ratio-adjusted to population counts from the DEERS files to compensate for variations from the estimated population counts. To properly weigh the data, an analyst should use the final weight WRWT Chapter 4 contains weighted and unweighted frequencies for each variable included in this data set.

## 3

---

## Programming Guide

This chapter is designed to help users create tables and variance estimates. Procedures for using SAS, SPSS, SUDAAN, and WesVarPC to create estimates are explained. Examples provided in the text are based on a preliminary version of the 2002 child data.

### How To Make a Table Using SAS

The 2002 Child HCSDB dataset is provided in a Statistical Analysis System (SAS) format. SAS is a computer software system used for data management, summarization, and analysis. A format library for the child database is included along with the dataset. SAS can be run interactively or non-interactively (in batch mode), and the sample programs presented here can be run using either method. Special instructions are given later in the chapter for working interactively with the SAS Display Manager System in a Windows environment. All SAS programs generate a LOG and a LST file. The LOG file shows how SAS interprets your program and flags SAS syntax errors. The LST file shows the requested output.

### File References, Libraries, and Options

SAS recognizes two types of datasets -- permanent and temporary. Permanent datasets, such as the HCSDB, are located through a LIBNAME that references the directory where the data is stored. For example, if the child dataset for 2002 is located on a CD-ROM in the subdirectory HCSDB02\FORMC, your LIBNAME statement must look like this:

```
LIBNAME INFORMC 'F:\HCSDB02\FORMC';
```

The Form C dataset can then be referred to as INFORMC.HCSDB02C, where INFORMC is the location of the file HCSDB02C.

A format library requires a LIBNAME LIBRARY statement that shows the location of the format library. For example, if the Form C format library is stored on your hard drive in a FMTLIB subdirectory, the LIBNAME statement should look like this:

```
LIBNAME LIBRARY 'C:\HCSDB02\FORMC\FMTLIB';
```

The OPTIONS statement controls page format and line length. A table with a "portrait" orientation might have this statement:

```
OPTIONS PS=79 LS=132;
```

A table with a "landscape" orientation that is left justified would have this OPTIONS statement:

```
OPTIONS PS=50 LS=175 NOCENTER;
```

**DATA Step**

The DATA step is used to create permanent or temporary datasets. It is also used to create new variables, modify existing variables, and limit the number of variables or observations. In a DATA step, you can do any or all of the following activities:

- Construct new variables. For example, to construct a variable of family of active duty by sex:

```
/* Family of Active duty males */  
IF SEXSMPL = 1 AND BGCSMPL = 2 THEN XSEX_AD = 1;  
* Family of Active duty females;  
ELSE IF SEXSMPL = 2 and BGCSMPL = 2 THEN XSEX_AD = 2;  
ELSE XSEX_AD = .; /* missing value */
```

[Note: the two methods to insert comments: enclosed within **/\* \*/** or beginning with **\*** and ending with a semicolon]

- Modify existing variables. For example, if the respondent is in super region 2, the respondent will be placed in the combined super region 2/3:

```
IF SUPREG = 2 THEN SUPREG = 3
```

- Limit the number of variables. Use a KEEP statement:

```
KEEP SUPREG REGSMPL C02057 C02058;
```

- Limit the number of observations. Use a subsetting IF:

```
/* Keep only super region 3 observations */  
IF SUPREG = 3;
```

- Create a new temporary dataset. For example, CAC\_1 is a temporary file of observations for only those respondents in region 1:

```
LIBNAME INFORMC 'F:\HCSDB02\FORMC';  
DATA CAC_1;  
/* Input file is HCSDB02C */  
SET INFORMC.HCSDB02C;  
IF REGSMPL = 1;  
RUN;
```

- Create a new permanent dataset. For example, OUT.CAC\_2002 is a permanent dataset only of Region 2 respondents:

```
LIBNAME INFORMC 'F:\HCSDB02\FORMC';  
LIBNAME OUT 'C:\HCSDB02\FORMC';  
DATA OUT.CAC_2002;  
SET INFORMC.HCSDB02C;  
IF REGSMPL = 2;  
RUN;
```

## PROC TABULATE

PROC TABULATE produces summary statistics in a table layout. The table can have up to three dimensions: page, row, and column. Within any dimension, multiple variables can be reported one after another or hierarchically. Useful statistics that are available in PROC TABULATE include:

- N                      number of observations with nonmissing values
- NMISS                number of observations with missing values
- MEAN                the arithmetic mean
- SUM                  the sum
- PCTN                percent that one frequency represents of another frequency
- PCTSUM             percent that one sum represents of another sum

The essential elements to execute PROC TABULATE are outlined below (items within < > are not required):

```
PROC TABULATE DATA=your dataset <option list>;  
CLASS class variables;  
VAR analysis variables;  
TABLE << page expression, > row expression, > column expression </table options>;  
WEIGHT WRWT;  
RUN;
```

If the input file is to be limited to a specific population, a separate DATA step can precede the TABULATE, or a WHERE statement can be used within the TABULATE procedure. For example, to create a table from only respondents in Region 1, you would use the following statement after the PROC TABULATE statement:

```
WHERE REGSMPL = 1;
```

CLASS variables are any variables that are used for grouping; variables such as SUPREG, SEXSMPL, and REGSMPL are good examples of class variables. Class variables can be either character or numeric and typically have a discrete number of values. Unless MISSING is specified in the options list in the PROC TABULATE state, any observations with a missing CLASS variable will be dropped from the table.

The VAR statement identifies all analysis variables for a table. Analysis variables must be numeric and can be either discrete or continuous. SAS excludes missing values when computing statistics such as means and percentages.

The WEIGHT statement identifies the numeric variable whose value is used for weighting each *analysis* variable. In the HCSDB for 2002, the weight variable is WRWT.

The TABLE statement defines the table features. Every variable listed in this statement **must** be classified as either a class variable or an analysis variable in the CLASS or VAR statements. A comma separates each table dimension (page, row, and column). If there are three dimensions, the first is the page, the second is the row, and the last is the column. If there are only two dimensions, the first is the row and the second is the column. Tables with only one dimension are in column form. Each dimension expression is composed of the same following elements:

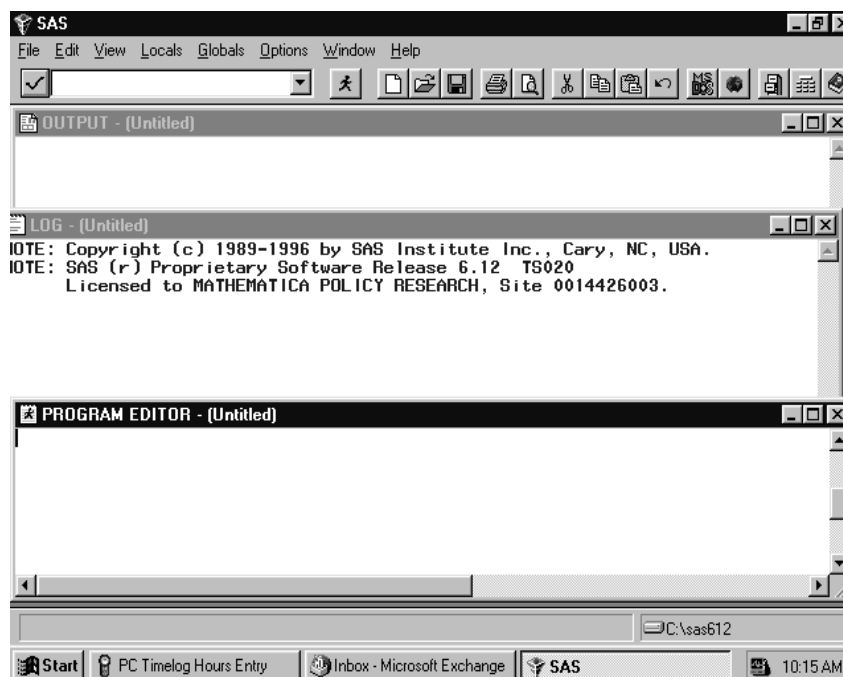

- Analysis variables
- Class variables
- The universal class variable ALL, which summarizes the class variables in the same group or dimension

- Keyword for the statistic to be performed, such as MEAN, SUM, or PCTSUM
- A format modifier, which defines how to format values in cells. For example, F=8.2 will present values with a maximum of 8 positions and 2 digits to the right of the decimal.
- Labels, which temporarily replace variable names and statistic keywords. These labels have the form ='*label*'; for example, REGSMPL='Region' or MEAN=' ' (to eliminate the word MEAN from the headings).
- Crossing operator \* (asterisk). The asterisk is used to cross elements within the same dimension. For example, you would use XENRLLMT\*SEXSMPL to cross enrollment status by sex. The asterisk is also used to connect the statistic (e.g., MEAN, SUM) to the appropriate dimension; for example, to calculate the mean of respondents' satisfaction with all their children's health care in the last 12 months, you would use C02057 \*MEAN.
- Denominator definitions are enclosed by < > (brackets).
- Concatenation operator is a single space between elements in a dimension. For example, to concatenate satisfaction with all their children's health care in the last 12 months with satisfaction with their children's health plan, you would use C02057 C02042.
- Grouping is accomplished with parentheses. Below is an example of grouping, concatenation, and crossing within a single dimension:

**(BGCSMPL ALL)\*SEXSMPL**

### The SAS Display Manager System

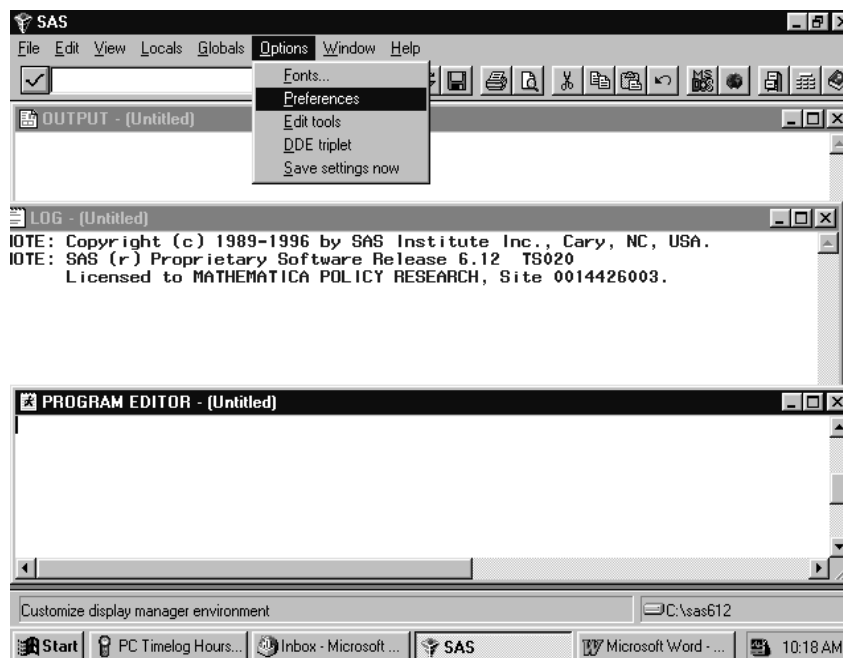

The SAS Display Manager system provides an interactive tool for running SAS commands, like those given above, in the Windows environment. Double clicking the SAS icon on the desktop begins the SAS session. When you first enter the system, the following screen opens.

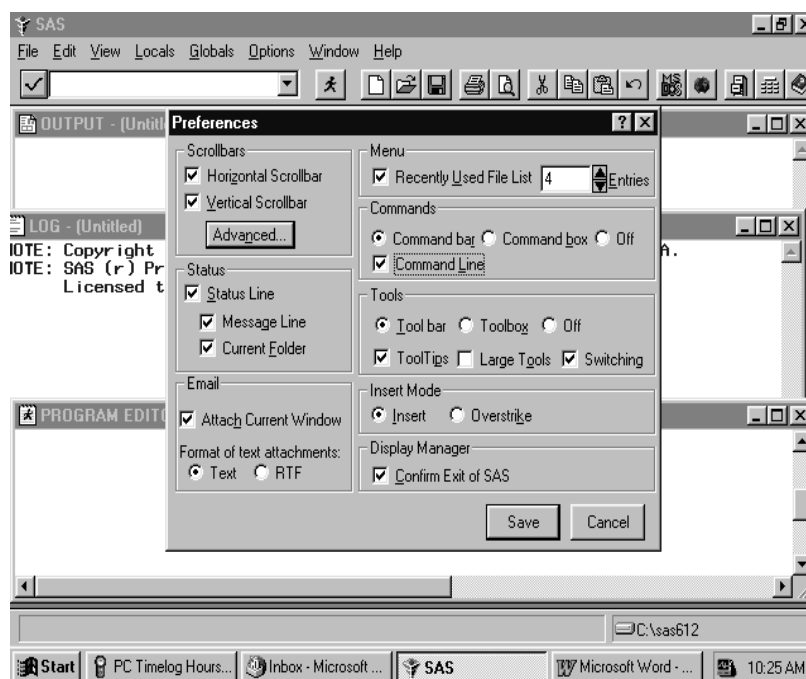

The screen is divided into three windows, each corresponding to an aspect of your SAS session. The **Program Editor** is the window where you compose, edit, and run your SAS commands. The **Log** window displays messages from the SAS system as well as your SAS statements as they are executed. Any error messages appear in the Log. The **Output** window displays the output tables

requested in procedure commands written in the Program Editor. Toggling among the windows is accomplished by clicking anywhere in a given window. The cursor will jump to the selected window. Below are some options for customizing these screens by defining **Preferences**.

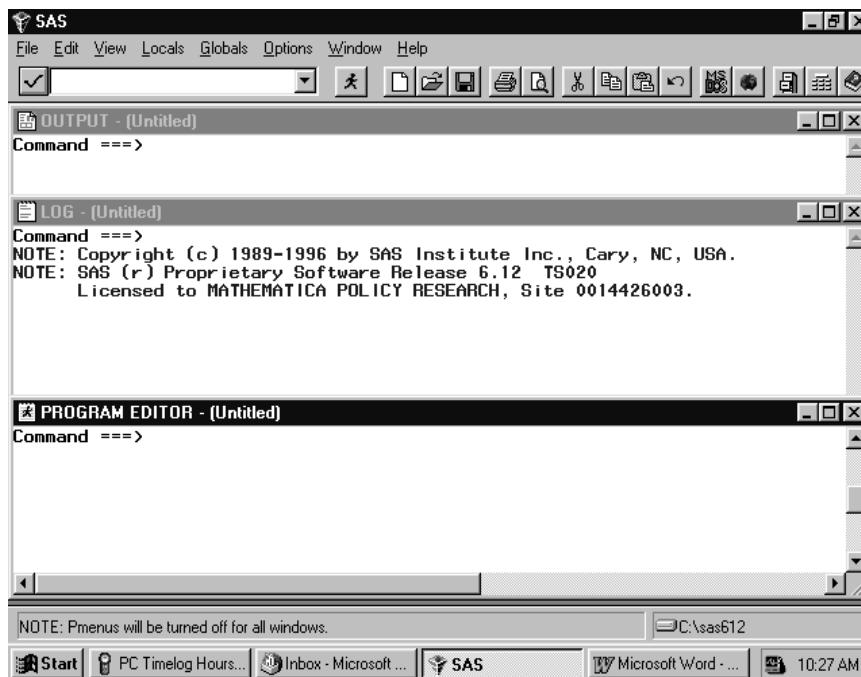

Clicking on **Options** results in the following screen.

Click on **Preferences** as highlighted above, and the following screen will open.

Many of these settings are system default options. To add a command line to the three windows, you would click in the box opposite **Command Line**, causing a check mark to appear in the box. Your screen should resemble the screen above. Click on **Save** and the screen will change to the following.

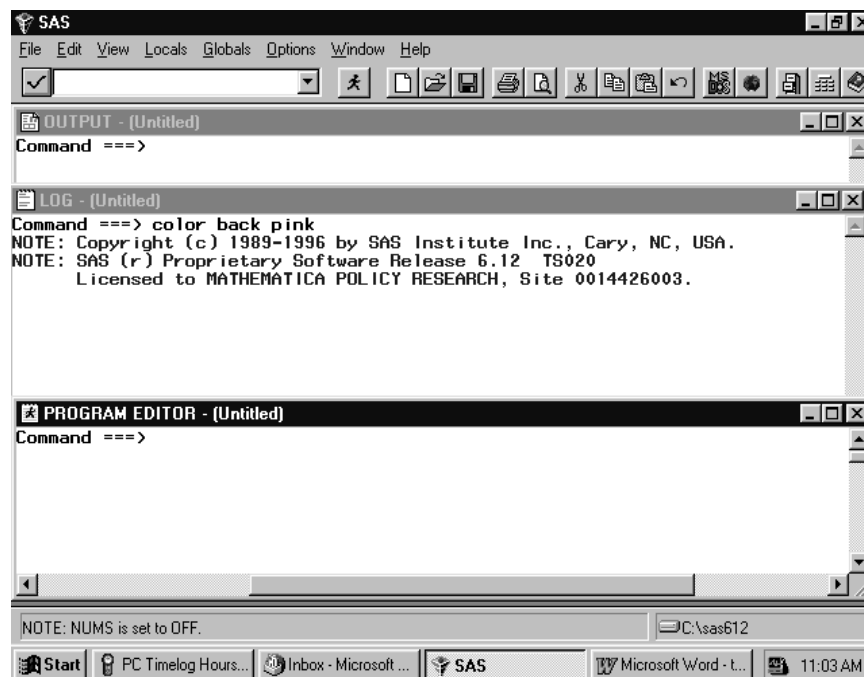

Each window shows the word **Command** followed by an arrow. Commands may be typed at this location. To arrive at the command line, depress the **Home** button on your keyboard. The cursor will appear opposite the arrow.

Toggling among the windows may be accomplished by typing the desired window name at the command line and pressing **Enter**. SAS recognizes **Pgm** as the abbreviated reference to the Program Editor and **Out** as a shortened name for the Output window. A few keystrokes allow you to navigate among the windows. For example, the command line lets you continue to customize our SAS session as follows.

In order to more easily distinguish between the SAS windows, it may be preferable to change the background color of selected windows. As an example, set the background color of the Log window to pink and the Output window to gray. Press the **Home** key to arrive at the command line. Type **Log** opposite the arrow to toggle to the Log window. Type the command, **color back pink** (or some other color) on the command line. Your screen will resemble the following.

Press **Enter** to process the commands and the window will shade to pink. Toggle to the Output window by typing **Out** and keying **Enter**. Type **color back gray** and key **Enter**. These changes make it easier to distinguish between the windows at a glance. The screen looks like the following.

The following option also uses color to distinguish between windows.

All SAS statements for building and processing SAS datasets are typed into the Program editor. A SAS session may involve typing statements like the ones above for library reference, computing new variables, data steps, etc. Entering a long series of statements in such a small space may be awkward, so another arrangement for the windows may be preferable.

*Cascading* the windows is one option. To cascade the windows, open the **Window** menu, and choose **Cascade** as indicated in the following.

Clicking the option **Cascade** produces the following result.

Each window is partly superimposed on the other. The colors distinguish between windows at a glance. With the Program Editor in front, SAS statements may be typed there with relative ease. As a final option, you can enlarge the Program Editor to fill the entire screen. At the command line, type **zoom** as in the following:

The window changes to fill the screen.

One more option for customizing screens is explained below. This involves adding line numbers to the editing environment in the Program Window. After adding the line numbers, many useful line-editing commands become available (see the SAS Manual). On the **Edit** menu choose **Options** and **Numbers** as in the following screen.

The line numbers appear at the left of the full screen Program Editor as in the screen below, and the SAS statements can be typed into the screen and edited.

Below is an example of a PROC TABULATE to construct a table of health care variables by beneficiary group by gender for respondents in region 3. Beneficiary group (BGCSMPL) and sex (SEX) are both class variables with a discrete number of values. The columns of the table are beneficiary group broken out by sex, a total for each beneficiary group, and a region total. The health care variables (C02057 and C02058) are the analysis variables appearing as the rows of the table. The statistic that we want to see is the weighted mean of these variables for each group in the table and for the entire region as a whole.

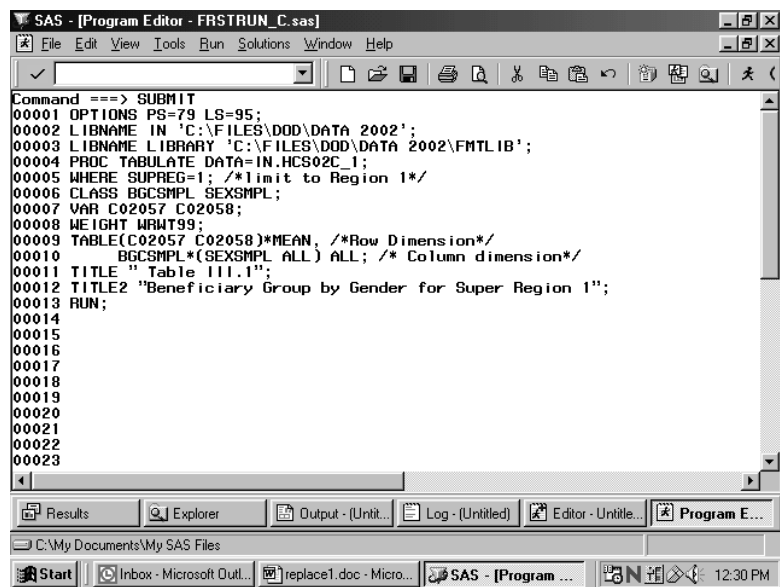

Enter the following SAS statements into the **Program Editor**.

```

OPTIONS PS=79 LS=95;
LIBNAME IN 'C:\FILES\DOD\DATA_2002';
LIBNAME LIBRARY 'C:\FILES\DOD\DATA_2002\FMTLIB';
PROC TABULATE DATA=IN.HCS02C_1;
WHERE SUPREG = 1; /* limit to Region 1 */
CLASS BGCSMPL SEXSMPL;
VAR C02057 C02058;
WEIGHT WRWT99;
TABLE (C02057 C02058)*MEAN, /* Row Dimension */
      BGCSMPL*(SEXSMPL ALL) ALL; /* Column Dimension */
TITLE "Table III-1";
TITLE2' Beneficiary Group by Gender for SUPER REGION 1';
RUN;

```

Key **Home** and type the command **SUBMIT** on the Command Line. **Submit** instructs the SAS system to process the commands written in the Program Editor. Your screen should resemble the following.

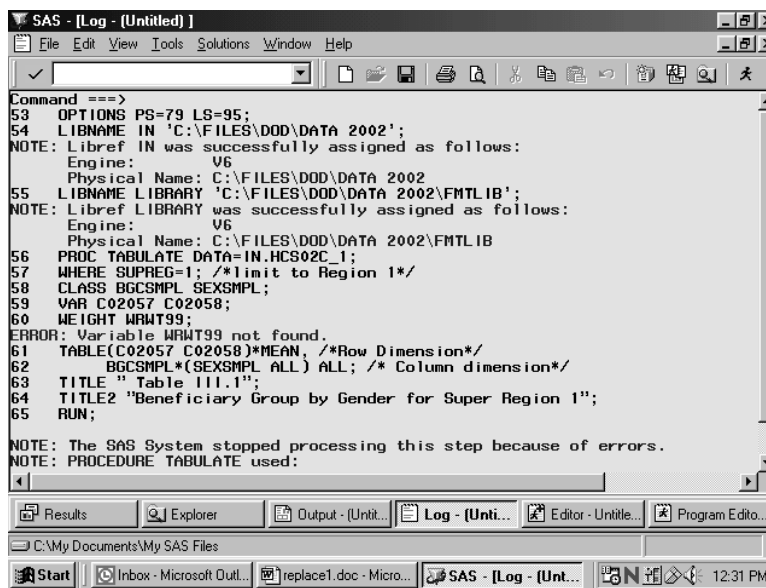

The screenshot shows the SAS Program Editor window titled "SAS - [Program Editor - FRSTRUN\_C.sas]". The menu bar includes File, Edit, View, Tools, Run, Solutions, Window, and Help. The toolbar contains icons for opening, saving, printing, and other standard functions. The main text area contains the following SAS code:

```
Command ==> SUBMIT
00001 OPTIONS PS=79 LS=95;
00002 LIBNAME IN 'C:\FILES\DDD\DATA 2002';
00003 LIBNAME LIBRARY 'C:\FILES\DDD\DATA 2002\FMTLIB';
00004 PROC TABULATE DATA=IN.HCS02C_1;
00005 WHERE SUPREG=1; /*limit to Region 1*/
00006 CLASS BGCSMPL SEXSMPL;
00007 VAR C02057 C02058;
00008 MEIGHT WRM199;
00009 TABLE(C02057 C02058)*MEAN, /*Row Dimension*/
00010        BGCSMPL*(SEXSMPL ALL) ALL; /* Column dimension*/
00011 TITLE "Table III.1";
00012 TITLE2 "Beneficiary Group by Gender for Super Region 1";
00013 RUN;
00014
00015
00016
00017
00018
00019
00020
00021
00022
00023
```

Below the code editor, there are tabs for Results, Explorer, Output - (Unlit...), Log - (Untitled), Editor - Untitle..., and Program E... The status bar at the bottom shows the file path "C:\My Documents\My SAS Files" and the Windows taskbar with the Start button and several open applications, including "replace1.doc - Micro..." and "SAS - [Program ...". The system clock shows 12:30 PM.

Enter the **Submit** command, and the SAS statements disappear from the Program Editor. If a table is successfully produced, the Output window will open and the table will be displayed. If no output is produced, then SAS has encountered an error. SAS statements about the error can be seen and evaluated in the **Log** window. In *all* cases, the Log window should be carefully examined after SAS statements are processed. SAS may produce a table even if there are errors in the program, so the table may not be correct.

No table was produced for this run. The error is indicated in the Log Window as shown below.

The screenshot shows the SAS Log window titled "SAS - [Log - (Untitled)]". The log contains the following text:

```
Command ===>
53  OPTIONS PS=79 LS=95;
54  LIBNAME IN 'C:\FILES\DOD\DATA 2002';
NOTE: Libref IN was successfully assigned as follows:
      Engine:          V6
      Physical Name: C:\FILES\DOD\DATA 2002
55  LIBNAME LIBRARY 'C:\FILES\DOD\DATA 2002\FMTLIB';
NOTE: Libref LIBRARY was successfully assigned as follows:
      Engine:          V6
      Physical Name: C:\FILES\DOD\DATA 2002\FMTLIB
56  PROC TABULATE DATA=IN.HCS02C_1;
57  WHERE SUPREG=1; /*limit to Region 1*/
58  CLASS BGCSMPL SEXSMPL;
59  VAR C02057 C02058;
60  WEIGHT WRWT99;
ERROR: Variable WRWT99 not found.
61  TABLE(C02057 C02058)*MEAN; /*Row Dimension*/
62  BGCSMPL*(SEXSMPL ALL) ALL; /* Column dimension*/
63  TITLE "Table III.1";
64  TITLE2 "Beneficiary Group by Gender for Super Region 1";
65  RUN;

NOTE: The SAS System stopped processing this step because of errors.
NOTE: PROCEDURE TABULATE used;
```

The window also shows a taskbar at the bottom with the Start button and several open applications, including "Inbox - Microsoft Out...", "replace1.doc - Micro...", and "SAS - [Log - (Untitled)]". The system clock shows 12:31 PM.

The variable WRWT99 was not found in the dataset. Type **Pgm** on the Command line to return to the Program Editor. Type **Recall** on the Command line and the program statements will reappear in the window.

You can correct the error by entering the correct variable name, WRWT into the program and rerunning the procedure.

The corrected program produces the following output.

SAS - [Output - (Untitled)]

### Using Formats

The format library is the key to interpreting values of discrete variables. For example, in the program above, the format library found at C:\FILES\DOD\DATA\_2002\FMTLIB indicates that a Value of 1 for SEXSMPL means male, and a value of 2 for SEXSMPL means female. Similarly, if BGCSMPL equals 2, the respondent is a family member of active duty personnel; if BGCSMPL equals 3, the respondent is an under-65 retiree or a survivor or one of their family members.

Since formats are associated with the variables in the HCSDB, formatting is automatic as long as SAS can locate the format library. Error messages will result if the LIBNAME LIBRARY statement is not present. If the format library is not available for some reason, use the statement

**FORMAT \_ALL\_;**

within the PROC TABULATE to prevent SAS from searching for the missing format library. The default formats in the format library were used to produce the table described in the previous section.

### Table Appearance

Format modifiers and temporary labels improve the appearance of a table. In Table III.1, the values of the statistics are of the form x.xx. If each cell is defined to be six positions wide with two positions to the right of the decimal, there is adequate space plus some extra room to keep the table from looking crowded. This is done by crossing the statistic with the format modifier:

**MEAN\*F=6.2**

Labels are attached to all variables in the HCSDB. You can use temporary labels to override the label within the SAS dataset. It is not always necessary to use both the variable label and the formatted values for each value of a class variable. In the previous example, the formatted values of BGCSMPL are active duty, family members of active duty, etc. which we know to be beneficiary groups; the title also tells you that these are beneficiary groups. The table can be made attractive by deleting the heading for BGCSMPL by including a blank for the temporary label:

**BGCSMPL=' '**

Similarly, because the statistic being reported here is a mean, you do not need MEAN on each row. You can add or eliminate a label and include a format modifier to the same variable:

**MEAN=' \*F=6.2**

The headings for SEX and ALL can be improved:

**SEXSMPL='Gender'**  
**ALL='Group Total' for the ALL that is crossed with BGCSMPL**  
**ALL='Total' for the Region 3 total**

The new program looks like this:

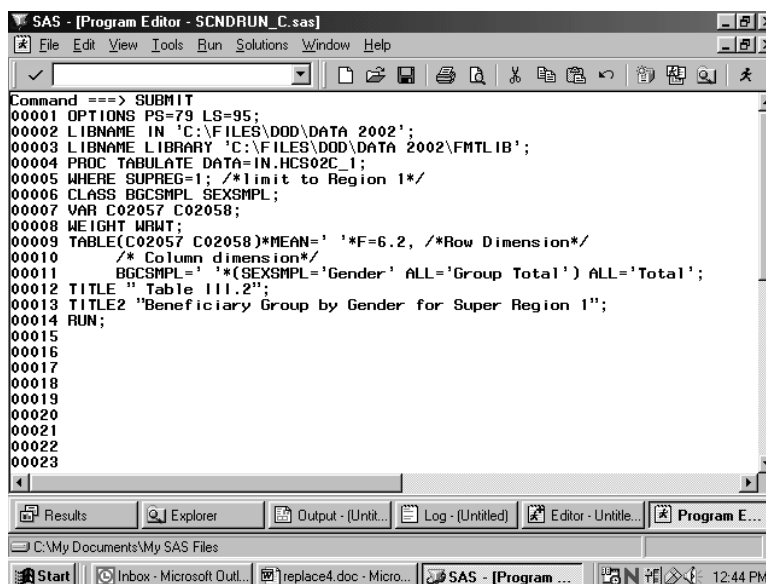

```

OPTIONS PS=79 LS=95;
LIBNAME IN 'C:\FILES\DOD\DATA_2002';
LIBNAME LIBRARY 'C:\FILES\DOD\DATA_2002\FMTLIB';
PROC TABULATE DATA=IN.HCS02C_1;
WHERE SUPREG = 1; /* limit to Region 1 */
CLASS BGCSMPL SEXSMPL;
VAR C02057 C02058;
WEIGHT WRWT;
TABLE (C02057 C02058)*MEAN=' *F=6.2, /* Row Dimension */
/* Column Dimension */
BGCSMPL=' *(SEXSMPL='Gender' ALL='Group Total')
ALL='Total';

TITLE "Table III.2";
TITLE2 'Beneficiary Group by Gender for SUPER REGION 1';
RUN;

```

Typing these statements into the Program Window produces the following screen.

After the **Submit** command is entered, the following table is displayed in the Output window.

SAS - [Output - (Untitled)]

Table III.2 12:08 Tuesday, Dec 3, 2002  
Beneficiary Group by Gender for Super Region 1

		Active Duty		Family of Active			Ret/Surv/Fam		
		Gender		Gender		Group Total	Gender		Group Total
		Male	Group Total	Male	Female		Male	Female	
Rating of experience with child health plan		7.25	7.25	7.06	7.05	7.05	7.29	7.24	
TRICARE Prime: Hard to get Health care s		3.00	3.00	2.71	2.81	2.76	2.93	2.95	

Results Explorer Output - (U... Log - (Untitled) Editor - Untitle... Program Edito...

C:\My Documents\My SAS Files

Start | Inbox - Microsoft Outl... replace4.doc - Micro... SAS - [Output - [...]

12:45 PM

The resulting output is in Table III.2.

Table III.2  
Beneficiary Group by Gender for Super Region 1

		Active Duty		Family of Active			Ret/Surv/Fam <65			Total
		Gender		Gender			Gender			
		Male	Group Total	Male	Female	Group Total	Male	Female	Group Total	
Rating of experience with child hlth plan		7.25	7.25	7.06	7.05	7.05	7.29	7.24	7.27	7.13
TRICARE Prime: Hard to get Health care s		3.00	3.00	2.71	2.81	2.76	2.93	2.95	2.94	2.82

Although the label for MEAN is deleted, there is still a space in the table for this label. You can eliminate this blank space by using the TABLE option of ROW=FLOAT. SAS row headings are automatically allocated; you can override this by using the TABLE option of RTS=n where n is an integer value specifying the number of print positions to be used for row headings. If you decide that we don't need the label 'Gender' for SEXSMPL because 'male' and 'female' are self-explanatory, the revised program is as follows:

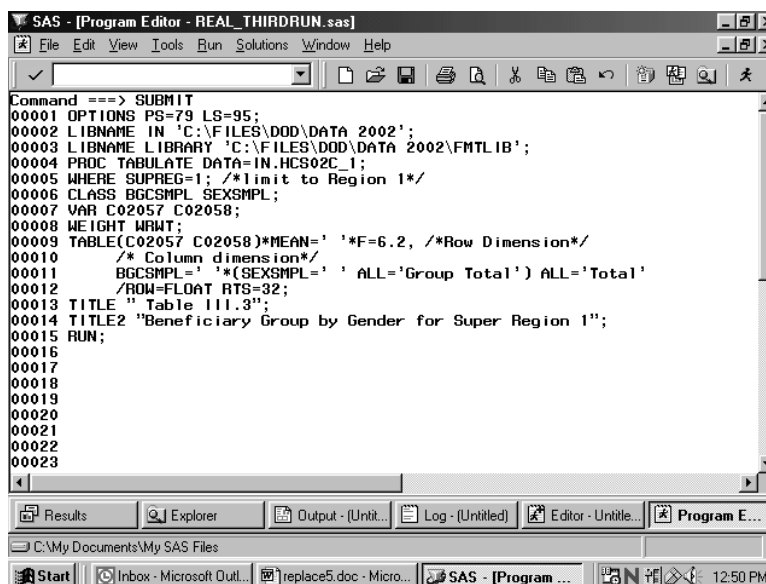

```

OPTIONS PS=79 LS=95;
LIBNAME IN 'C:\FILES\DOD\DATA_2002';
LIBNAME LIBRARY 'C:\FILES\DOD\DATA_2002\FMTLIB';
PROC TABULATE DATA=IN.HCS02C_1;
WHERE SUPREG = 1; /* limit to Region 1 */
CLASS BGCSMPL SEXSMPL;
VAR C02057 C02058;
WEIGHT WRWT;
TABLE (C02057 C02058)*MEAN=' *F=6.2, /* Row Dimension */
/* Column Dimension */
BGCSMPL=' *(SEXSMPL=' ' ALL='Group Total')
ALL='Total' / ROW=FLOAT RTS=32;
Title "Table III.3";

TITLE2' Beneficiary Group by Gender for SUPER REGION 1';
RUN;

```

Typed into the Program Window, the revised program appears as follows.

```

SAS - [Program Editor - REAL_THIRDRUN.sas]
File Edit View Tools Run Solutions Window Help
Command ==> SUBMIT

	Total
Rating of experience with child health plan	7.13
TRICARE Prime: Hard to get Health care s	2.82

### Calculating Percents

When calculating percentages, it is necessary to appropriately define the denominator. To calculate a column percentage, the denominator definition must include all *class* variables that define the *row*. For example, if you want to look at the percentage of people in your region and each of the catchment areas who answered yes (or no) to question 15, 'In the last 12 months, did your child see a specialist?', your TABLE statement in the TABULATE procedure would look like this:

**WHERE SUPREG = 2;**

**TABLE C02015 ALL='Total',**

**(All='Region Total' REGSMPL)\*PCTN<C02015 ALL>='Percent';**

Table III.4 includes a program and its output for calculating column percentages.

The program statements in the Program Editor appear as follows.

```

SAS - [Program Editor - FRTHRUN.sas]
File Edit View Tools Run Solutions Window Help

Command ==> SUBMIT
00001 OPTIONS PS=79 LS=95;
00002 LIBNAME IN 'C:\FILES\DOD\DATA 2002';
00003 LIBNAME LIBRARY 'C:\FILES\DOD\DATA 2002\FMTLIB';
00004 PROC TABULATE DATA=IN.HCS02C_1;
00005 WHERE SUPREG=2; /*limit to Region 2*/
00006 CLASS C02015 REGSMPL;
00007 WEIGHT WRWT;
00008 TABLE C02015 ALL='Total',
00009      (All='Region Total' REGSMPL= ' ')*(N=' '*F=5.0
00010      PCTN<C02015 ALL>='% '*F=5.2)
00011      /RTS=25;
00012 TITLE 'Table III.4';
00013 TITLE2 'People Who Saw a Specialist in the Last 12 Months';
00014 TITLE3 'for Super Region 2 Regions';
00015 RUN;
00016
00017
00018
00019
00020
00021
00022
00023

```

The submitted statements produce the following output.

Table III.4 12:08 Tuesday, Dec 3, 2002  
People Who Saw a Specialist in the Last 12 Months  
for Super Region 2 Regions

	Region Total		Southwest		Southern California		Golden Gate		No
	#	%	#	%	#	%	#	%	
In last 12 mos did child see specialist									
Yes	792	78.18	356	80.00	185	75.82	65	78.31	1
No	221	21.82	89	20.00	59	24.18	18	21.69	1
Total	1013	100.0	445	100.0	244	100.0	83	100.0	1

(Continued)

Table III.4  
Children Who Saw a Specialist in the Last 12 Months  
for Super Region 2 Regions

	Region Total		Southwest		Southern California		Golden Gate		Northwest	
	#	%	#	%	#	%	#	%	#	%
In last 12 mos did child see specialist										
Yes	792	78.18	356	80.00	185	75.82	65	78.31	107	75.35
No	221	21.82	89	20.00	59	24.18	18	21.69	35	24.65
Total	1013	100.00	445	100.00	244	100.00	83	100.00	142	100.00

(CONTINUED)

	Hawaii		Alaska	
	#	%	#	%
In last 12 mos did child see specialist				
Yes	51	77.27	28	84.85
No	15	22.73	5	15.15
Total	66	100.00	33	100.00

The statistic N is included with PCTN to make it easier to verify that the denominator definitions have been set up properly. After you check to see that the percentages are accurate, the N statistic can be removed. Note that the output for Table III.4 is unweighted. The N statistic (and PCTN statistic) is always unweighted even if a WEIGHT statement is included.

Similarly, if you want to look at the percentage of TRICARE enrollees (and non-enrollees) by gender who answered yes to question 15, this would be a row percentage. To calculate a row percentage, the denominator definition must include all *class* variables that define the *column*. Your TABLE statement would look like this:

```
TABLE C02015 ALL='Total',  
XENRLLMT*(SEXSMPL=' ' ALL='Group Total')*  
PCTN<XENRLLMT*SEXSMPL XENRLLMT*ALL>='Percent';
```

Notice that there are no parentheses used in the denominator definition. Because parenthetical groupings are not allowed in the denominator definition, all crossings and concatenations must be included. As noted above, the N and PCTN statistic are unweighted counts of CLASS variables. If you want to produce a weighted count and percentage for this table, you would include WRWT (the 2002 eight variable) as an analysis variable in the VAR statement and in the column crossing of the TABLE statement; the statistics to be generated should be specified as SUM and PCTSUM. A program and output to demonstrate weighted row percentages appears in Table III.5.

The following screen shows the new program typed into the Program Editor.

```

## How to Make a Table Using SPSS

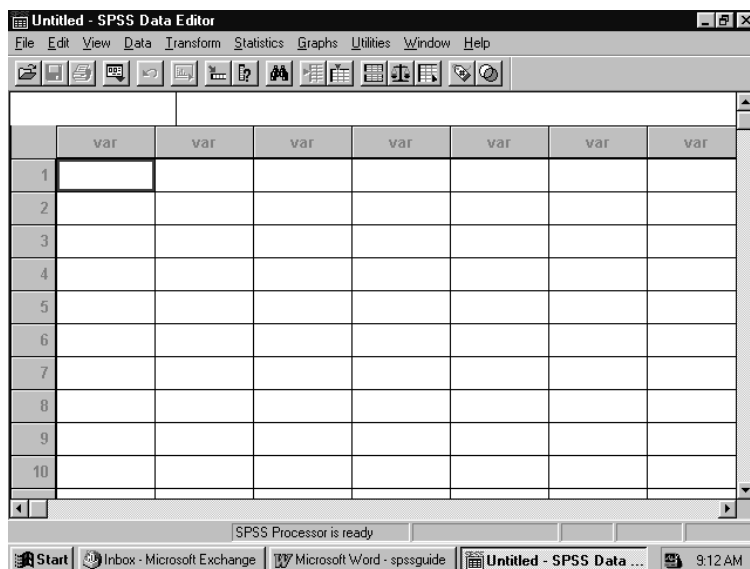

The 2002Child HCSDB dataset is in an SPSS format. SPSS is a computer software system used for data management, summarization, and analysis. SPSS can be run interactively, using menus, or in batch mode, using syntax commands. This guide instructs users on how to use SPSS dialog boxes to:

- Construct new variables
- Recode existing variables
- Select cases for analysis
- Weight cases for analysis
- Create customized tables

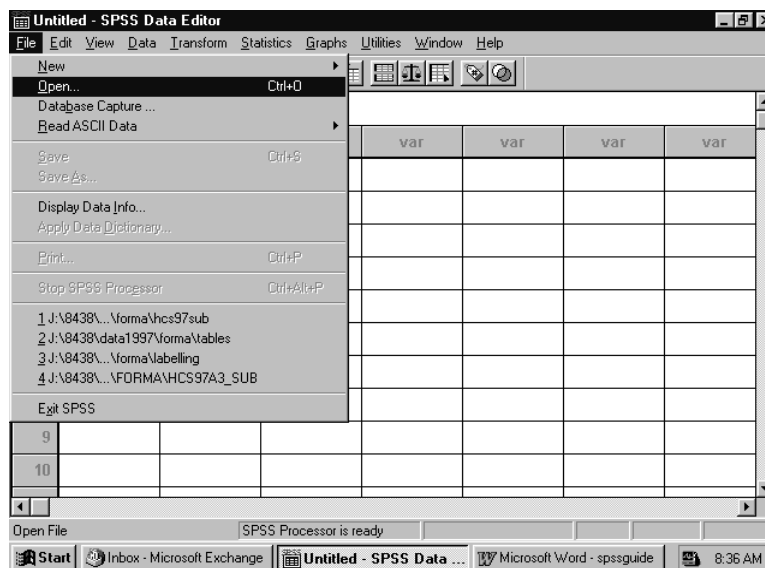

As you use the dialog boxes, you generate syntax automatically. This syntax may be pasted into a syntax file for future use or for modification.

### Locating and opening the data file

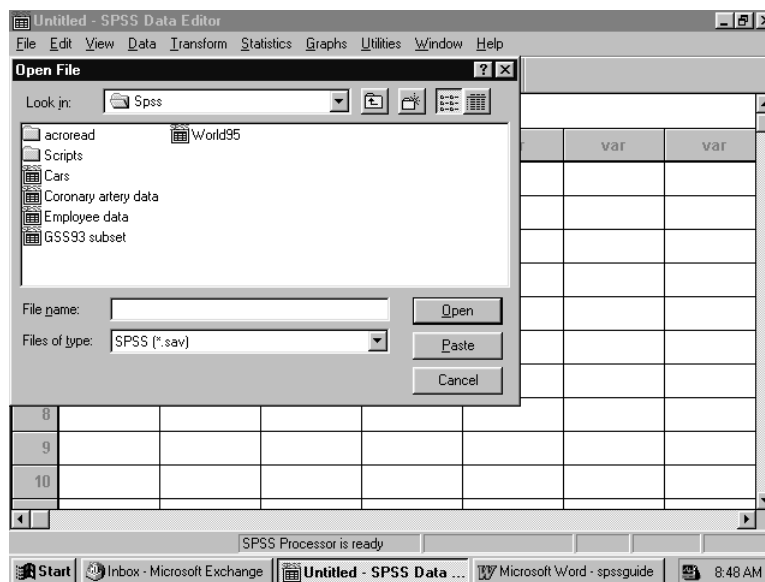

To begin an SPSS session, double click on the SPSS icon on your desktop. The Data Editor window will open and present a blank spreadsheet like the following screen:

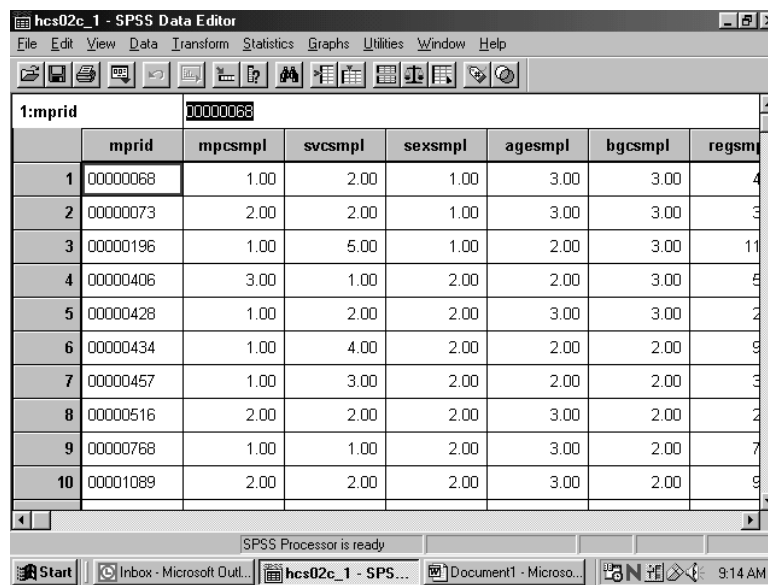

Click on **File** in the upper left corner to open the following menu:

Select the **Open** option or choose a file from the list displayed. **Open** produces the following screen:

If the file is not in this directory, navigate through your folders until you locate it. Mark the file and click **Open**. You will be returned to the spreadsheet Data Editor with the file on view. The 2002 Child HCSDB dataset has been opened and is displayed below.

	mprid	mpcsmpl	svcsmpl	sexsmpl	agesmpl	bgcsmpl	regsmpl
1	00000068	1.00	2.00	1.00	3.00	3.00	4
2	00000073	2.00	2.00	1.00	3.00	3.00	3
3	00000196	1.00	5.00	1.00	2.00	3.00	11
4	00000406	3.00	1.00	2.00	2.00	3.00	5
5	00000428	1.00	2.00	2.00	3.00	3.00	2
6	00000434	1.00	4.00	2.00	2.00	2.00	9
7	00000457	1.00	3.00	2.00	2.00	2.00	3
8	00000516	2.00	2.00	2.00	3.00	2.00	2
9	00000768	1.00	1.00	2.00	3.00	2.00	7
10	00001089	2.00	2.00	2.00	3.00	2.00	9

### Constructing new variables

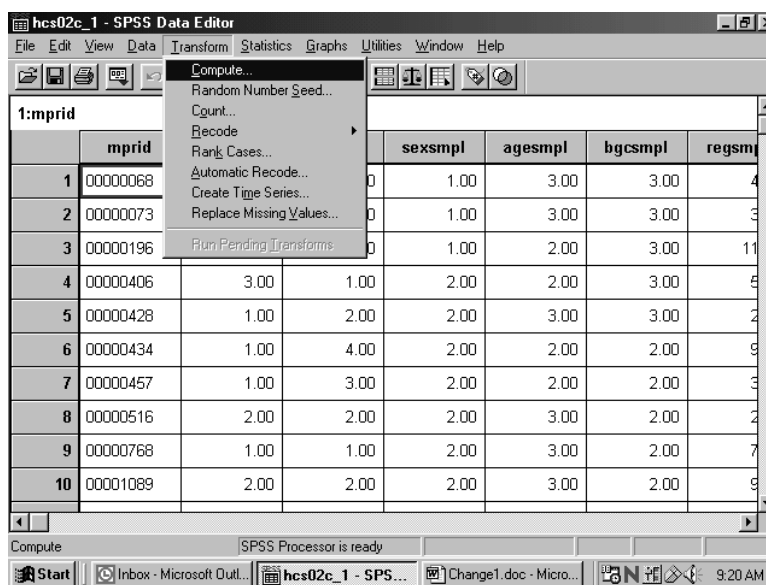

Data can be evaluated from many different aspects. It is sometimes useful to build new variables from combinations of the existing ones and to examine their distributions.

For example, the variable in the file for beneficiary group at the time of sampling is called **BGCSMPL**, and the variable for sex is **SEXSMPL**. The value **1** for **BGCSMPL** indicates that the sponsor is on active duty. The relationships for constructing a new variable for family of active duty by sex are:

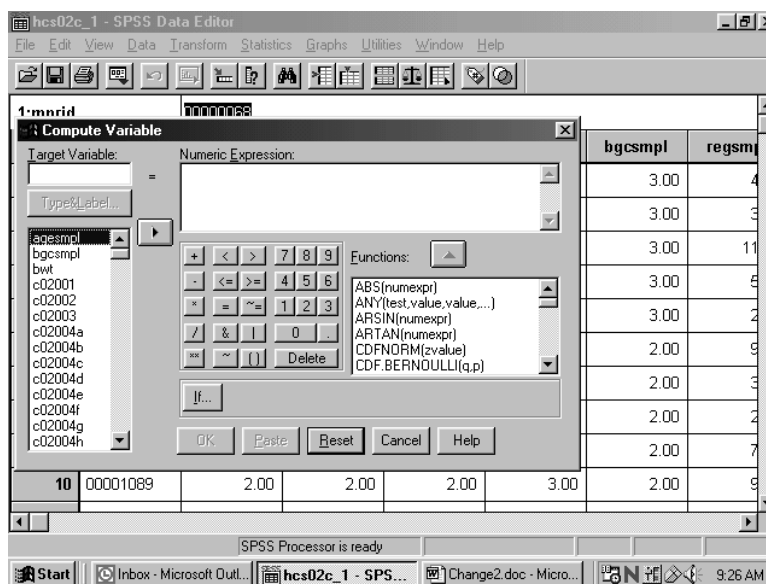

Family of active-duty-males: **SEXSMPL=1 and BGCSMPL=1**

Family of active-duty-females: **SEXSMPL=2 and BGCSMPL=1**

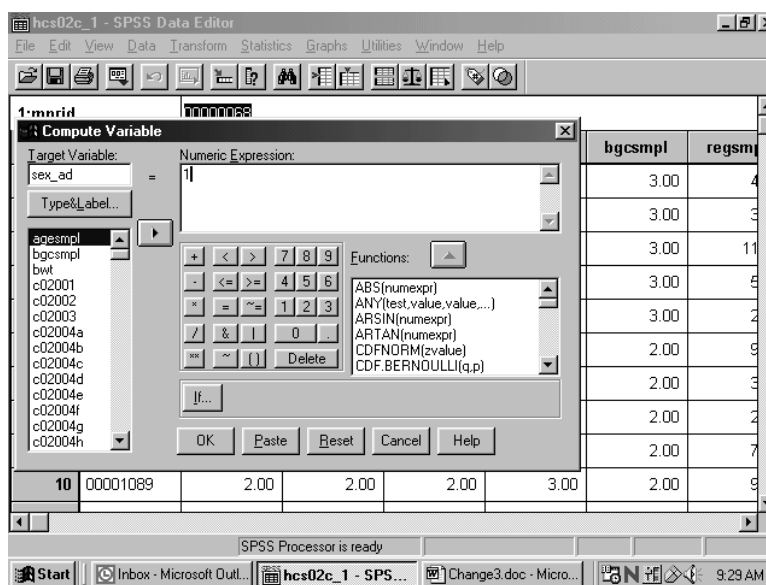

Open the **Transform** menu and select **Compute** as in the following:

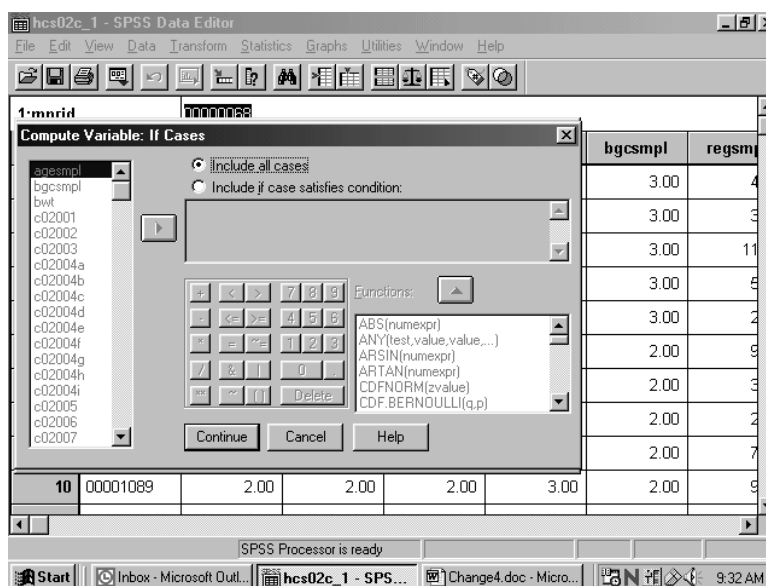

The following dialog box will open:

You can build the new variable in two steps to express the two conditions. The first task is to give the new variable a name and its first value. Enter the **Target Variable** slot and name the new variable **sex\_ad**. Next, assign the value **1** to **sex\_ad** by entering it into the slot for **Numeric Expression**. Your screen should look like the following:

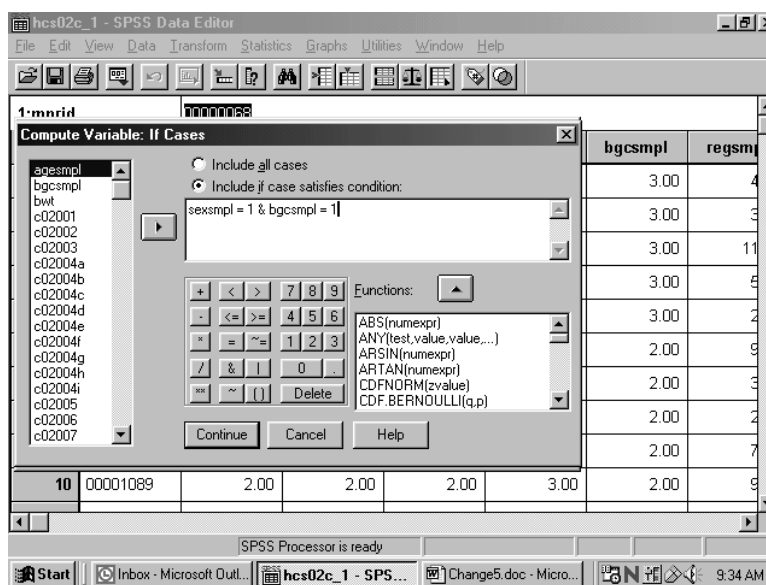

Once you we have assigned the value **1** to **sex\_ad**, you can build the condition that qualifies the assignment. Click on **If..** and open the following dialog box:

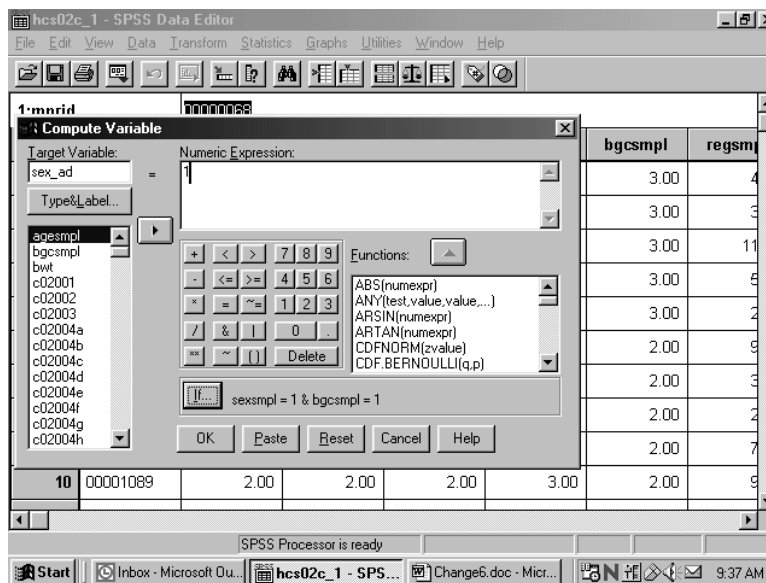

Click on the circle indicating **Include if case satisfies condition**, and the black dot will move to that circle. The slot underneath will open, ready for your input. Build the "if" condition. Write it directly into the slot or move the elements into the slot from the given options. Add the elements **SEXSMPL=1 & BGCSMPL = 1**.

The screen should resemble the following:

Click on **Continue** and return to the previous screen, which will now look like this:

Your condition will be written next to the **If** button. Click on **OK** to exit the dialog box, and the variable **sex\_ad** will be created with its value set to 1.

The next step is to build the second condition for the new variable, which will set it to the value 2. Reopen the **Compute** dialog box. The commands you just gave still appear in the dialog box. Simply assign the value 2 to **sex\_ad**, press **If**, and enter '2' for the value of **sexsmpl**. Click **Continue**, and finish with **OK**. The condition, **sexsmpl = 2 and bgcsmpl = 1**, will be added to the new variable **sex\_ad**.

Once you have created a new variable, you may want to add it permanently to the dataset. The new variable is computed for each case in the file and added to the view in the Data Window after the last variable in the dataset. The variable name is the column heading.

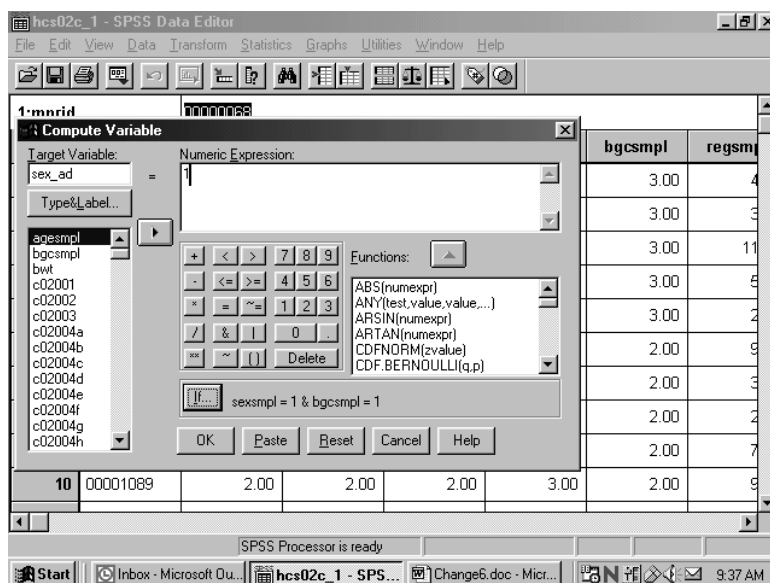

Since the HCSDB data set carries Read-Only status to protect it from corruption, changes to it cannot be saved. At the end of the day, when the work session ends and you exit SPSS, the file will revert to its former status and the new variables will be lost. The solution is to save the dataset under a new name when you exit. Choose the **Save As** option on the **File** menu, and you will be prompted to name the file and to save it in a folder of your choosing. Give the file a new name and save it. Open the new expanded file anytime for processing.

Suppose you do not want to use up your disk space for expanded copies of the dataset. Another option is to save the **syntax** you have generated in a file that can be run as it is needed. Syntax is a written instruction generated by the commands you give in a dialog box. These “sentences” can be saved in a file and executed when needed. This is the **batch mode** of processing syntax commands. Syntax files take up very little space.

Experienced SPSS programmers, who have mastered SPSS syntax, often prefer to work only in batch mode. This option is available to users who have not mastered the syntax language. You can **paste** the commands, generated interactively in the dialog box, onto a syntax file.

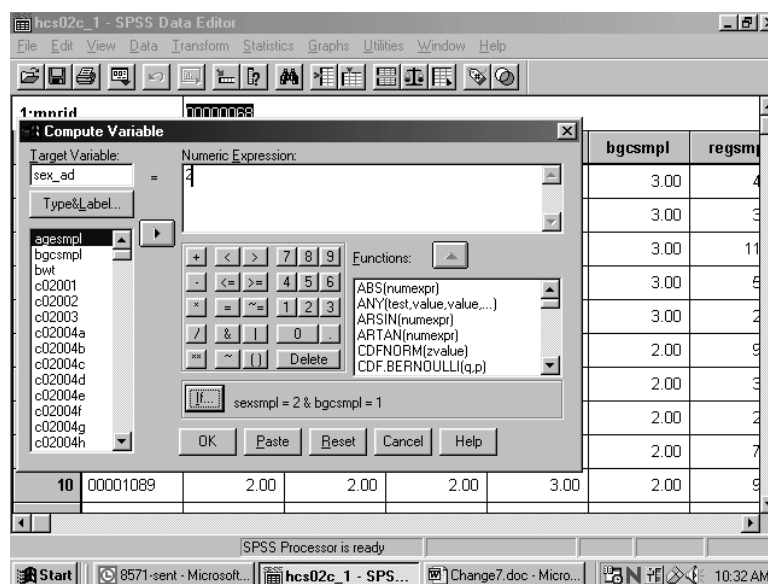

Recall the compute example for the new variable **sex\_ad**. The screen below is the result of assigning **1** to **sex\_ad** according to an **If** condition. You clicked on **OK** to set the value. Returning to the screen and clicking on **Paste** writes the command to a syntax file.

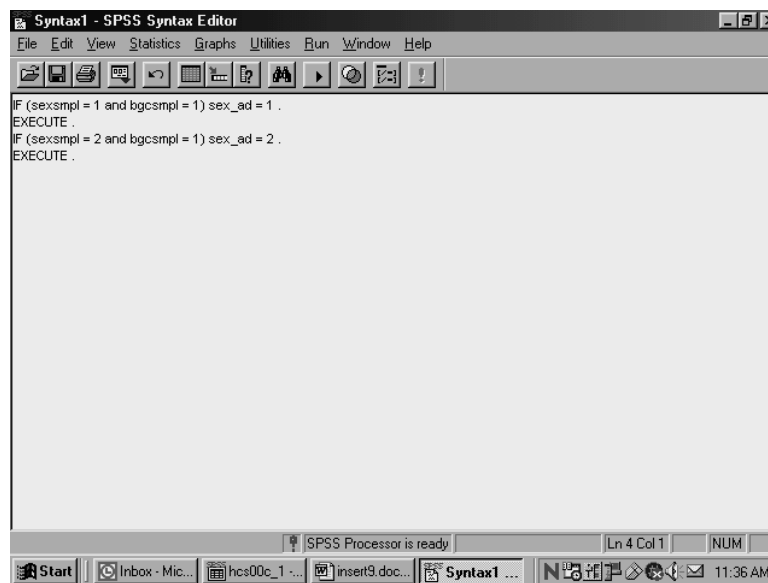

Click on the **Paste** button, and the syntax window below will open with the syntax written in it.

Now return to the compute dialog box.

Assign the value **2** to **sex\_ad** as in the diagram above. Select **Paste**, and these commands will be appended to the syntax file.

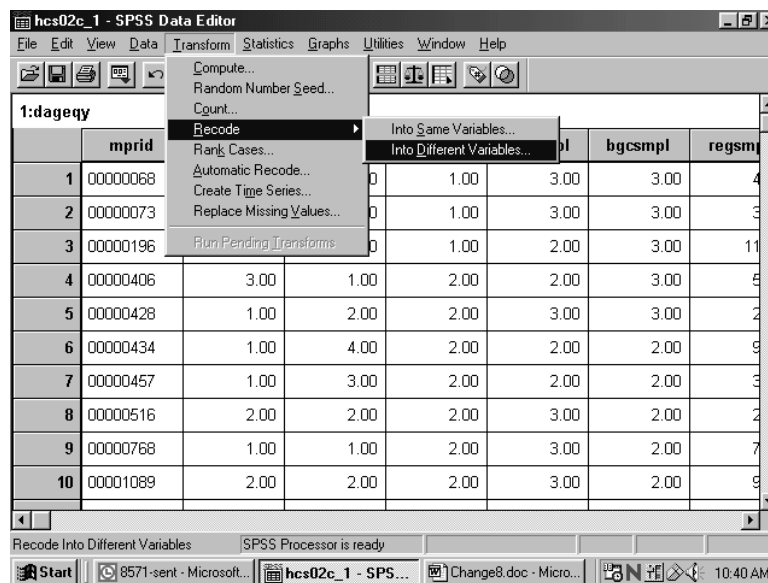

The results appear in the screen above. SPSS gives default names to syntax files, such as Syntax1, Syntax2, etc., as they are created. It is a good idea to save the syntax, re-naming the file using the **Save As** option on the **File** menu. Use a name that has some meaning to you, e.g., **New\_computes**. The file will automatically receive the suffix **.sps**.

Another option for adding new variables to the dataset is to **Recode** existing variables **into** new variables. A common example involves **grouping** an age variable into age categories as shown below, using the variable **DAGEQY**, which exists on our dataset. **DAGEQY** is coded in years from 0 to 17, which can be grouped into three age categories:

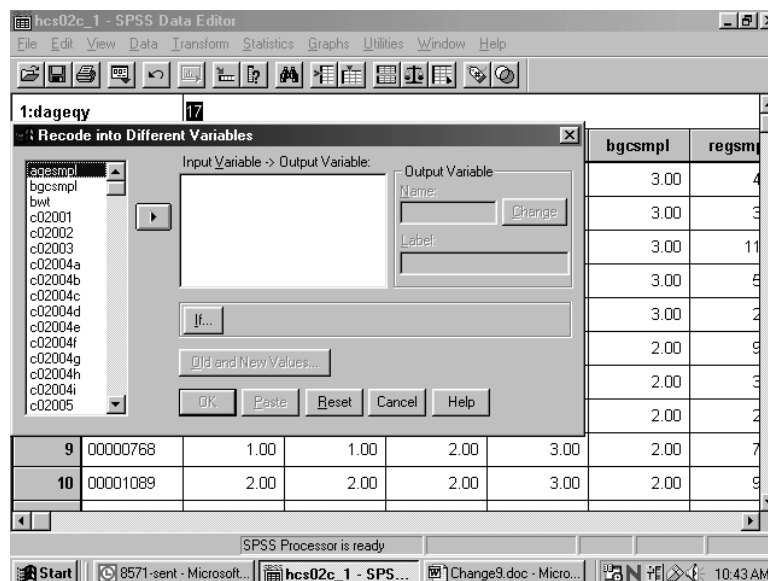

- 0 to 5 = 1 – label: “5 years or less”
- 6 to 12 = 2 – label: “6 to 12 years”
- 13 to 17 = 3 – label: “13 + years”

The new variable is called age\_grp.

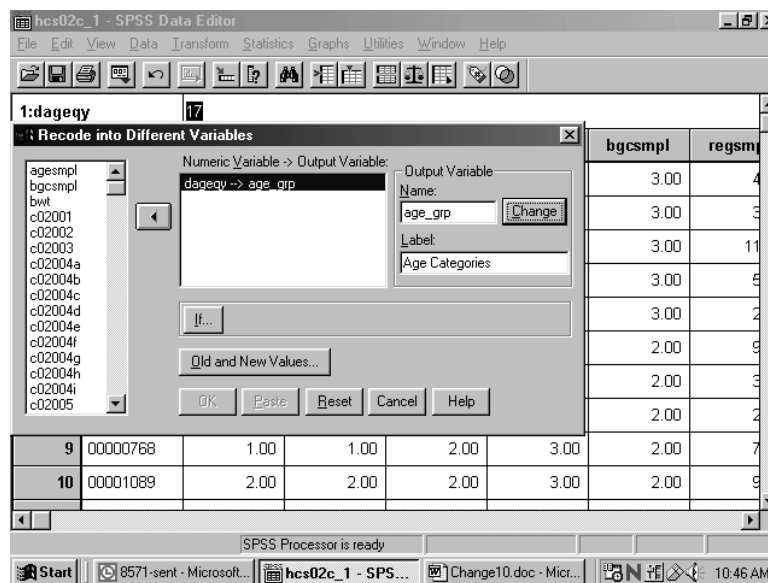

From the Transform menu, choose Recode and Into Different Variables as pictured below:

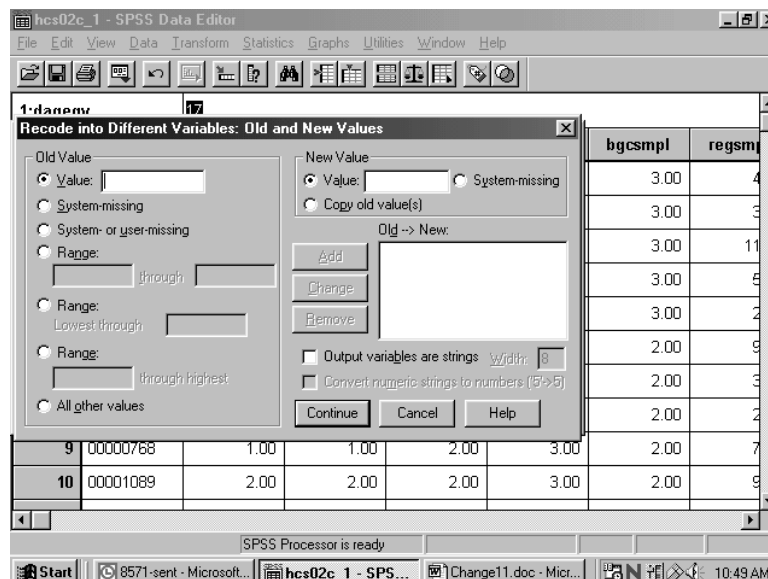

The following dialog box will open:

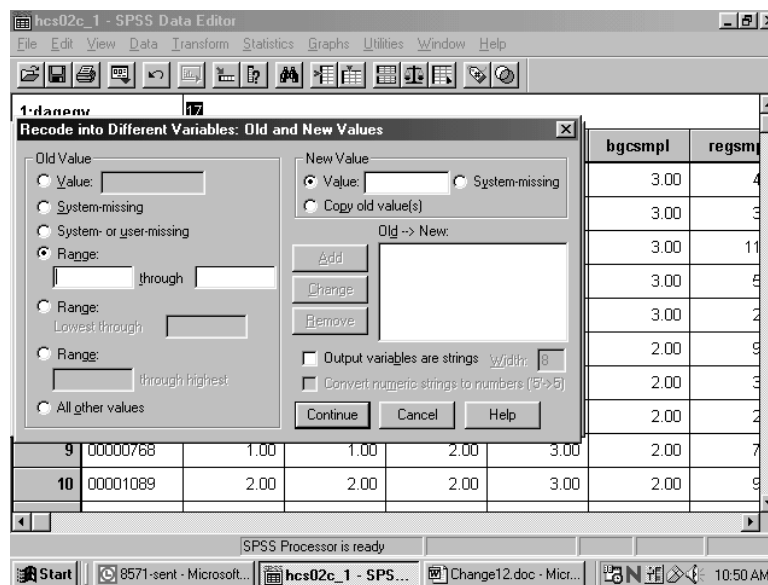

Move **DAGEQY** from the variable list on the left to the box labeled **Input Variable -> Output Variable**. In the **Name** slot, enter the new variable name **age\_grp**. Enter **Age Categories**, the variable label, in the **Label** slot. Click on **Change**. The dialog box should look like the one below.

Click on **Old and New Values**, and the following dialog box will open:

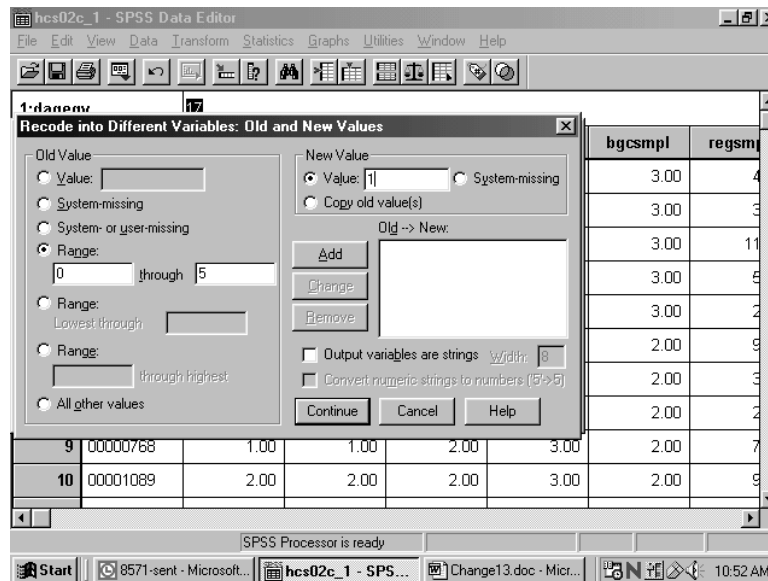

The next step in grouping the age variable is to specify the existing values of **DAGEQY** to be recoded. To do this, click on the **Range** circle under **Old Value**.

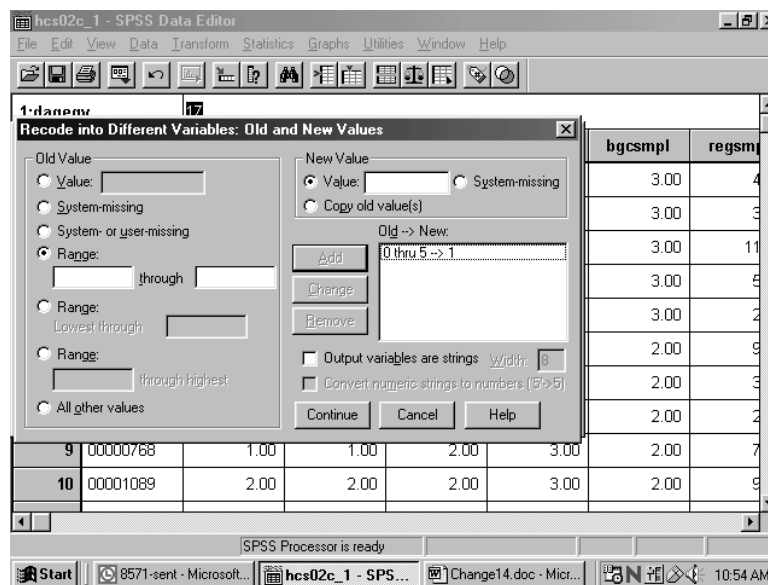

Once the appropriate slots are open, you have four ranges to enter.

First, enter 0 **through** 5 in the slots provided under **Range**. Next, enter the value 1 in the **Value** slot under **New Value**. **Add** is now illuminated.

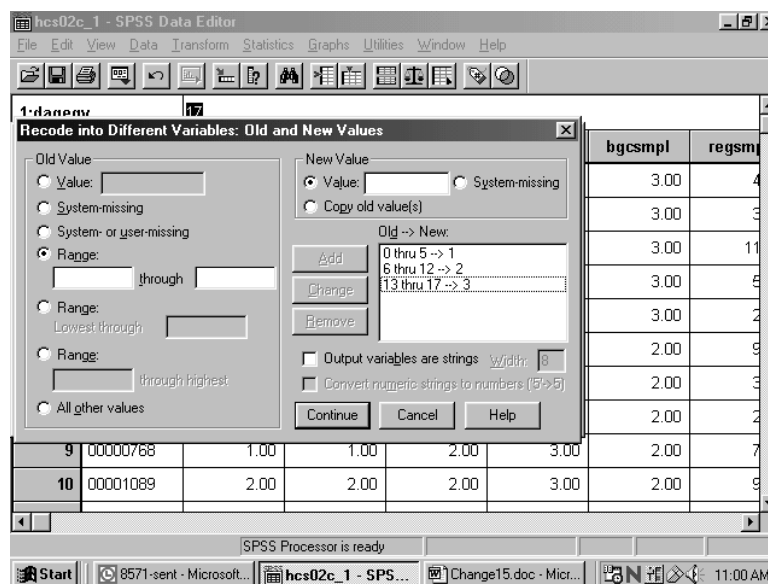

Clicking on **Add** produces the following result:

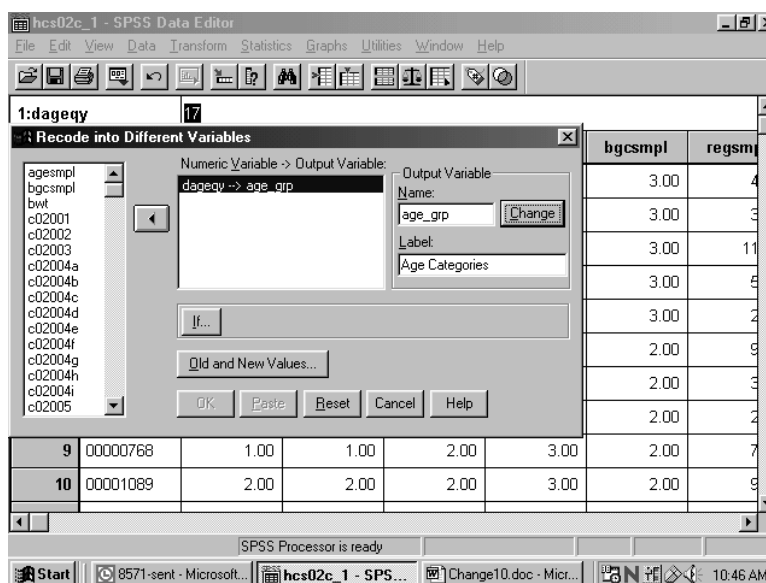

The specified range appears in the box labeled **Old → New**, and the **Range** and **Value** slots have been cleared to permit additional entries.

The three remaining ranges are built in the same manner, adding each specification, until the dialog box looks like the one below.

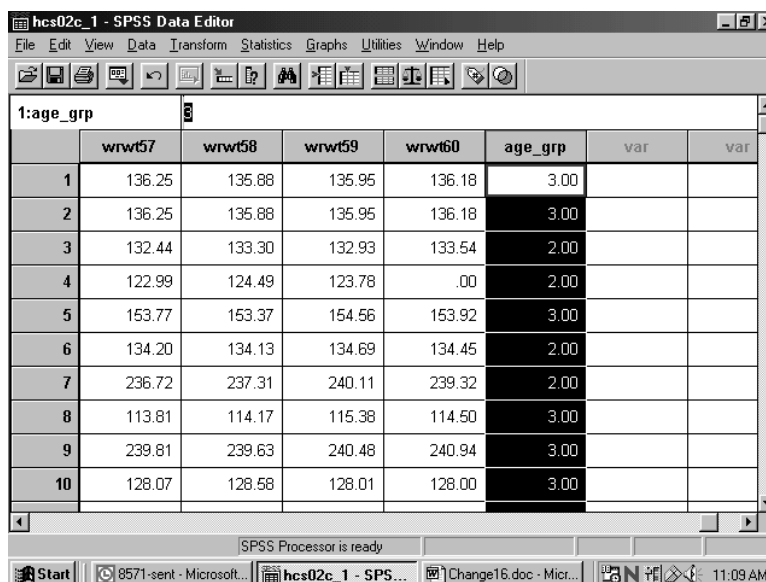

Click on **Continue** and return to the previous screen.

Click on **OK** to exit the screen. The new variable **age\_grp** has been created. The **Recode** syntax can be pasted to a syntax file.

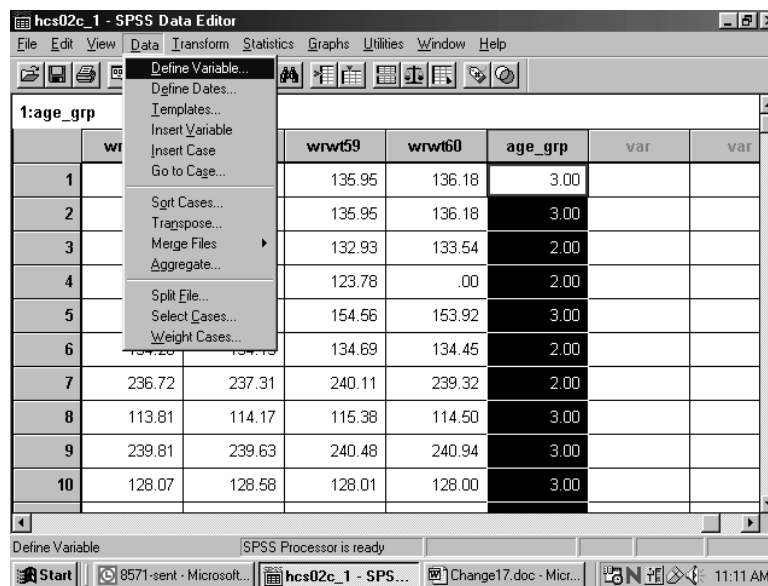

The final task is to create the value labels for the new variable **age\_grp**. Labeling variables makes output from statistical reporting procedures much clearer and more elegant.

In the **Data Window**, go to the column for the new variable **age\_grp** and click in the gray area containing the variable name. The entire column will darken indicating that it has been selected.

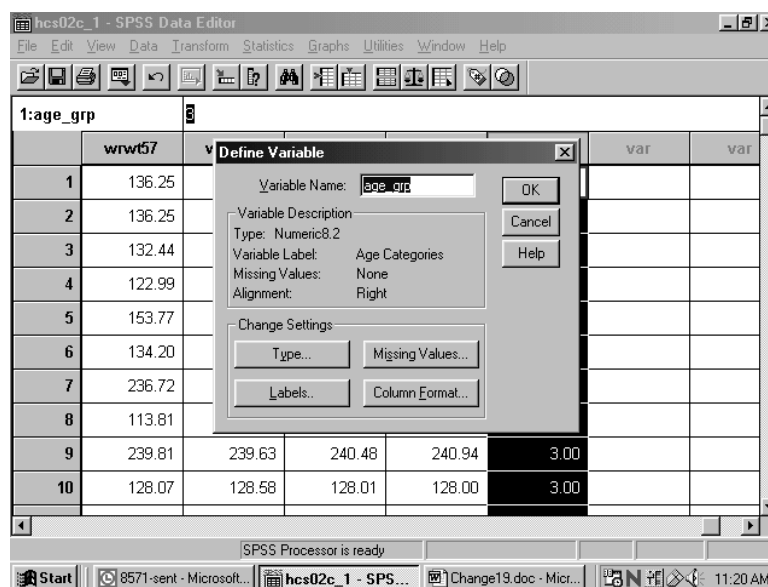

Click on the **Data** menu at the top of the screen to open the following dialog box.

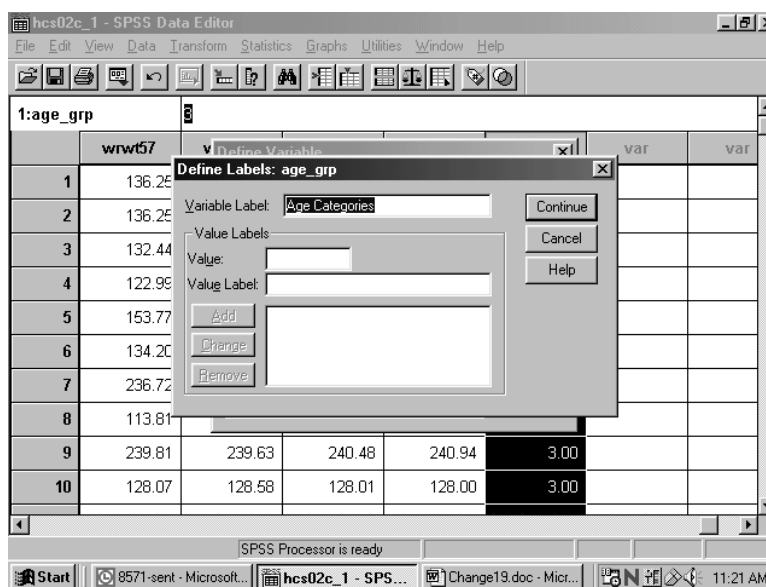

Click on **Define Variable** to get to the following dialog box:

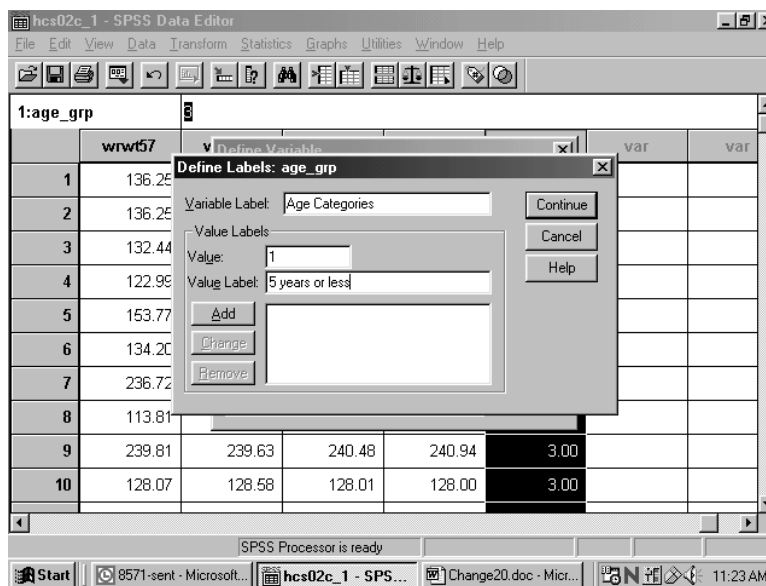

The characteristics of **age\_grp** are displayed in this dialog box. Information about the variable type, its label, and its missing values appears here. Click on **Labels** to get to the following screen:

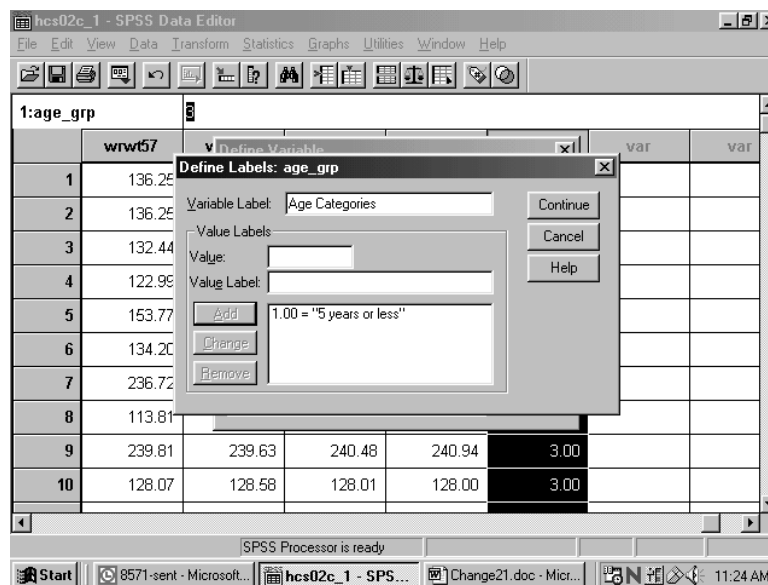

In the slot marked **Variable Label** is the label **Age Categories**, which was specified during the **Recode** process. If there is no label for the variable, enter one in this slot.

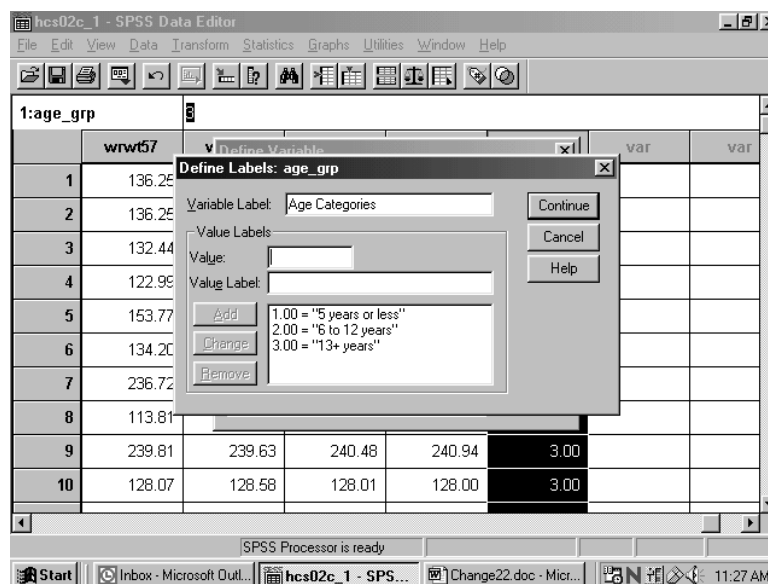

You can then begin to label the *values* of **age\_grp**. Enter **1** in the slot marked **Value**, and enter the label **five years or less** in the slot marked Value Label. The screen will look like the following:

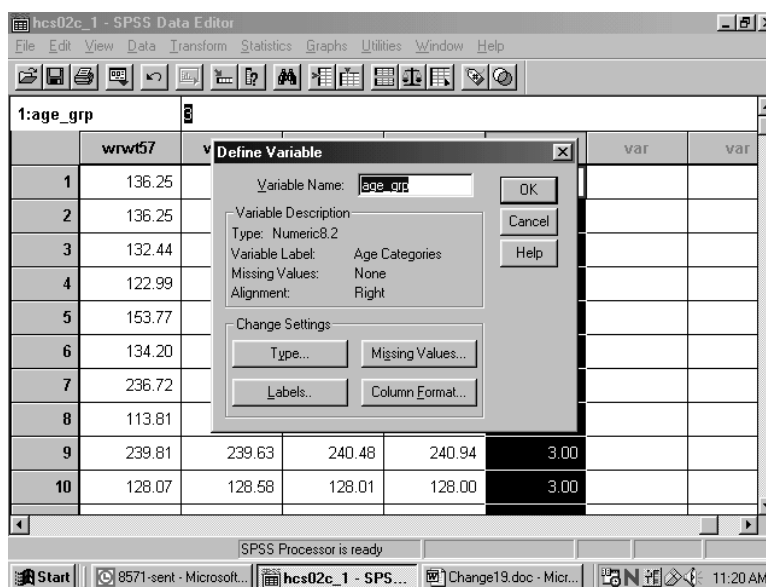

**Add** is now illuminated. Click on **Add** and the text of your command will appear in the central box, clearing the slots for further entries, as in the next screen.

Build the other two labels until the screen looks like the following:

Click continue, and return to the first screen.

Click on **OK** to exit. The labels have been added.

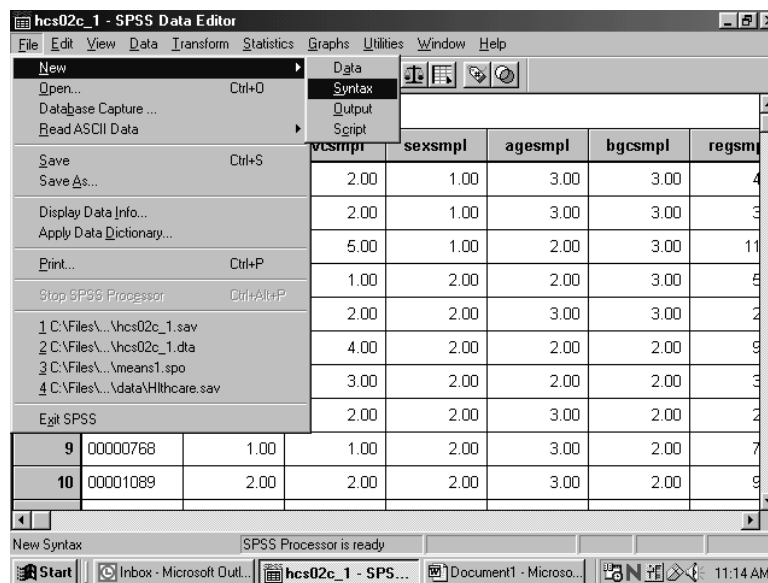

### Limiting the Number of Variables

The HCSDb dataset contains many variables. To speed up software performance time, it may be desirable to limit the number of variables for analysis. There are ways to do this.

The first is to **Save** a subset of variables in a new file with a new name. This option is available only through syntax. The **Keep** or **Drop** command lets you save a subset of variables. The choice of **Keep** or **Drop** is dependent on which list is shorter to write.

For example, suppose you want to run some procedures to evaluate the rating of health care as it relates to the beneficiaries' state of health. You are also interested in the differences between military and civilian services, and in differences within these groupings by gender. Moreover, you want to look at regional differences and differences among catchment areas. You can do all the work on a subset of only eight variables, saving them in a separate file.

To write the syntax, open a syntax window. If you want to create a new syntax file, choose **New, Syntax** on the **File** menu as in the following:

A blank syntax window will open.

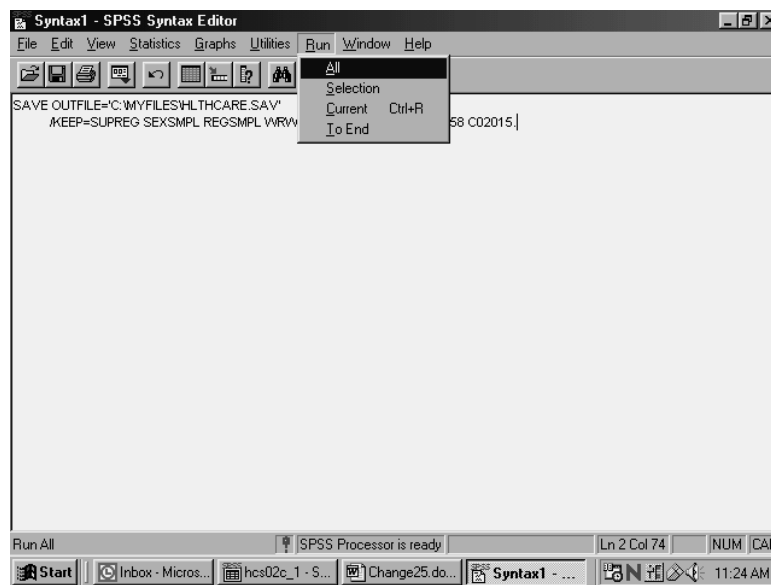

Write the following command, substituting the file name and directory specification:

**SAVE OUTFILE='C:\MYFILES\HLTHCARE.SAV'/KEEP=SUPREG SEXSMPL REGSMPL WRWT BGCSMPL C02057 C02058 C02015.** as in the following:

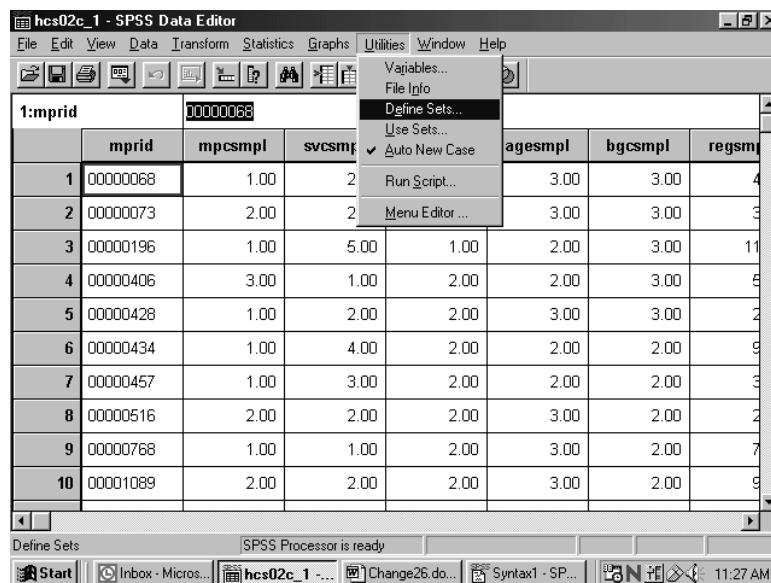

Upper case is optional. Be sure to enclose the entire file name in single quotes and to type a period at the end of the command.

Run the command by choosing the **Run** menu and selecting **All** from the choices.

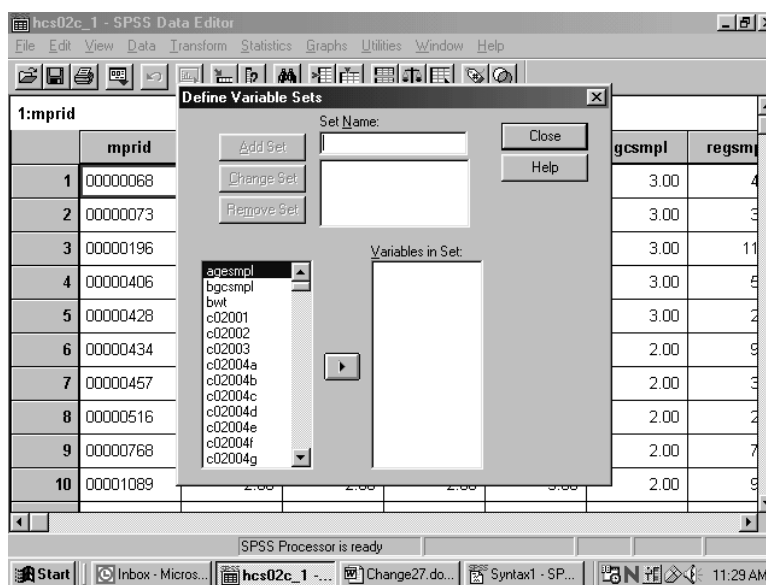

Open the new file according to the specifications at the beginning of this chapter.

The second way to limit the number of variables for analysis is to define a subset of *variables* that will appear in the dialog boxes for procedures. Using the **Utility** menu, define a subset of variables as in the following:

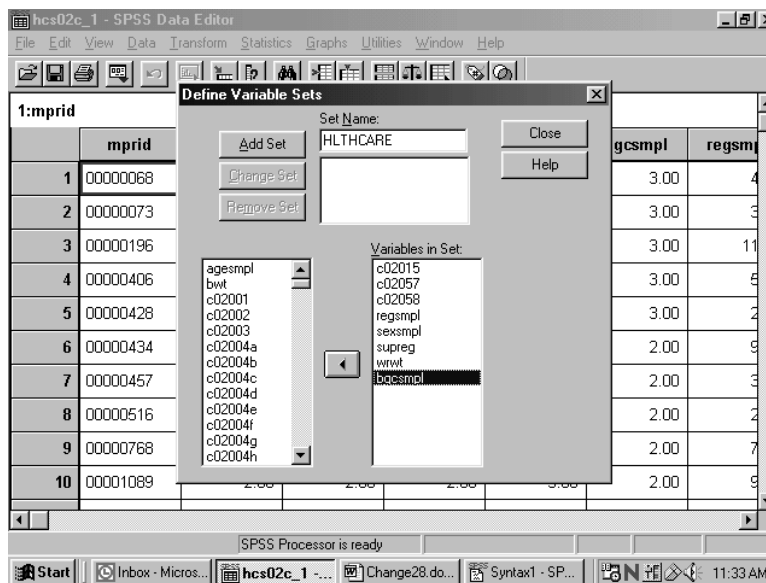

Select **Define Sets**.

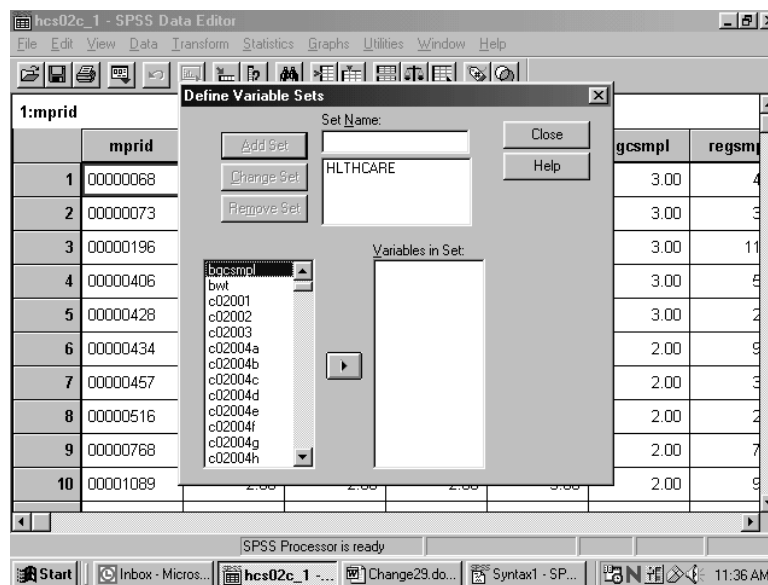

Insert a name for the subset of variables in the slot labeled **Set Name**. Move the variables you want to subset from the list on the left to the slot marked **Variables in Set**. By way of illustration, we will move the eight variables selected for the day's processing.

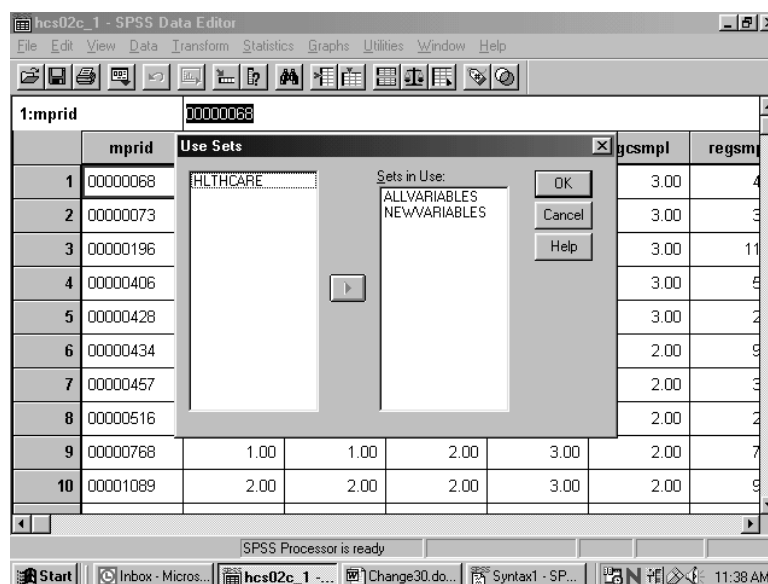

The screen should look like the following:

Click on **Add Set** to save the set specifications. The screen will change to the following:

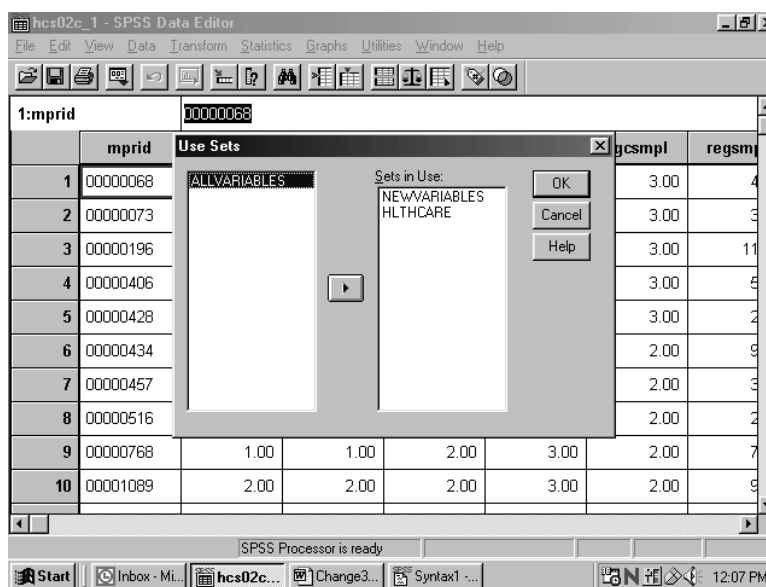

The set is now available for use. To use the set, **Close** the dialog box, reopen the **Utilities** menu, choose **Use Sets...**, and receive this screen:

Move HLTHCARE from the left slot to the right slot, which is labeled **Sets in Use**. Transfer ALLVARIABLES from the right to the left slot. Leave NEWVARIABLES where it is. **OK** saves this change.

Until you change this specification, only eight original variables and any new variables will appear in the dialog boxes associated with procedures.

### Limiting the Number of Observations

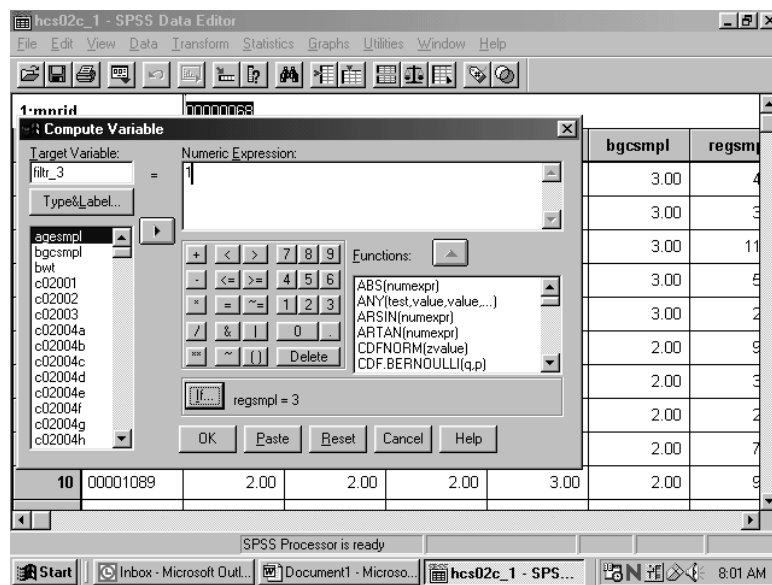

There are many ways to limit the number of observations available to statistical reporting procedures. The method illustrated here involves using **filter variables** with a menu-driven **Filter By** option. Using filters *deactivates* but does not *delete* cases from the file. A diagonal line appears next to the filtered cases in the **Data Window**.

The first task is to **compute** a filter variable for all the cases in the file.

A filter variable has two values: **0** and **1**. The **1** indicates that the case will be included for procedures. The **0** flags the case for removal.

For example, suppose you want to produce a table for people who live in the Southeast, i.e., cases for which the variable **REGSMPL = 3**. You would build a filter variable named **filtr\_3**, which has the value **1** associated with the cases in the Southeast and **0** for all the other cases in the file. The logic is: if **REGSMPL = 3**, then **filtr\_3 = 1**, else **filtr\_3 = 0**.

The screen below shows the final step in computing the filter variable. The variable was first initialized to **0** in the same way as **0** was assigned to the new variable, **sex\_ad**. Then, the "If" condition was built for setting the filter variable to **1**.

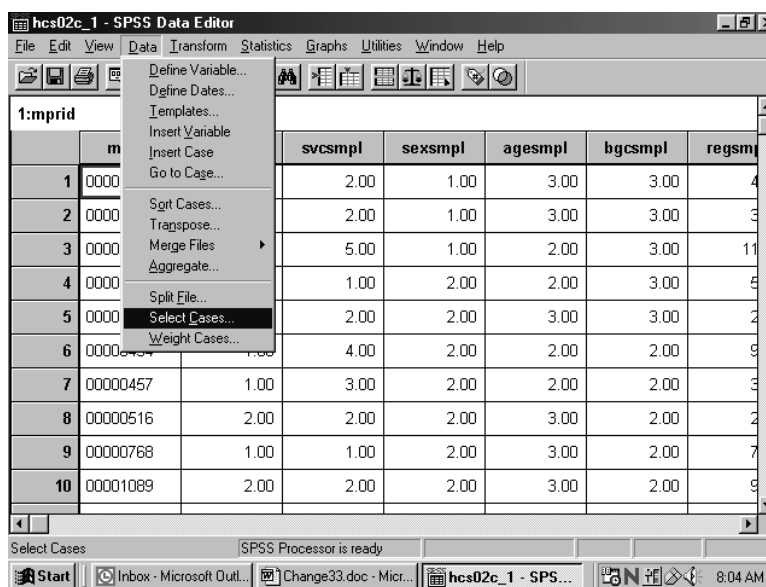

The screen that follows shows the syntax that was generated as you built the variable `filtr_3`.

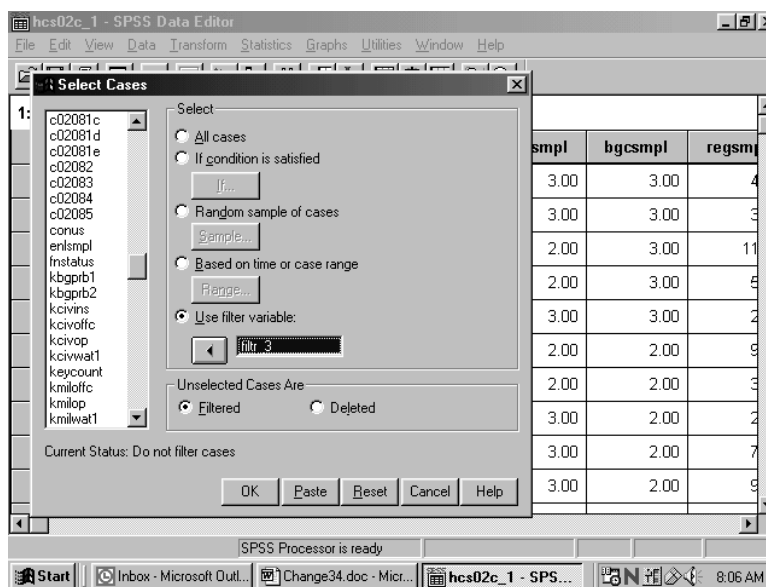

Once you build the filter variable, you can apply it for analyzing only those people from the Southeast.

Using the **Data** menu, choose **Select Cases**.

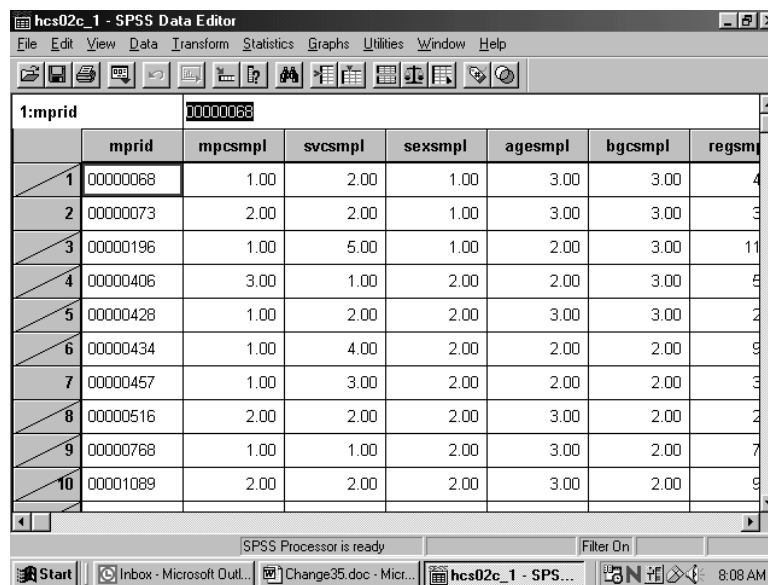

In the dialog box, check **Use filter variable**. Move the variable **filtr\_3** from the variable list on the left side of the dialog box into the slot provided, as indicated below. Check that the option **Filtered** is checked under **Unselected Cases Are**. This is the default option.

Click **OK** and exit the dialog box.

When you return to the **Data Window**, notice the slanting line next to some of the cases in the file. Those cases have been filtered out.

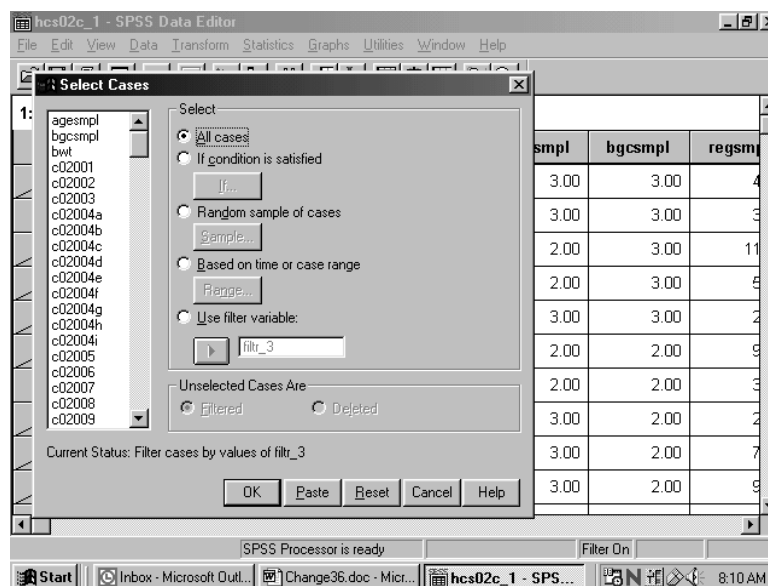

SPSS Processor is ready Filter On

	mprid	mpcsmpl	svcsmpl	sexsmpl	agesmpl	bgcsmpl	regsmpl
1	00000068	1.00	2.00	1.00	3.00	3.00	4
2	00000073	2.00	2.00	1.00	3.00	3.00	3
3	00000196	1.00	5.00	1.00	2.00	3.00	11
4	00000406	3.00	1.00	2.00	2.00	3.00	5
5	00000428	1.00	2.00	2.00	3.00	3.00	2
6	00000434	1.00	4.00	2.00	2.00	2.00	9
7	00000457	1.00	3.00	2.00	2.00	2.00	3
8	00000516	2.00	2.00	2.00	3.00	2.00	2
9	00000768	1.00	1.00	2.00	3.00	2.00	7
10	00001089	2.00	2.00	2.00	3.00	2.00	9

You can now produce tables for the subset of cases.

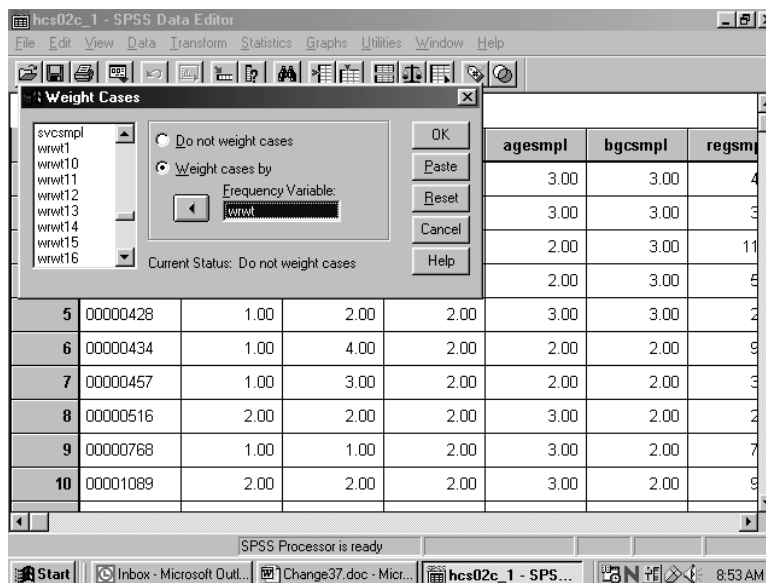

When using filter variables, it is important to check the filter status and to adjust it to fit the present need. Filtered cases are not available for procedures. Moreover, a filter is in effect until it is turned off or until another filter is activated. Check the status line at the bottom of the **Data Editor** window to see if a filter is activated. In the example above, **Filter On** is indicated on the status line. To see *which* filter is active, you must re-enter the **Select Cases** dialog box. There you can deactivate the filter or activate a new one.

To deactivate a filter, choose **All cases** and **OK** as in the screen below.

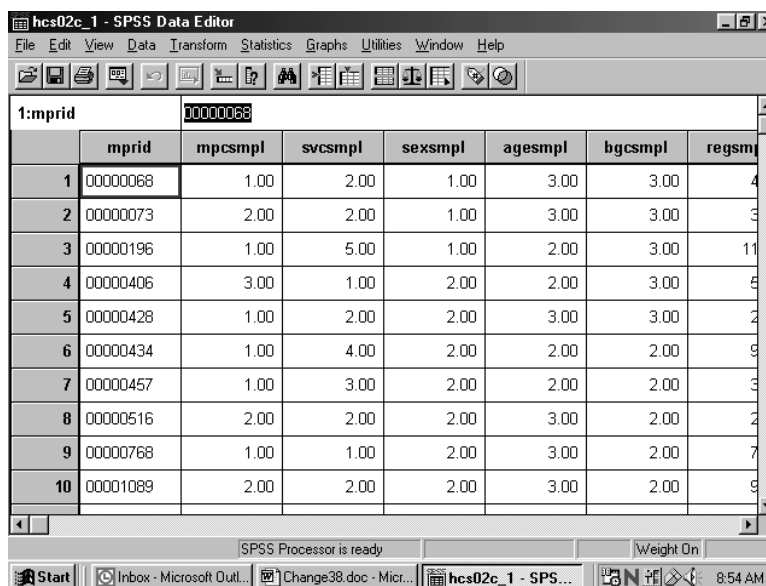

## Weighting Data

The data file includes a weighting variable, **WRWT**, which should be applied to all procedure runs. Again, using the **Data** menu, choose **Weight Cases**. In the dialog box, choose **Weight cases by**. Move the weight variable from the list on the left into the slot labeled **Frequency Variable** on the right as shown below:

Click on **OK** and exit the dialog box. The indication that the data is weighted appears on the status line near the bottom of the screen. As in the following screen, **Weight On** is specified there.

The status line indicates *if* the data is weighted. *Which* weight variable is in effect can only be checked by re-entering the **Weight Cases** dialog box. Weighting stays in effect until it is canceled or until another weight variable is activated.

## BUILDING TABLES

Building tables starts with creating a new subset of variables that includes C02057, C02058, C02015, REGSMPL, BGCSMPL, SEXSMPL, XENRLLMT, WRWT, and SUPREG. The procedures **Means** and **Crosstabs** will probably meet most of your statistical reporting needs. SPSS also offers many options for editing the output tables themselves. Some of these options are explained here.

### Calculating Means

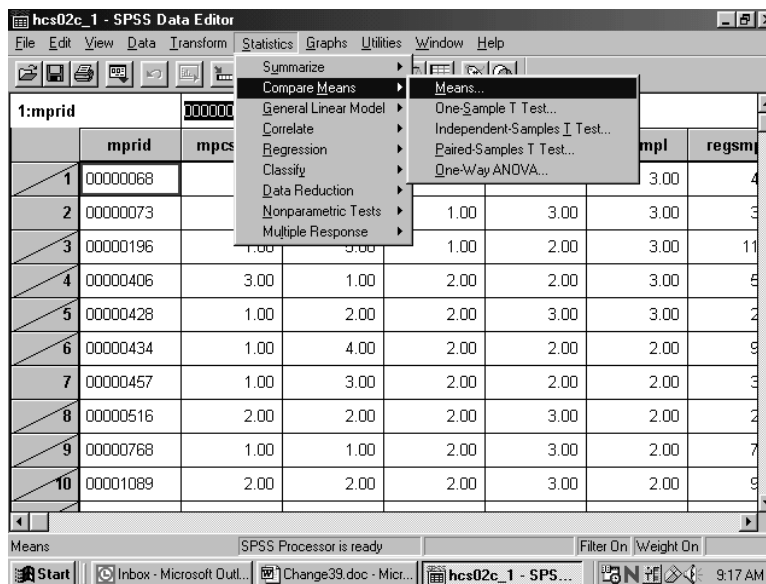

As an example, suppose you want to analyze the health care variables and you want to focus on the New Regions (**SUPREG = 1**). Suppose you are also interested in overall differences in the mean difficulty in acquiring health care in a *military* facility as opposed to the mean rating of experience with the health plan. Within this grouping, you want to examine the effects of the beneficiary group, **BGCSMPL**, and sex, **SEXSMPL**.

The health care variables are **C02057** – rating of the health plan, and **C02058** – difficulty in acquiring health care. The statistic you want to see is the mean of the health care variables for each group in our breakdown.

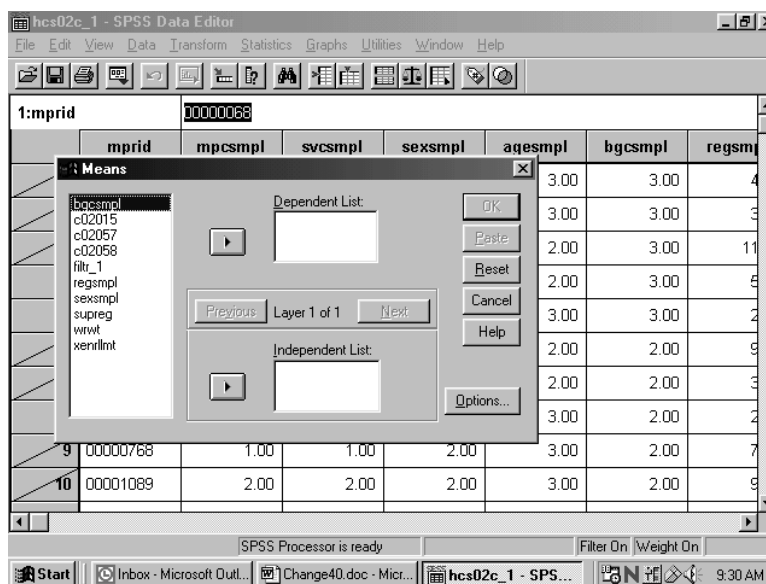

For this analysis, you can use the subset of variables defined above. The subset includes the weight variable, WRWT, which you would activate for procedure runs. The subset also includes new variable, **filtr\_1**, which allows us to select only those cases in the New Regions (SUPREG=1).

Open the **Data** menu in the **Data Window**. In the **Weight Cases** dialog box, activate the weight variable wrwt. Reopen the **Data** menu and, in the **Select Cases** dialog box, activate the filter variable, **filtr\_1**. On the status line, **Filter On** and **Weight On** should appear.

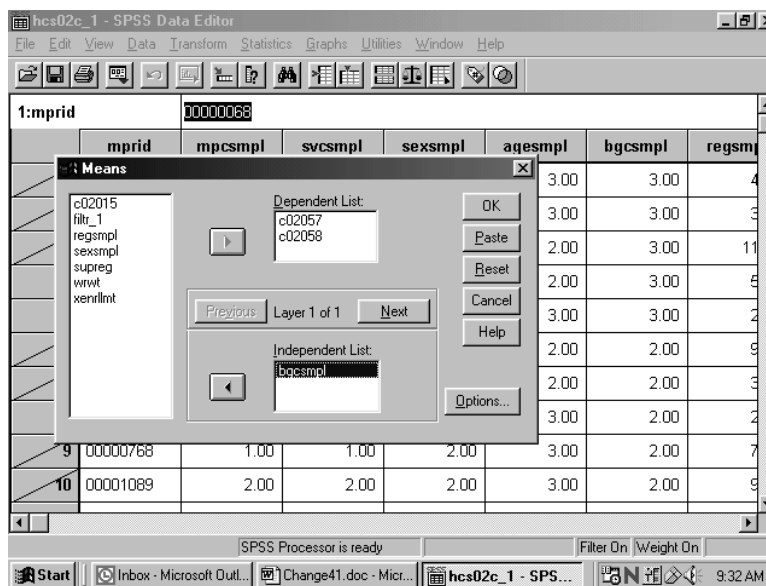

Open the **Statistics** menu in the **Data Window**. Choose **Compare Means** and **Means** from the options as illustrated below.

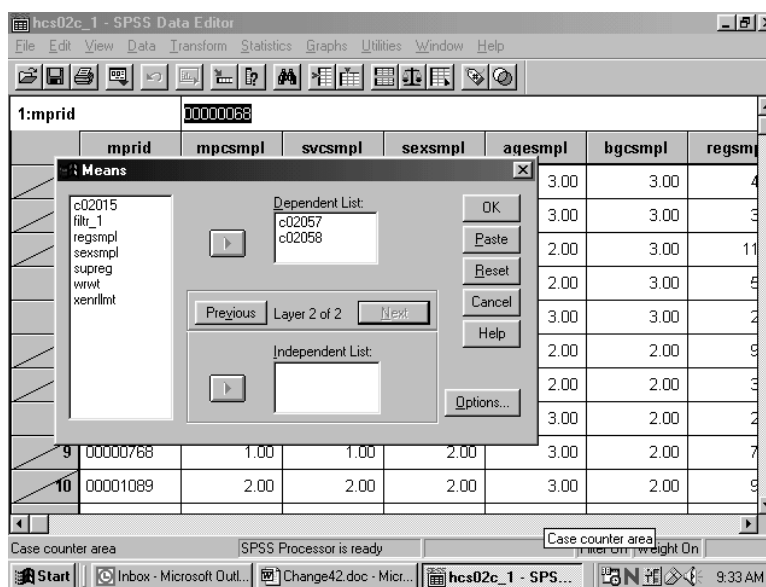

The dialog box for the Means procedure will open as in the following screen:

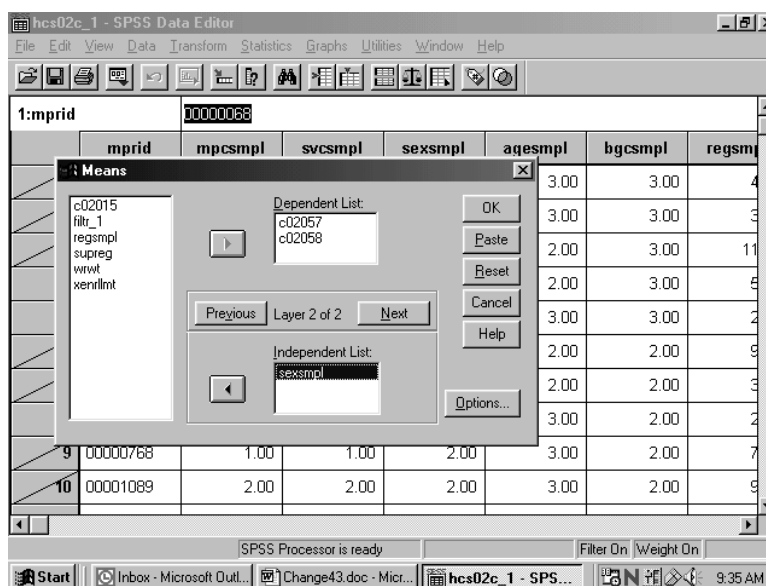

Move the health care variables, **C02057** and **C02058**, from the variable list on the left to the box underneath **Dependent List**. These are the two analysis variables. Notice that **Layer 1 of 1** is specified in the middle of the dialog box. Move **BGCSMPL** from the variable list on the left into the box under **Independent List**. **BGCSMPL** is the first grouping variable. The screen should look like the following:

Click on **Next** in the center of the box to create a second layer. The following screen will open:

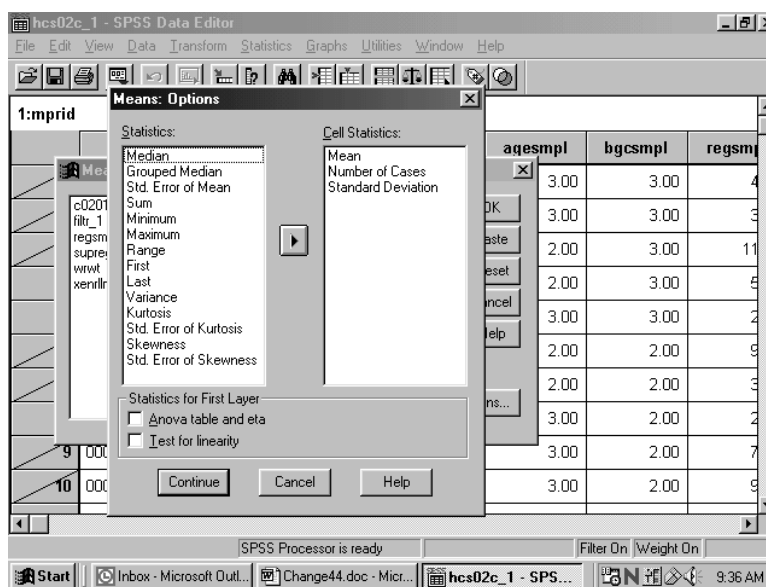

Notice that **Layer 2 of 2** is specified in the middle of the dialog box. Move **SEXSMPL** from the variable list on the left into the box under **Independent List**. **SEXSMPL** is the second grouping variable. The screen should look like the following:

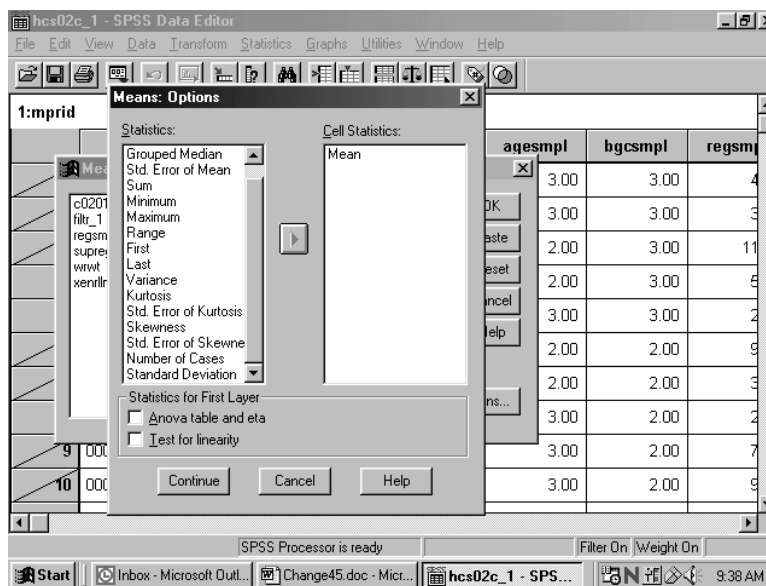

To set some options, click on **Options** and the following dialog box will open:

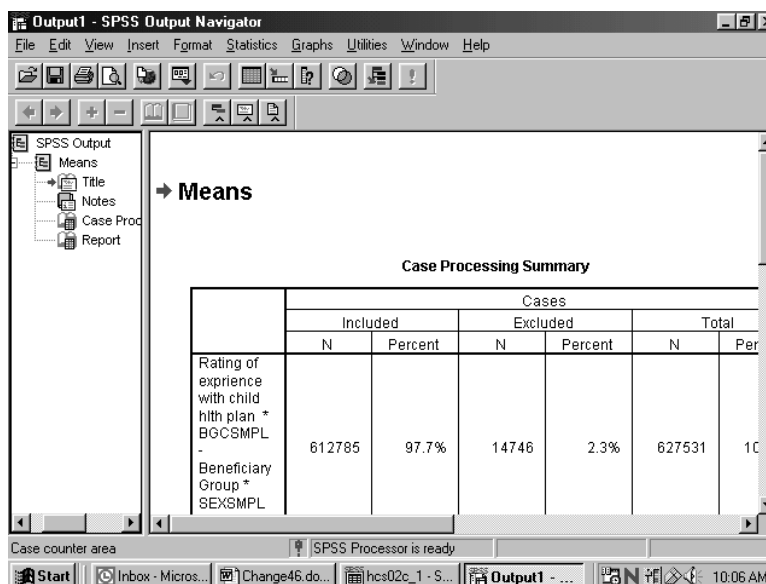

On the left of the box is a list of statistics, under **Statistics**. These are all the possible options for statistical output. In the box under **Cell Statistics** are the default output statistics for the analysis. In this case, **Mean** is the statistic of interest. Highlight **Number of Cases** and **Standard Deviation** and move them to the box at the left, removing them from the analysis, as follows:

Click on **Continue** and return to the previous screen. Click **OK**. The **Means** procedure will run. On the status line, **Running Means** will appear, and a counter for the number of cases processed will be activated.

When **Means** has finished processing, the **Output Navigator** window will open automatically. As the name suggests, the output window is not just for looking at output. A number of options are available for *navigating* through output, moving tables, and even editing the tables themselves.

The output is organized into two sections. On the left side is a navigating tool, which lists the components of the right side, the actual output. In the left pane, **Means** is indicated, and indented under it appear **Title**, **Notes**, **Case Processing Summary**, and **Report**. Clicking on **Means** highlights and selects all the elements. Lines appear around these elements in the right pane. The indenting indicates that the elements are hierarchically organized, with **Means** at the top. Clicking on any of the sub-elements selects just that element.

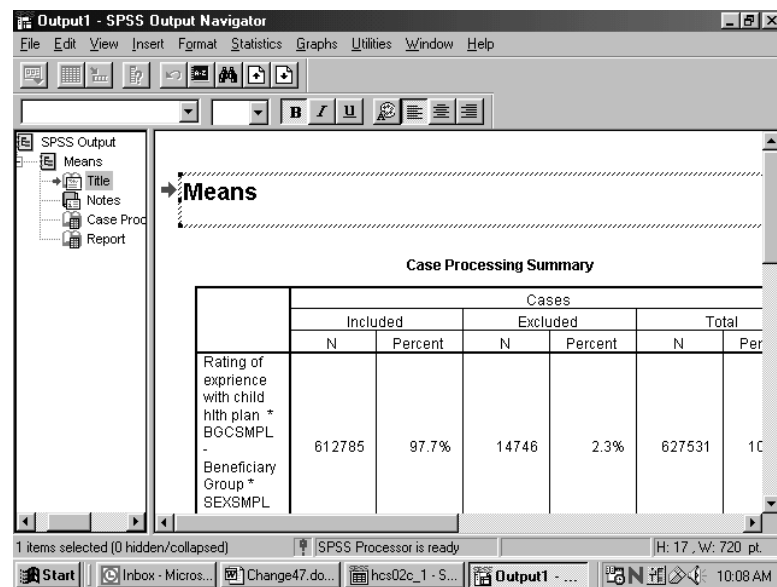

A closer look at the left pane reveals another feature. Hiding underneath the element icons are book icons. The books are either open or closed. If a book is closed, the element is **hidden**. Notice that the book under the **Notes** icon is closed. This is a default SPSS option. Double-clicking the icon will open the book, and the Notes will appear in the output. Double-clicking an **open** book will close it, and the physical element will *disappear* from the output. Closing a book and hiding the element does *not delete* the element.

It is possible to select elements in the right pane of the output. Simply click anywhere inside of the actual output element, and that element will be selected.

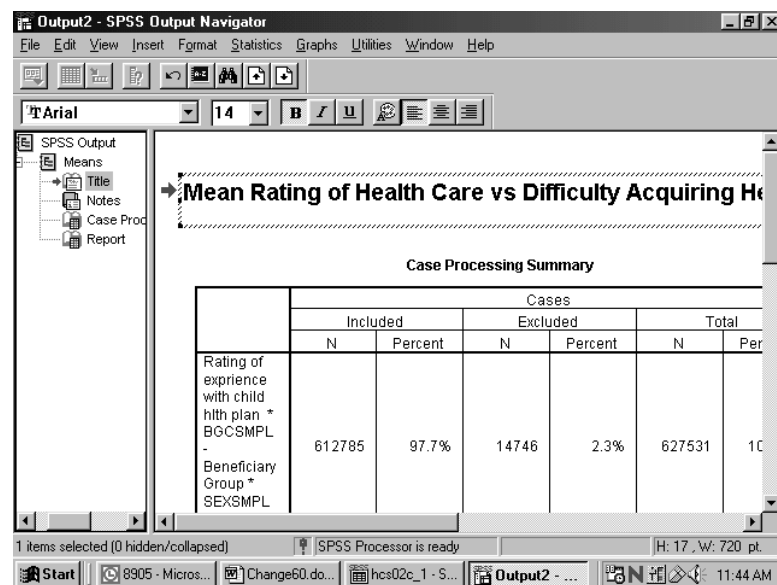

The output may contain many different procedures. The procedure name will be at the top of the list for each section in the left pane. The procedure name does not actually parallel physical output but indicates the category of the output elements.

As you click on each element in the left pane, you will notice that the screen jumps to the actual output of the element, in the right pane. When you click on the procedure name, you jump to the beginning of the next procedure output. This is a quick way to scroll through your output. It also lets you **delete**, **move**, and **edit** selected elements.

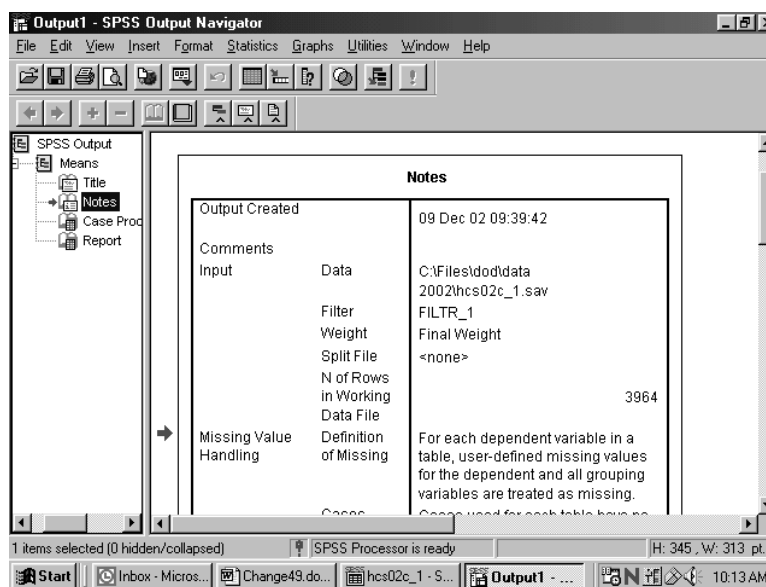

To **Edit** the **Title** element, **Means**, to create a more appropriate title, select the table title by clicking once on the **Title** icon in the left pane. A box now surrounds the title in the right pane. Double-click anywhere within this box, and a box appears around **Means**, as shown in the following screen.

You have entered the **edit** mode for this element, and the cursor appears inside the box. You can delete the word **Means** and write a title that relates to the information in the table. A possible title appears in the next screen. To exit edit mode, click anywhere outside the box. The change you made will be saved.

If you navigate to the next element, **Notes**, you see a closed book. Double click this item, and the notes will appear as follows:

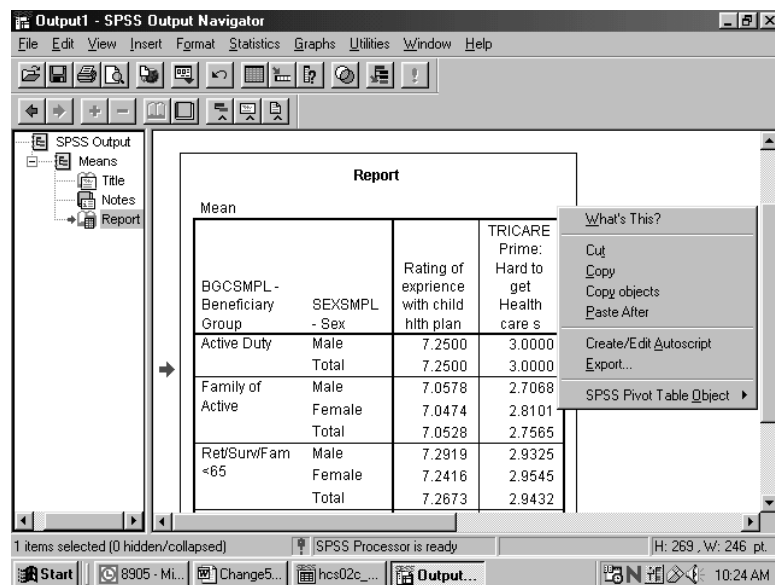

Decide if you want this information to appear in your report. If not, simply double-click the **Notes** icon, and the notes will again become hidden.

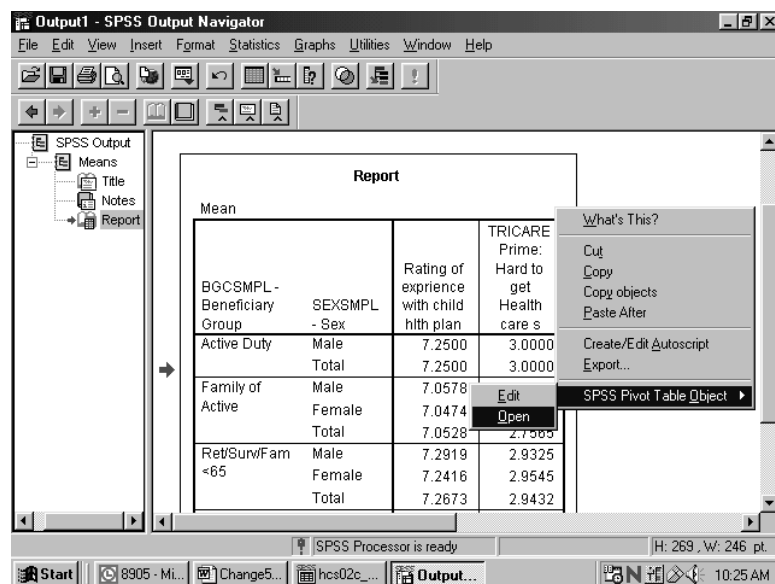

Navigate to **Case Processing Summary**. Click to bring up the Case Processing Summary table that gives useful information about the number of cases included in and the number of cases excluded from a given procedure. This information is important for the researcher but probably not necessary for the report, so you would delete this item after examining it.

Navigate to **Report**. Click to see the actual table output from the procedure **Means**. You can view this table by scrolling through the output. If the table is large, however, scrolling in the output window can be problematic. A better way to review the table is to open it as a **Pivot Table Object** in a special editor.

Select the table by clicking the **Report** icon or by clicking inside the table itself. A box will appear around the table. Insert the mouse pointer inside the table and right-click, opening the following dialog box:

Select **SPSS Pivot Table Object** and **Open** as pictured below:

The table will appear in a new screen superimposed on the output. Maximize this screen as shown below.

SPSS Pivot Table - table1

You would then notice that certain labels are redundant. The labels, **BGCSMPL – BENEFICIARY GROUP** and **SEXSMPL-SEX** are the **Variable Labels** for the variables. The information in these labels is echoed in the **Value Labels**, which are also reproduced in the table. You would delete the Variable Labels as follows.

Click inside the section of the table where the label, **BGCSMPL – BENEFICIARY GROUP**, appears. Right-click to open a dialog box, choosing **Hide Dimension Label**, as illustrated below.

SPSS Pivot Table - table1

File Edit View Insert Pivot Format Help

Start | Inbox... | Chang... | hcs02... | Output... | SPS... | 10:54 AM

The mean values reported are formatted to allow space for the labels of the health variables. The spaces between the values are not pleasing to the eye. You can shorten these labels and add the lost information in another place, according to the following procedures:

Double-click on the label for difficulty in acquiring health care. Delete the text, entering only the words, **Hard to get Health Care**. Do the same for the health care label, entering only the words, **Plan Rating**.

Double-click on the word, **Report**, in the center at the top of the table, right-click, and choose **Delete** from the dialog box.

SPSS Pivot Table - table1

File Edit View Insert Pivot Format Help

Mean

## Calculating Percents

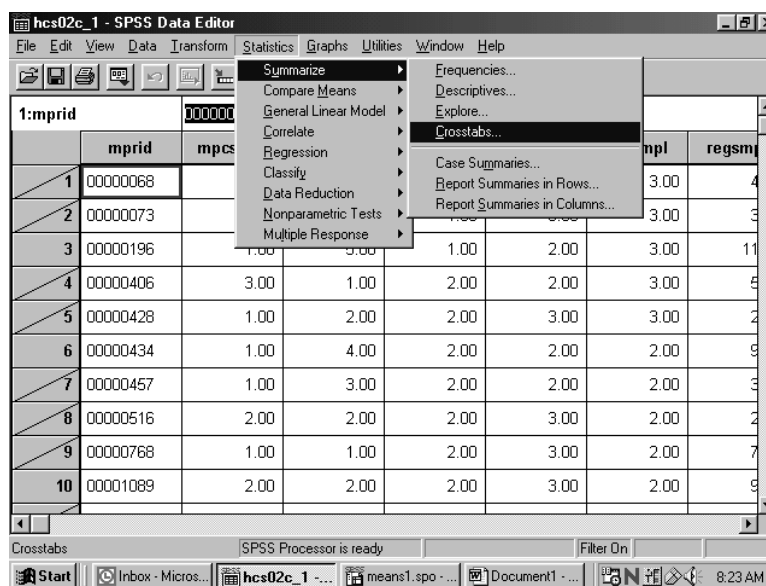

The **Crosstabs** procedure offers many options for analyzing data. The distribution of cases resulting from “crossing” one variable with another is often of interest. The number of cases, row percentages, column percentages, total percentages, and residuals are easily reproduced by **Crosstabs**. A full array of statistics is also available.

The examples given here involve examining relationships between variables, with a view toward the number of cases and the percent of cases in cells produced by “crossing” the variables.

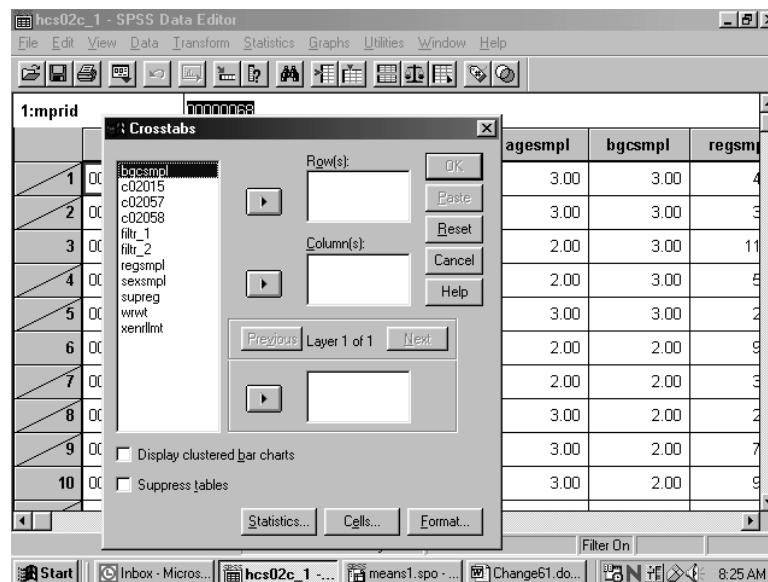

For example, suppose you want to see the percentage of people in certain catchment areas who answered “yes” or “no” to the question, “In the last 12 months, did the child see a specialist?” The variables in this analysis are **REGSMPL** – the catchment area, and **C02015** – the question variable. The cases for the analysis are from the Mature Regions.

The first task is to build a new filter variable, assigning **1** to the variable when **SUPREG = 2**. You would call the variable **filtr\_2** and build it the same way you built the filter, **filtr\_1**. Cases from the Mature Regions are selected when you activate the filter, and the other cases are filtered out. Check the status line for **Filter On**. For this table the cases will be unweighted. Using the **DATA** menu, choose **Weight Cases**. In the dialog box, choose **Do Not Weight Cases**.

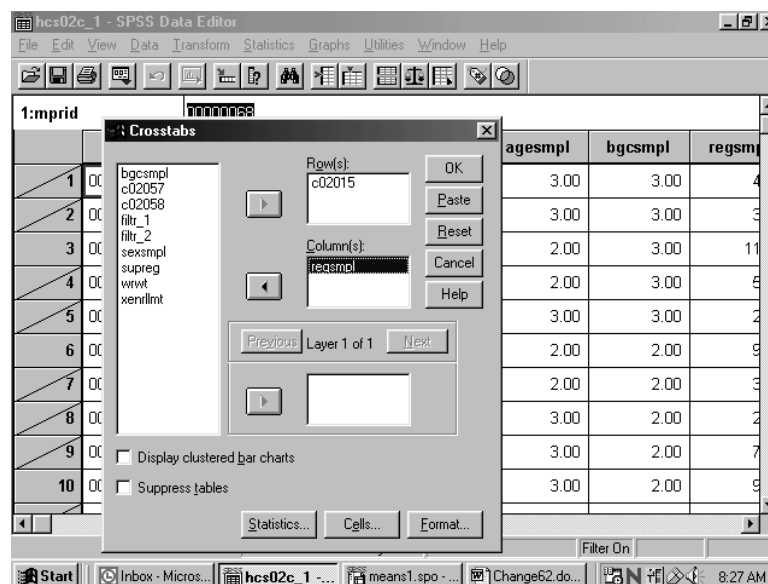

Next, open the **Statistics** menu in the **Data Window**, choosing **Summarize** and **Crosstabs**, as shown below.

The **Crosstabs** dialog box will open as follows:

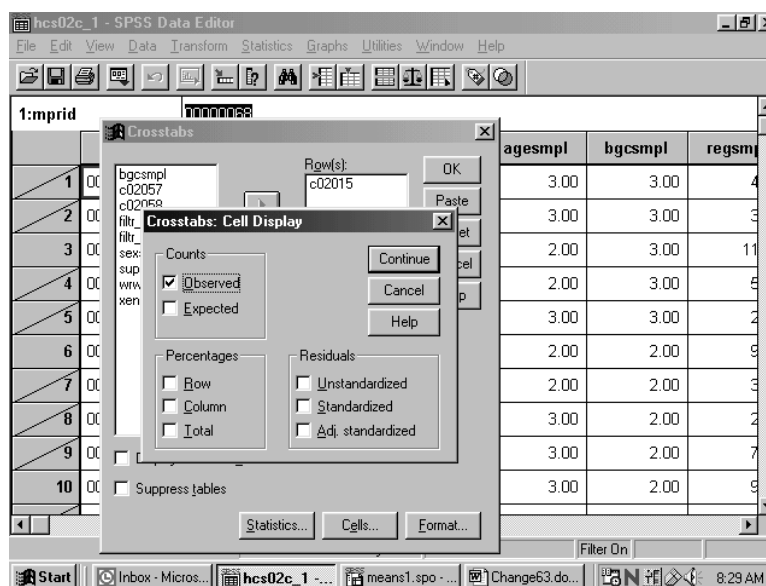

Move **C02015** from the variable list on the left into the box marked **Row(s):**, and move the variable **REGSMPL** into the box marked **Column(s):**. The screen will resemble the following:

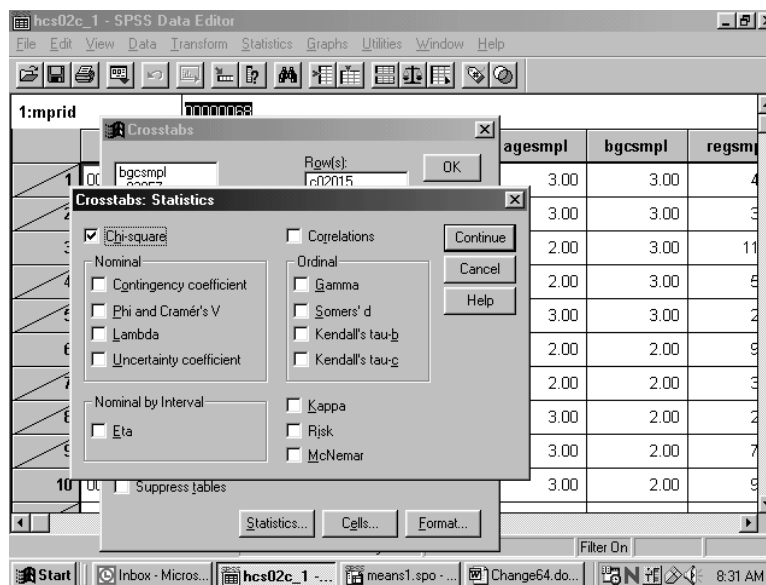

For this analysis, there are no **Layer** variables, so you can proceed to format the table cells.

Click on **Cells...** and open the following dialog box.

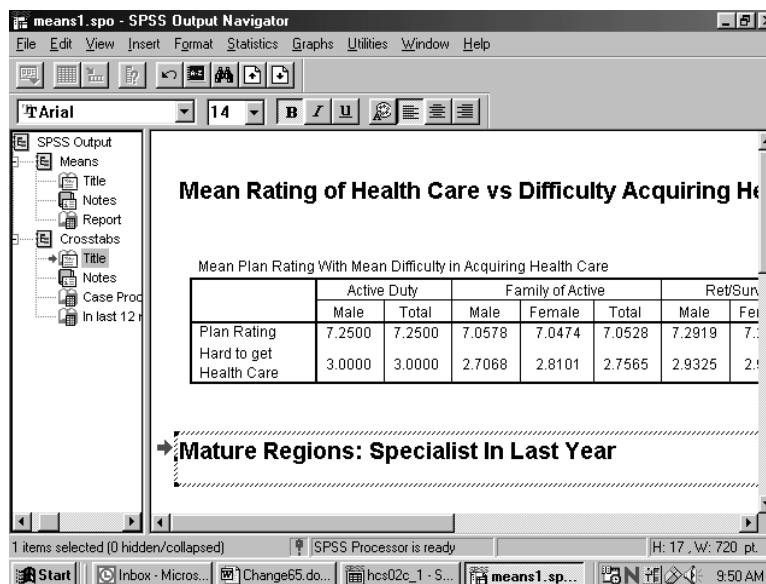

Under **Counts**, **Observed** is checked. This refers to the cell count, a statistic you want to see, so you would leave it checked. Under **Percentages**, check **Column** because you are interested in the percentage of people in each catchment area. Click **Continue** and return to the original screen.

Suppose you also want to see the chi-square statistic. Click on **Statistics**, and the following screen will open:

Check **Chi-square** as in the screen above, click **Continue** to return to the first screen, and click **OK** to run the procedure. **Running Crosstabs** will appear on the status line, together with the case counter.

When the run is completed, the output window will open, and you can proceed to reformat the table. For a given work session, SPSS appends new output to previous output--in our case, the **Means** procedure. As shown in the next screen, a second section now appears in the left pane, headed by the word **Crosstabs**. Navigate to the **Title** section and double-click inside the title box to change the text in the box to fit the table, as in the example below.

As you did for the **Means** procedure, you would again evaluate the **Notes** and examine the **Case Processing Summary**. Hide the **Notes** and delete the **Case Processing Summary** as you did before.

Navigate to the procedure icon. Follow the procedure for opening an **SPSS Pivot Table Object**, open the table in the special editor and maximize the screen as in the following:

SPSS Pivot Table - table2

Pivoting Trays2

Layers

Columns

Rows

Start | Inbox - Mi... | Change6... | hcs02c... | means1.s... | SPSS ... | 9:57 AM

This tool reflects the table structure: rows, columns, and layers. The icons in the margins of the pivoting trays represent the table elements: the variables and the cell statistics. Place the mouse pointer on each icon and notice the element name appear. In this example, on the ROW axis, you would find the variable, **C02015 – in last 12 months, did child see specialist**, and **Statistics** – the percent of people in each catchment area. On the column axis is the variable, **REGSMPL** – the catchment area.

Place the mouse pointer on the **Statistics** icon. Click and drag the icon from the ROW to the COLUMN dimension. The table immediately reformats as in the following screen:

SPSS Pivot Table - table3

File Edit View Insert Pivot Format Help

**In last 12 mos did child see specialist \* REGSMPL - Region Crosstabulation**

		REGSMPL - Region					
		Southwest		Southern California		Golden Gate	
		Count	% within REGSMPL - Region	Count	% within REGSMPL - Region	Count	% within REGSMPL - Region
In last 12 mos did child see specialist	Yes	356	80.0%	185	75.8%	65	78.3
	No	89	20.0%	59	24.2%	18	21.7
Total		445	100.0%	244	100.0%	83	100.0

Pivoting Trays3

Layers

Columns

Rows

Start | Inbox - Mi... | Change7... | hcs02c... | means1.s... | SPSS ... | 10:09 AM

Close the pivoting tool and scroll from side to side in the table. Again, the table appears too wide, but the report will print properly. Notice that the table is much more readable.

The label at the top of the table is the **Variable Label** for **REGSMPL**. Select it by double-clicking and edit it for clarity (see the screen below).

The table is now formatted to accommodate the long percent label, creating a lot of wasted space. Double-click this element, delete the text, and replace it with the word, "Percent". The empty space disappears and the table appears as follows:

		Mature Regions: Catchment Areas					
		Southwest		Southern California		Golden Gate	
		Count	Percent	Count	Percent	Count	Percent
In last 12 mos did child see specialist	Yes	356	80.0%	185	75.8%	65	78.0%
	No	89	20.0%	59	24.2%	18	21.0%
Total		445	100.0%	244	100.0%	83	100.0%

Next, notice that the label for **C02015** is awkward. Select and clear it.

Last, edit the text in the table label so that it better expresses the content of the table. The finished table appears as follows:

SPSS Pivot Table - table3

File Edit View Insert Pivot Format Help

Child Saw Specialist in Last Year: By Catchment Areas

	Mature Regions: Catchment Areas					
	Southwest		Southern California		Golden Gate	
	Count	Percent	Count	Percent	Count	Percent
Yes	356	80.0%	185	75.8%	65	78.3%
No	89	20.0%	59	24.2%	18	21.7%
Total	445	100.0%	244	100.0%	83	100.0%

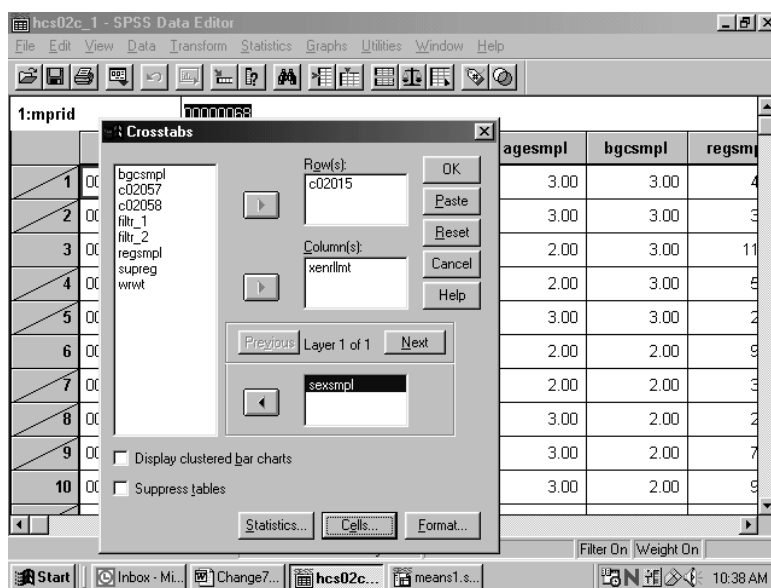

Start | Inbox - Mi... | Change7... | hcs02c... | means1.s... | SPSS ... | 10:31 AM

Check **Print Preview** to see if the table is acceptable.

The last example shows you how to add a **Layer** dimension to a **Crosstabs** analysis. Using the same row variable, **C02015**, suppose you want to look at the percentage of children by their enrollment status in TRICARE Prime, **xenrlimt**, who saw a specialist in the past 12 months. Suppose you are also interested in sex differences, **sexsmpl**, among the groupings. **Sexsmpl** is the **Layer** variable. You want to remain in the Mature Regions, using **filtr\_2** as the filter variable. The cases will be weighted by **WRWT**.

Activate the weight variable, **WRWT**. The status line indicates **Weight On** and **Filter On**. Verify that both the weight and the filter variables are appropriate.

Once more, open the **Crosstabs** dialog box, enter the analysis variables, and set the **Cells** options, checking **Column** under **Percentages** until the dialog box looks like the following:

Do the following:

- Run Crosstabs.
- Edit the **Title** element in the **Output Navigator**.
- Examine **Notes** and the **Case Processing Summary** to verify that the CrossTab ran as expected.
- Open the table as an **SPSS Pivot Table Object**, and the following will appear:

SPSS Pivot Table - table4

File Edit View Insert Pivot Format Help

In last 12 mos did child see specialist \* Enrollment in TRICARE Prime \* SEXSMPL - Sex  
Crosstabulation

## CALCULATING VARIANCES OF ESTIMATES

Sampling error occurs when estimates are derived from a sample rather than a complete census of the population. The sample used for a particular survey is only one of a large number of possible samples of the same size and design that could have been selected. Even if the same questionnaire and instructions were used, the estimates from each sample would differ from the others. The standard error (or square root of the variance) indicates the magnitude of the sampling error and thus measures the precision expected from a particular sample.

It is desirable to assess the accuracy of an estimate. The standard error of a survey estimate measures the precision with which an estimate from one sample approximates the true population value. The standard error can then be used to construct confidence intervals for survey parameters, within which the true parameter lies with a measurable degree of certainty.

This section explains how to estimate standard errors or variances for estimators computed from the 2002 Child HCSDb. For a full discussion of variance estimation methods, see Wolter (1985) and references cited therein.

### Variance Estimation Methods

To account for the sample design,<sup>1</sup> it is customary to use either Taylor series linearization or a resampling method for variance estimation. Neither variance estimation method is, in general, better so the choice of one or the other is largely a matter of convenience. To help users to estimate standard errors using Taylor series linearization or jackknife replication, the public release files for the 2000 Child HCSDb include the following variables:

- The stratum variable and the final weight (STRATUM and WRWT) for the Taylor series linearization method
- Jackknife replicate weights (WRWT01 to WRWT60) for the jackknife replication method

Two popular software packages are available for performing Taylor series linearization or the jackknife replication method: SUDAAN<sup>TM</sup> (Shah et al. 1996) and WesVarPC (Brick et al. 1996), respectively.<sup>2</sup> The discussion below explains how SUDAAN and WesVarPC are used to calculate variance estimates using Taylor series linearization and jackknife replication methods.

---

<sup>1</sup>The 2002 HCSDb uses a stratified sampling design. For details, see Nancy Clusen and Esther Friedman, 2002 Health Care Survey of DoD Beneficiaries: Child Sample Report." Washington, DC: Mathematica Policy Research, May 2002.

<sup>2</sup>The latest version for SUDAAN 8.0, can also be used for replication methods including jackknife variance estimation. SAS 8.0 can be used for Taylor series approximation methods.

## Taylor Series Linearization Method

For most sample designs (including the 2002 Child HCSDb), design-based variance estimates for linear estimators of totals or means can be obtained with explicit formulas. However, nonlinear functions such as ratios do not have exact expressions for the variance. The Taylor series linearization method approximates the variance of a nonlinear estimator with the variances of the linear terms from the Taylor series expansion. Woodruff (1971) presented applications of this technique to sample surveys. Details on this method can also be found in "The 2002 Health Care Survey of DoD Beneficiaries: Child Technical Manual".

To calculate variance estimates based on Taylor series linearization method with HCSDb's stratified sampling design, both the stratum variable (STRATUM) and the final weight (WRWT) specified for each data record are needed. The public release files for the 2002 Child HCSDb include these variables: STRATUM and WRWT.

SUDAAN incorporates the final analysis weight and the survey design to obtain estimates and their sampling errors. With a small overall sampling rate of about 1 percent, you can use the with-replacement design procedure (STRWR) in calculating standard errors.

All SUDAAN procedures require the following:

- The specification of sampling designs. The terminology for the stratified with-replacement sample design is DESIGN = STRWR.
- The data file sorted by the variable specified in the NEST statement. For the 2002 Child HCSDb, the data file must be sorted by STRATUM before using any SUDAAN procedure.
- A FILE TYPE appropriate for SUDAAN, if you use a stand-alone SUDAAN program. For example, some SUDAAN PC versions under Windows or MS-DOS accept only V6.02 through V6.04 SAS files, and FILE TYPE must be specified as SAS. SAS-callable SUDAAN is also available and can be invoked directly in a SAS program with any available SAS file as input; FILE TYPE is not needed here.
- The WEIGHT variable for 2002, which is WRWT

The following program is an example of how to use SUDAAN to calculate variance estimates for a mean statistic. Suppose you want to estimate:

- The health plan rating (C02057) among all beneficiaries in the past 12 months who saw a specialist (C02015=1) for each region (SUPREG)

```
PROC DESCRIPT DATA=HCSDb02 /*FILETYPE=SAS*/ DESIGN=STRWR;  
  WEIGHT          WRWT;  
  NEST             STRATUM;  
  SUBPOP          C02015=1;  
  SUBGROUP        SUPREG;  
  LEVELS          16;  
  VAR              C02057;
```

The following program is an example of how to use SUDAAN to calculate variance estimates for column percentages or row percentages. Suppose you want to estimate:

- A cross tabulation of children in region 3 who in the past 12 months most often used a military facility, a civilian facility, or used no health care (C02043) by TRICARE enrollment (XENRLLMT).

```
PROC CROSSTAB DATA=HCSDB02 /*FILETYPE=SAS*/ DESIGN=STRWR;  
  WEIGHT      WRWT;  
  NEST         STRATUM;  
  SUBPOPN     SUPREG = 3;  
  SUBGROUP    C02043 XENRLLMT;  
  LEVELS      3 5;  
  TABLES     C02043 *XENRLLMT;
```

From the above examples, users should note that:

- PROC DESCRIPT can be used to compute estimates of means and the corresponding standard errors.
- PROC CROSSTAB can be used to compute estimates of proportions and the corresponding standard errors.

For a more detailed and complete discussion of how to use SUDAAN, see Shah et al. (1996).

### Jackknife Replication Method

Another popular way to estimate the variance is to use a resampling method such as jackknife replication, balanced repeated replication, random groups, or the bootstrap method. Like other replication methods, jackknife replication constructs a number of subsamples (replicates) from the full sample and computes the statistics of interest for each replicate (with the same formula as the full sample estimate). The mean square error of the replicate estimates around their corresponding full estimate provides an estimate of the sampling variance of the statistic of interest regardless of the functional form of the statistic.

There are 60 replicate weights (WRWT01-WRWT60) for the 2002 Child HCSDb in the public use file. Construction of these weights is described in the Child Technical Manual. With the replicate weights, you can produce jackknife standard errors using in-house or custom written software, or you can use a publicly available software package such as WesVarPC or SUDAAN 7.5. Because WesVarPC 2.02 is available as freeware on the World Wide Web (<http://www.wesvar/licensing/index.html>), the following example explains how it is used to produce jackknife variance estimates for statistics from the 2002 Child HCSDb.

Suppose you want to estimate the mean rating of specialists (C02016) by beneficiaries whose child went to a specialist in the past 12 months (C02015=1) for each region (SUPREG). You would use WesVarPc as follows.

- **Create a SAS V6.04 file, SAS Transport file, or ASCII file.** WesVarPC has a restriction for the input data format. All files must be converted to one of these three types of files before being imported to WesVarPC.
- **Create a WesVarPC data file.** From the *Prep* menu, choose the *Import Data Files* screen and import all variables for the analysis. For this example, input C02015, and SUPREG into the *Variables* box, WRWT01-WRWT60 into the *Replicates* box, and MPRID into the *ID* box. Also specify the replication method as JK1 on this screen.
- **Create a data file for the subpopulation.** Specify the subpopulation by choosing the *Subpop WesVarPC Data File* from the *Prep* menu: C02015=1.
- **Calculate estimates.** From the *Tables* menu, choose *New* and select the file created from the above procedure. Then, from the *Table Request* screen, specify C02015=1 as the *Analysis* variable, MEAN (C02016) as the *Compute Statistics*, and REGSMPL C02016 *Table*.

The above steps can also be followed to produce standard errors. The WesVarPC user's manual (Brick et al. 1996) provides other possible methods for producing standard errors. The latest WesVarPC 4.0 is no longer freeware and can be purchased from Westat.

## Chapter

## 4

## Codebook

This chapter describes every variable in the database. This codebook will also be helpful in identifying which data are available for various analyses, and what, if any, recoding of variables will benefit your needs. It may also be useful in reviewing output.

The variables are in order based on their position in the database. An alphabetical listing (see Table of Contents) is provided to assist in locating variables.

The codebook contains frequency distributions for both discrete and continuous variables. A discrete variable is one that has only a few values. A continuous variable may have many possible values.

Below are two examples of the presentation of variables in the codebook. For each variable, we include the variable name, definition, weighted and unweighted frequency distributions, and the format value for each value. The first example contains a frequency distribution for a discrete variable.

<b>C02057 - Rating of experience with child health plan</b>					
<b>Value</b>	<b>Unweighted</b>		<b>Weighted</b>		<b>Formatted Value</b>
	<b>Count</b>	<b>Percent</b>	<b>Count</b>	<b>Percent</b>	
A	34	0.30	5729	0.32	Mult response
.	244	2.16	36667	2.06	No response
0	164	1.45	24662	1.38	0 Worst plan
1	116	1.03	17042	0.96	1
2	202	1.79	32515	1.82	2
3	261	2.31	42109	2.36	3
4	355	3.14	56105	3.15	4
5	1163	10.30	179849	10.08	5
6	881	7.80	137879	7.73	6
7	1741	15.41	280434	15.72	7
8	2477	21.93	395808	22.19	8
9	1989	17.61	314926	17.66	9
10	1669	14.78	259708	14.56	10 Best plan

The table below contains an example of a frequency distribution for a continuous variable: final weight. The frequency does not list every possible value of final weight individually but instead shows several age ranges that together cover all possible values of final weight. You will notice that the last range representing the final weight with range 240,671 to 264,202 includes 682 sponsors in this range.

<b>WRWT - Final Weight</b>					
<b>Value</b>	<b>Unweighted</b>		<b>Weighted</b>		<b>Formatted Value</b>
	<b>Count</b>	<b>Percent</b>	<b>Count</b>	<b>Percent</b>	
73.838 -- 100.731	1655	14.65	146657	8.22	Minimum to 10th Percentile
101.920 -- 116.349	1186	10.50	129152	7.24	>10th to 25th Percentile
116.819 -- 147.185	2837	25.12	379268	21.27	>25th to 50th Percentile
148.109 -- 205.452	2964	26.24	520977	29.21	>50th to 75th Percentile
205.814 -- 234.452	2004	17.74	450046	25.23	>75th to 90th Percentile
235.090 -- 254.536	650	5.75	157334	8.82	>90th to 100th Percentile

<b>MPRID - Unique MPR Identifier</b>

## **APPENDIX A**

### **ANNOTATED QUESTIONNAIRE**

# **Health Care Survey of DoD Beneficiaries**

## **Child Questionnaire**

## SURVEY INSTRUCTIONS

Answer all the questions by checking the circle to the left of your answer. You are sometimes told to skip over some questions in this survey. When this happens you will see a note that tells you what question to answer next, like this:

- ☐ Yes **Go to Question 1**  
☐ No

Please return the completed questionnaire in the enclosed postage-paid envelope within **seven days**. If you have misplaced the envelope, our address is:

Office of the Assistant Secretary of Defense (Health Affairs)  
c/o Survey Processing Center  
PO Box 82660  
Lincoln, NE 68501-9462

According to the Privacy Act of 1974 (Public Law 93-579), the Department of Defense is required to inform you of the purposes and use of this survey. Please read it carefully.

**Authority:** 10 U.S.C., Chapter 55, Public Law 102-484, E.O. 9397.

**Purpose:** This survey helps health policy makers gauge beneficiary satisfaction with the current military healthcare system and provides valuable input from beneficiaries that will be used to improve the Military Health System.

**Routine Uses:** None

**Disclosure:** Voluntary. Failure to respond will not result in any penalty to the respondent. However, maximum participation is encouraged so that data will be as complete and representative as possible.

### **SURVEY STARTS HERE**

*Please answer the questions for the child whose name appears on the envelope. Please do not answer for any other children.*

**1. Are you an adult responsible for the child listed on the envelope?**

- ☐ Yes **Go to Question 2**   ☐ No **Please give this questionnaire to a person responsible for that child.**

**2. Which health plan did you use for all or most of your child's healthcare in the last 12 months? MARK ONLY ONE.**

- ☐ TRICARE Prime  
☐ TRICARE Extra/Standard (CHAMPUS)  
☐ Federal Employees Health Benefit Program (FEHBP)  
☐ Medicaid  
☐ A civilian HMO (such as Kaiser)  
☐ Other civilian health insurance (such as Blue Cross)  
☐ Uniform Services Family Health Plan (USFHP)  
☐ Not sure  
☐ My child did not use any health plan in the last 12 months.

*For the remainder of this questionnaire, the term health plan refers to the plan you marked in Question 2.*

**3. In the last 12 months, how many months in a row was your child enrolled in this health plan?**

- ☐ Less than 2 months   ☐ 7-12 months  
☐ 2-6 months   ☐ Not enrolled in a health plan in the last 12 months.

\*0DCRJC2%\*  
22430568

4. By which of the following health plans is your child currently covered? MARK ALL THAT APPLY.

- ☐ TRICARE Prime
- ☐ TRICARE Extra/Standard (CHAMPUS)
- ☐ Federal Employees Health Benefit Program (FEHBP)
- ☐ Medicaid
- ☐ A civilian HMO (such as Kaiser)
- ☐ Other civilian insurance (such as Blue Cross)
- ☐ Uniform Services Family Health Plan (USFHP)
- ☐ Not sure
- ☐ My child did not use any health plan in the last 12 months

\_\_\_\_\_YOUR CHILD'S PERSONAL DOCTOR OR NURSE\_\_\_\_\_

The next questions ask you about your child's healthcare. Do not include care your child got when he or she stayed overnight in a hospital. Do not include the times your child went for dental care visits.

5. A personal doctor or nurse is the health provider who knows your child best. This can be a general doctor, a specialist doctor, a nurse practitioner, or a physician assistant.

Do you have one person you think of as your child's personal doctor or nurse? If your child has more than one personal doctor or nurse, choose the person your child sees most often.

- ☐ Yes    ☐ No    Go to Question 9

6. With the choices your child's health plan gave you, how much of a problem, if any, was it to get a personal doctor or nurse for your child you are happy with?

- ☐ A big problem    ☐ Not a problem  
☐ A small problem    ☐ My child does not have a personal doctor or nurse.    Go to Question 9

7. In the last 12 months, when your child went to his or her personal doctor or nurse's office or clinic, how often did the doctor or nurse talk with you about how your child is feeling, growing, or behaving?

- ☐ Never    ☐ Usually    ☐ My child doesn't have a personal doctor or nurse.    Go to Question 9  
☐ Sometimes    ☐ Always

8. We want to know your rating of your child's personal doctor or nurse. If your child has more than one personal doctor or nurse, choose the person your child sees most often.

Use any number from 0 to 10 where 0 is the worst personal doctor or nurse possible and 10 is the best personal doctor or nurse possible. How would you rate your child's personal doctor or nurse now?

- ☐ 0 Worst personal doctor or nurse possible
- ☐ 1
- ☐ 2
- ☐ 3
- ☐ 4
- ☐ 5
- ☐ 6
- ☐ 7
- ☐ 8
- ☐ 9
- ☐ 10 Best personal doctor or nurse possible
- ☐ My child doesn't have a personal doctor or nurse.

9. For members of TRICARE Prime, the primary point of contact regarding your child's health is called a primary care manager or PCM. This may be the same person as your child's personal doctor or nurse. Does your child have a TRICARE primary care manager?

- ☐ Yes Go to Question 10    ☐ I don't know. Go to Question 13  
☐ No Go to Question 13    ☐ My child is not enrolled in TRICARE Prime. Go to Question 13

10. Do you know the name of your child's TRICARE Prime primary care manager?

- ☐ Yes    ☐ No

11. In the last 12 months, how much of a problem was it for your child to see his or her TRICARE primary care manager?

- ☐ A big problem    ☐ Not a problem  
☐ A small problem    ☐ My child doesn't have a TRICARE primary care manager. Go to Question 13

12. Is your child's TRICARE Prime primary care manager (PCM) based in a military or civilian facility?

- ☐ A primary care manager based at a military facility    ☐ Not sure  
☐ A primary care manager based at a civilian facility    ☐ Not a member of TRICARE Prime.

—————GETTING HEALTHCARE FROM A SPECIALIST—————

When you answer the next questions, do not include dental visits.

13. Specialists are doctors like surgeons, heart doctors, allergy doctors, skin doctors, and others who specialize in one area of healthcare.

In the last 12 months, did you or a doctor think your child needed to see a specialist?

- ☐ Yes    ☐ No Go to Question 18

14. In the last 12 months, how much of a problem, if any, was it to get a referral to a specialist that your child needed to see?

- ☐ A big problem    ☐ Not a problem  
☐ A small problem    ☐ My child did not see a specialist in the last 12 months.

15. In the last 12 months, did your child see a specialist?

- ☐ Yes    ☐ No Go to Question 18

\*0DCRJ41\*  
22430568

16. We want to know your rating of the specialist your child saw most often in the last 12 months, including a personal doctor if he or she was a specialist.

Use any number from 0 to 10 where 0 is the worst specialist possible and 10 is the best specialist possible. How would you rate your child's specialist?

- ☐ 0 Worst specialist possible
- ☐ 1
- ☐ 2
- ☐ 3
- ☐ 4
- ☐ 5
- ☐ 6
- ☐ 7
- ☐ 8
- ☐ 9
- ☐ 10 Best specialist possible
- ☐ My child didn't see a specialist in the last 12 months.

17. In the last 12 months, was the specialist your child saw most often the same doctor as your child's personal doctor?

- ☐ Yes
- ☐ No
- ☐ My child doesn't have a personal doctor or didn't see a specialist in the last 12 months.

#### —————CALLING DOCTORS' OFFICES—————

18. In the last 12 months, did you call a doctor's office or clinic during regular office hours to get help or advice for your child?

- ☐ Yes
- ☐ No Go to Question 20

19. In the last 12 months, when you called during regular office hours, how often did you get the help you needed for your child?

- ☐ Never
- ☐ Sometimes
- ☐ Usually
- ☐ Always
- ☐ I didn't call for help or advice for my child during regular office hours in the last 12 months.

#### —————YOUR CHILD'S HEALTHCARE IN THE LAST 12 MONTHS—————

A health provider could be a general doctor, a specialist doctor, a nurse practitioner, a physician assistant, a nurse, or anyone else your child would see for healthcare.

20. In the last 12 months, did you make any appointments for your child with a doctor or other health provider for regular or routine healthcare?

- ☐ Yes
- ☐ No Go to Question 23

21. In the last 12 months, how often did your child get an appointment for regular or routine healthcare as soon as you wanted?

- ☐ Never
- ☐ Sometimes
- ☐ Usually
- ☐ Always
- ☐ My child didn't need an appointment for regular or routine care in the last 12 months.

22. In the last 12 months, how many days did your child usually have to wait between making an appointment for regular or routine care and actually seeing a provider?
- ☐ Same day    ☐ 8-14 days  
☐ 1 day    ☐ 15-30 days  
☐ 2-3 days    ☐ 31 days or longer  
☐ 4-7 days    ☐ My child didn't need an appointment for regular or routine care in the last 12 months.
23. In the last 12 months, did your child have an illness or injury that needed care right away from a doctor's office, clinic, or emergency room?
- ☐ Yes    ☐ No    Go to Question 26
24. In the last 12 months, when your child needed care right away for an illness or injury, how often did your child get care as soon as you wanted?
- ☐ Never    ☐ Always  
☐ Sometimes    ☐ My child didn't need care right away for an illness or injury in the last 12 months.  
☐ Usually
25. In the last 12 months, how long did your child usually have to wait between trying to get care and actually seeing a provider for an illness or injury?
- ☐ Same day    ☐ 8-14 days  
☐ 1 day    ☐ 15 days or longer  
☐ 2-3 days    ☐ My child didn't need to get care right away for an illness or injury in the last 12 months.  
☐ 4-7 days
26. In the last 12 months, did your child need an appointment for well-patient care, such as a physical exam or check-up?
- ☐ Yes    ☐ No    Go to Question 29
27. In the last 12 months, when your child needed an appointment for well-patient care, how often did your child get an appointment as soon as you wanted?
- ☐ Never    ☐ Usually    ☐ My child didn't need an appointment for well-patient care in the past 12 months.  
☐ Sometimes    ☐ Always
28. In the last 12 months, when your child needed an appointment for well-patient care, how long did your child have to wait between trying to get care and actually seeing a provider?
- ☐ Within 7 days    ☐ More than 28 days  
☐ 8-14 days    ☐ My child didn't need an appointment for well-patient care in the last 12 months.  
☐ 15-28 days
29. In the last 12 months, how many times did your child go to an emergency room?
- ☐ None    ☐ 1    ☐ 2-3    ☐ 4-6    ☐ More than 6
30. In the last 12 months (not counting times your child went to an emergency room), how many times did your child go to a doctor's office or clinic?
- ☐ None    Go to Question 43    ☐ 1    ☐ 2    ☐ 3    ☐ 4    ☐ 5-9    ☐ 10 or more

\*0DCRJJC63\*  
22430568

31. In the last 12 months, how much of a problem, if any, was it to get care for your child that you or a doctor believed necessary?

- ☐ A big problem    ☐ A small problem    ☐ Not a problem    ☐ My child had no visits in the last 12 months.

32. In the last 12 months, how much of a problem, if any, were delays in your child's healthcare while you waited for approval from your child's health plan?

- ☐ A big problem    ☐ A small problem    ☐ Not a problem    ☐ My child had no visits in the last 12 months.

33. In the last 12 months, how often did your child wait in the doctor's office or clinic more than 15 minutes past the appointment time to see the person your child went to see?

- ☐ Never    ☐ Usually    ☐ I don't know  
☐ Sometimes    ☐ Always    ☐ My child had no visits in the last 12 months.

34. In the last 12 months, how often did office staff at your child's doctor's office or clinic treat you and your child with courtesy and respect?

- ☐ Never    ☐ Usually    ☐ I don't know  
☐ Sometimes    ☐ Always    ☐ My child had no visits in the last 12 months.

35. In the last 12 months, how often were office staff at you child's doctor's office or clinic as helpful as you thought they should be?

- ☐ Never    ☐ Usually    ☐ I don't know  
☐ Sometimes    ☐ Always    ☐ My child had no visits in the last 12 months.

36. In the last 12 months, how often did your child's doctor or other health providers listen carefully to you?

- ☐ Never    ☐ Usually    ☐ I don't know  
☐ Sometimes    ☐ Always    ☐ My child had no visits in the last 12 months.

37. In the last 12 months, how often did your child's doctor or other health providers explain things in a way you could understand?

- ☐ Never    ☐ Usually    ☐ I don't know  
☐ Sometimes    ☐ Always    ☐ My child had no visits in the last 12 months.

38. In the last 12 months, how often did your child's doctor or other health providers show respect for what you had to say?

- ☐ Never    ☐ Usually    ☐ I don't know  
☐ Sometimes    ☐ Always    ☐ My child had no visits in the last 12 months.

39. Is your child old enough to talk with doctors about his or her healthcare?

- ☐ Yes    ☐ No Go to Question 41

40. In the last 12 months, how often did doctors or other health providers explain things in a way your child could understand?

- ☐ Never    ☐ Always  
☐ Sometimes    ☐ I don't know  
☐ Usually    ☐ My child had no visits in the last 12 months or my child is not old enough to talk with doctors.

41. In the last 12 months, how often did doctors or other health providers spend enough time with your child?

- ☐ Never      ☐ Usually      ☐ I don't know  
☐ Sometimes      ☐ Always      ☐ My child had no visits in the last 12 months.

42. We want to know your rating of all your child's healthcare in the last 12 months from all doctors and other health providers.

Use any number from 0 to 10 where 0 is the worst healthcare possible and 10 is the best healthcare possible. How would you rate your child's healthcare?

- ☐ 0 Worst health care possible  
☐ 1  
☐ 2  
☐ 3  
☐ 4  
☐ 5  
☐ 6  
☐ 7  
☐ 8  
☐ 9  
☐ 10 Best health care possible  
☐ My child had no visits last 12 months.

43. In the last 12 months, what type of facility did your child go to most often for healthcare? Select the facility your child used most often.

Please mark only one answer

- ☐ A military facility - This includes: Military clinic, Military hospital, PRIMUS clinic, NAVCARE clinic  
☐ A civilian facility - This includes: Civilian doctor's office, Civilian clinic, Hospital, Civilian TRICARE contractor  
☐ Uniformed Services Family Plan Facility (USFHP)  
☐ My child went to none of the listed types of facility in the last 12 months.

—————YOUR CHILD'S HEALTH PLAN—————

The next questions ask about your experience with your child's health plan. Your child's health plan is the one he or she used most in the last 12 months.

44. Claims are sent to a health plan for payment. You may send in your child's claims yourself, or doctors, hospitals, or others may do this for your child.

In the last 12 months, did you or anyone send in any claims for your child to your child's health plan?

- ☐ Yes      ☐ No Go to Question 48      ☐ I don't know Go to Question 48

45. In the last 12 months, how often did your child's health plan handle your child's claims in a reasonable time?

- ☐ Never      ☐ Usually      ☐ I don't know.  
☐ Sometimes      ☐ Always      ☐ No claims were sent to my child's health plan in the last 12 months.

46. In the last 12 months, how often did your child's health plan handle your child's claims correctly?

- ☐ Never      ☐ Usually      ☐ I don't know.  
☐ Sometimes      ☐ Always      ☐ No claims were sent to my child's health plan in the last 12 months.

\*0DCRJ52\*  
22430568

47. In the last 12 months, before your child went for care, how often did your child's health plan make it clear how much you would have to pay?
- ☐ Never      ☐ Usually      ☐ I don't know.  
☐ Sometimes      ☐ Always      ☐ No claims were sent to my child's health plan in the last 12 months.
48. In the last 12 months, did you look for any information in written materials from your child's health plan?
- ☐ Yes      ☐ No **Go to Question 50**
49. In the last 12 months, how much of a problem, if any, was it to find or understand information in the written materials?
- ☐ A big problem      ☐ Not a problem  
☐ A small problem      ☐ I didn't look for information from my child's health plan in the last 12 months.
50. In the last 12 months, did you call the health plan's customer service to get information or help for your child?
- ☐ Yes      ☐ No **Go to Question 52**
51. In the last 12 months, how much of a problem, if any, was it to get the help you needed when you called your child's health plan's customer service?
- ☐ A big problem      ☐ Not a problem  
☐ A small problem      ☐ I didn't call my child's health plan's customer service in the last 12 months.
52. In the last 12 months, have you called or written your child's health plan with a complaint or problem?
- ☐ Yes      ☐ No **Go to Question 55**
53. How long did it take for your child's health plan to resolve your complaint?
- ☐ Same day      ☐ 4 or more weeks  
☐ 1 week      ☐ I am still waiting for it to be settled. **Go to Question 55**  
☐ 2 weeks      ☐ I haven't called or written with a complaint in the last 12 months. **Go to Question 55**  
☐ 3 weeks
54. Was your complaint or problem settled to your satisfaction?
- ☐ Yes      ☐ I am still waiting for it to be settled.  
☐ No      ☐ I haven't called or written with a complaint in the last 12 months.
55. Paperwork means things like having your child's records changed, processing forms, or other paperwork related to getting care for your child.
- In the last 12 months, did you have any experiences with paperwork with your child's health plan?
- ☐ Yes      ☐ No **Go to Question 57**
56. In the last 12 months, how much of a problem, if any, did you have with paperwork for your child's health plan?
- ☐ A big problem  
☐ A small problem  
☐ Not a problem  
☐ I didn't have any experience with paperwork for my child's health plan in the last 12 months.

57. We want to know your rating of all your experience with your child's health plan.

Use any number from 0 to 10 where 0 is the worst health plan possible, and 10 is the best health plan possible. How would you rate your child's health plan now?

- ☐ 0 Worst health plan possible  
☐ 1  
☐ 2  
☐ 3  
☐ 4  
☐ 5  
☐ 6  
☐ 7  
☐ 8  
☐ 9  
☐ 10 Best health plan possible

*Please indicate the extent to which you agree or disagree with the following statements about TRICARE Prime:*

58. TRICARE Prime makes it hard to get the health care services my child needs.

- ☐ Strongly Agree   ☐ Agree   ☐ Neither Agree nor Disagree   ☐ Disagree   ☐ Strongly Disagree

59. TRICARE Prime makes it hard for my child to see the health care provider I prefer.

- ☐ Strongly Agree   ☐ Agree   ☐ Neither Agree nor Disagree   ☐ Disagree   ☐ Strongly Disagree

60. TRICARE Prime's health benefits do not meet my child's needs.

- ☐ Strongly Agree   ☐ Agree   ☐ Neither Agree nor Disagree   ☐ Disagree   ☐ Strongly Disagree

61. TRICARE Prime provides high quality health care.

- ☐ Strongly Agree   ☐ Agree   ☐ Neither Agree nor Disagree   ☐ Disagree   ☐ Strongly Disagree

-----YOUR CHILD'S HEALTH-----

62. In general, how would you rate your child's overall health now?

- ☐ Excellent   ☐ Very Good   ☐ Good   ☐ Fair   ☐ Poor

*A health condition could be physical, mental, or behavioral. Health conditions can affect a child's development, daily function, or need for services. Keep this in mind as you answer the following questions.*

63. Does your child currently need or use medicine prescribed by a doctor (other than vitamins)?

- ☐ Yes   ☐ No Go to Question 66

64. Is this because of a medical, behavioral, or other health condition?

- ☐ Yes   ☐ No Go to Question 66

\*0DCRJ30\*  
22430568

65. Is this because of a health condition that has lasted or is expected to last for at least 12 months?

☐ Yes ☐ No

66. Does your child need or use more medical, mental health, or educational services than is usual for most children the same age?

☐ Yes ☐ No Go to Question 69

67. Is this because of a medical, behavioral, or other health condition?

☐ Yes ☐ No Go to Question 69

68. Is this because of a health condition that has lasted or is expected to last for at least 12 months?

☐ Yes ☐ No

69. Is your child limited or prevented in any way in his or her ability to do the things most children of the same age can do?

☐ Yes ☐ No Go to Question 72

70. Is this because of a medical, behavioral, or other health condition?

☐ Yes ☐ No Go to Question 72

71. Is this because of a health condition that has lasted or is expected to last for at least 12 months?

☐ Yes ☐ No

72. Does your child need to get special therapy, such as physical, occupational, or speech therapy?

☐ Yes ☐ No Go to Question 75

73. Is this because of a medical, behavioral, or other health condition?

☐ Yes ☐ No Go to Question 75

74. Is this because of a health condition that has lasted or is expected to last for at least 12 months?

☐ Yes ☐ No

75. Does your child have any kind of emotional, developmental, or behavioral problem for which he or she needs or gets treatment or counseling?

☐ Yes ☐ No Go to Question 77

76. Is this because of a health condition that has lasted or is expected to last for at least 12 months?

☐ Yes ☐ No

77. When was the last time your child had a routine preventive care appointment, such as a physical examination or a well baby/child check-up?

- ☐ Less than 12 months ago      ☐ 5 or more years ago  
☐ 1 -2 years ago      ☐ Never had a physical examination or check-up.  
☐ More than 2 but less than 5 years ago

—————ABOUT YOUR CHILD AND YOU—————

*Information in this section will be used to study how different kinds of people view our healthcare system. This information will not be used to identify you.*

78. What is your child's age right now?

- ☐ Less than 1 year    ☐ 1-2 years    ☐ 3-5 years    ☐ 6-8 years    ☐ 9-12 years    ☐ 13-17 years

79. Is your child male or female?

- ☐ Male    ☐ Female

80. Is your child of Hispanic or Latino origin or descent?

- ☐ Hispanic or Latino    ☐ Not Hispanic or Latino

81. What is your child's race? PLEASE MARK ONE OR MORE.

- ☐ White    ☐ Native Hawaiian or other Pacific Islander  
☐ Black or African American    ☐ American Indian or Alaska Native  
☐ Asian

82. What is your age now?

- ☐ Under 18    ☐ 25 to 34    ☐ 45 to 54    ☐ 65 to 74  
☐ 18 to 24    ☐ 35 to 44    ☐ 55 to 64    ☐ 75 or older

83. Are you male or female?

- ☐ Male    ☐ Female

84. What is the highest grade or level of school that you have completed?

- ☐ 8th grade or less    ☐ Some college or 2-year degree  
☐ Some high school, but did not graduate    ☐ 4-year college graduate  
☐ High school graduate or GED    ☐ More than 4-year college degree

85. How are you related to the child?

- ☐ Mother or father    ☐ Aunt or uncle    ☐ Legal guardian  
☐ Grandparent    ☐ Older brother or sister    ☐ Other

THANK YOU

Please return the completed survey in the postage-paid envelope.

## **APPENDIX C**

### **CHILD CODING SCHEME AND CODING TABLES**

2002 HEALTH CARE SURVEY OF DOD BENEFICIARIES  
CHILD QUESTIONNAIRE  
CODING SCHEME AND CODING TABLES

BASIC SAS AND ASCII/EBCDIC MISSING DATA AND NOT APPLICABLE CODES

SAS	ASCII/EBCDIC	
Numeric	Numeric	Description
.	-9	No response
.A	-8	Multiple response error
.O	-7	Out of range error
.N	-6	Not Applicable or valid skip
.D	-5	Scalable response of “Don’t know” or “not sure”
.I	-4	Incomplete grid error
.C	-1	Question should not have been answered. It should have been skipped

Missing values ‘.’, multiple responses ‘.A’, and incomplete grids ‘.I’ are encoded prior to implementation of the Coding Scheme Notes (see below).

**Coding Table for Note 2:  
C02005, C02006 – C02008**

N2	C02005 is:	C02006 – C02008 are:	C02005 is coded as:	C02006 – C02008 are coded as:	*
1	1: yes	At least one is “marked” or “all are blank”	Stands as original Value	Stand as original Value	
2	1: yes, missing, or multiple response	“Blank or NA”	2: No	.N, valid skip if missing; .C, question should be skipped if marked	B
3	2: no, missing, or multiple response	At least one is “marked”	1: yes	Stand as original value	B
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if –6	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 2:

All responses to questions C02005 through C02008 are missing.

Definition of “blank or NA” in Coding Table for Note 2:

Responses to C02006 through C02008 are either all not applicable (-6) or a combination of missing and not applicable (-6).

Definition of “marked” in Coding Table for Note 2:

Any pattern of marks outside the definitions “all are blank,” and “blank or NA.”

**Coding Table for Note 3:  
C02009 – C02012**

N3	C02009 is:	C02010 – C02012 are :	C02009 is coded as:	C02010 – C02012 Are:	*
1	1: yes	“All are blank”	Stands as original value	Stand as original value	
2	1: yes, missing, or multiple response	At least one is “marked”	1: yes	Stand as original value	B
3	1: yes, missing, or multiple response	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
4	2: no, -5: I don’t know, or -6: not enrolled in Tricare Prime	“All are blank”	Stands as original value	.N, valid skip	F
5	2: no, -5: I don’t know, or -6: not enrolled in Tricare Prime	At least one is “marked”	1: yes	Stand as original value	B
6	2: no, -5: I don’t know, -6: not enrolled in Tricare Prime	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
7	Multiple response	“All are blank”	-5: I don’t know	.N, valid skip if missing; .C, question should be skipped if marked	B F
8	Missing response	“All are blank”	Stands as original value	Stand as original value	

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 3:  
All responses to questions C02010 through C02012 are missing.

Definition of “blank or NA” in Coding Table for Note 3:  
Responses to questions C02010 and C02012 are missing, the response to question C02011 is –6, “My child doesn’t have a TRICARE primary care manager.”

Definition of “marked” in Coding Table for Note 3:  
Any pattern of marks outside of “all are blank” and “blank or NA.”

**Coding Table for Note 4:  
C02013 – C02017**

N4	C02013 is:	C02014 -C02017 are:	C02013 is coded as:	C02014-C02017 are coded as:	*
1	1: yes	“At least one is “marked” or “all are blank,”	Stands as original value	Stand as original value	
2	1: yes, missing, or multiple response	“Blank or no usage or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, missing, or multiple response	At least one is “marked”	1: yes	Stand as original value	F
4	2: no	“Blank or no usage or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2: no	.N, valid skip	B F

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 4:

All responses to questions C02014 through C02017 are missing.

Definition of “Blank or no usage or NA” in Coding Table for Note 4:

All of the following are true: C02015 is either ‘2’ or missing, C02014, C02016, C02017 are either not applicable or missing.

Definition of “marked” in Coding Table for Note 4:

Any pattern of marks outside of “all are blank,” and “Blank or NA.”

**Coding Table for Note 5:  
C02018, C02019**

N5	C02018 is:	C02019 is :	C02018 is coded as:	C02019 is coded as:	*
1	1: yes	1-4: how often, missing, or multiple response	Stands as original value	Stands as original value	
2	1: yes, missing, or multiple response	-6: no calls	2: no	.C, question should be skipped	B F
3	2: no, missing or multiple response	1-4: how often or multiple response	1: yes	Stands as original value	B
4	2: no	-6: no calls, or missing response	Stands as original value	.N, valid skip	F
5	Missing response	Missing response	Stands as original value	Stands as original value	
6	Multiple response	Missing response	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 6:  
C02020 – C02022**

N6	C02020 is:	C02021 & C02022 are:	C02020 is coded as:	C02021 & C02022 are coded as:	*
1	1: yes	“All are blank” or at least one is “marked”	Stands as original value	Stand as original value	
2	1: yes, missing, or multiple response	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, missing or multiple response	At least one is “marked”	1: yes	Stand as original value	B
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 6:  
Responses to question C02021 and C02022 are both missing.

Definition of “blank or NA” in Coding Table for Note 6:  
Responses to questions C02021 and C02022 are either both not applicable (–6), or a combination of not applicable (–6) and missing.

Definition of “marked” in Coding Table for Note 6:  
Any pattern of marks outside “all are blank” or “blank or NA.”

**Coding Table for Note 7:  
C02023 – C02025**

N7	C02023 is:	C02024 & C02025 are:	C02023 is coded as:	C02024 & C02025 are coded as:	*
1	1: yes	“All are blank” or at least one is “marked”	Stands as original value	Stand as original value	
2	1: yes, missing, or multiple response	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, missing or multiple response	At least one is “marked”	1: yes	Stand as original value	B
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 7:  
Responses to question C02024 and C02025 are both missing.

Definition of “blank or NA” in Coding Table for Note 7:  
Responses to questions C02024 and C02025 are either both not applicable (–6), or a combination of not applicable (–6) and missing.

Definition of “marked” in Coding Table for Note 7:  
Any pattern of marks outside “all are blank” or “blank or NA.”

**Coding Table for Note 8:  
C02026 – C02028**

N8	C02026 is:	C02027 & C02028 are:	C02026 is coded as:	C02027 & C02028 are coded as:	*
1	1: yes	“All are blank” or at least one is “marked”	Stands as original value	Stand as original value	
2	1: yes, missing, or multiple response	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, missing or multiple response	At least one is “marked”	1: yes	Stand as original value	B
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 8:  
Responses to question C02027 and C02028 are both missing.

Definition of “blank or NA” in Coding Table for Note 8:  
Responses to questions C02027 and C02028 are either both not applicable (–6), or a combination of not applicable (–6) and missing.

Definition of “marked” in Coding Table for Note 8:  
Any pattern of marks outside “all are blank” or “blank or NA.”

**Coding Table for Note 9:  
C02030, C02031 -- C02042**

N9	C02030 is:	C02031 – C02042 are:	C02030 is coded as:	C02031 -- C02042 are coded as:	*
1	1: none	“Blank or No Usage or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
2	1, missing or multiple response	At least one is “marked”	Stands as original value	Stands as original value	
3	>=2	At least one is “marked” or “all are blank”	Stands as original value	Stand as original value	
4	>=2, missing, or multiple response	“Blank or No Usage or NA”	1: none	.N, valid skip if missing; .C, question should be skipped if marked	B F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	1: none	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 9:

All responses to questions C02031 through C02042 are missing.

Definition of “blank or no usage or NA” in Coding Table for Note 9:

All of the following are true: C02031 – C02038, C02040 – C02042 are either not applicable (-6), or a combination of not applicable (-6) and missing, and C02039 is any value or missing.

Definition of “marked” in Coding Table for Note 9:

Any pattern of marks outside the definitions “all are blank” and “blank or no usage or NA.”

**Coding Table for Note 10:  
C02039, C02040**

N10	C02039 is:	C02040 is:	C02039 is coded as:	C02040 is coded as:	*
1	.N, valid skip or .C, question should not have been answered	.N, valid skip or .C, question should not have been answered	Stands as original value	Stands as original value	
2	1: yes	Missing	Stands as original value	Stands as original value	
3	1: yes	-6: not applicable	.C, question should be skipped	.C, question should be skipped	B F
4	1: yes, missing, or multiple response	Any mark but –6: not applicable	1: yes	Stands as original value	B
5	Missing or multiple response	-6: not applicable	2: no	.C, question should be skipped	B F
6	2: no	Any mark but –6: not applicable	1: yes	Stands as original value	B
7	2: no	Missing or –6: not applicable	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
8	Missing	Missing	Stands as original value	Stands as original value	
9	Multiple response	Missing	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 11:  
C02044, C02045 -- C02047**

N11	C02044 Is:	C02045 -- C02047 are:	C02044 is coded as:	C02045 – C02047 are coded as:	*
1	1: yes	At least one is “marked” or “all are blank”	Stands as original value	Stand as original value	
2	1: yes, -6: don’t know, missing, or multiple response	“All are NA” or “Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, -6: don’t know, missing, or multiple response	At least one is “marked”	1: yes	Stand as original value	B
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	2: no	“All are NA”	Stands as original value	.C, question should be skipped	F
6	Missing response	“All are blank”	Stands as original value	Stands as original value	
7	Multiple response	“All are blank”	2: no	.N, valid skip	B F
8	-6: Don’t know	“All are blank”	Stands as original value	.N, valid skip	F

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 11:

All responses to questions C02045 through C02047 are missing.

Definition of “all are NA” in Coding Table for Note 11:

All responses to questions C02045 through C02047 are “No claims were sent to the health plan in the past 12 months”, i.e. not applicable (-6).

Definition of “blank or NA” in Coding Table for Note 11:

Responses to C02045 through C02047 are either all not applicable (-6) or a combination of missing and not applicable (-6).

Definition of “marked” in Coding Table for Note 11:

Any pattern of marks outside the definitions “all are blank”, “all are NA”, and “blank or NA”

**Coding Table for Note 12:  
C02048, C02049**

N12	C02048 is:	C02049 is:	C02048 is coded as:	C02049 is coded as:	*
1	1: yes	1-3: categorize problem, missing, or multiple response	Stands as original value	Stands as original value	
2	1: yes, missing, or multiple response	-6: not applicable	2: no	.C, question should be skipped	B F
3	2: no, missing, or multiple response	1-3: categorize problem, or multiple response	1: yes	Stands as original value	B
4	2: no	-6: not applicable or missing response	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	
6	Multiple response	Missing response	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F)

**Coding Table for Note 13:  
C02050, C02051**

N13	C02050 is:	C02051 is :	C02050 is coded as:	C02051 is coded as:	*
1	1: yes	1-3: categorize problem, missing, or multiple response	Stands as original value	Stands as original value	
2	1: yes, missing, or multiple response	-6: not applicable	2: no	.C, question should be skipped	B F
3	2: no, missing, or multiple response	1-3: categorize problem, or multiple response	1: yes	Stands as original value	B
4	2: no	-6: not applicable or missing response	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	
6	Multiple response	Missing response	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 14:  
C02052 – C02054**

N14	C02052 is:	C02053 & C02054 are:	C02052 is coded as:	C02053 & C02054 are coded as:	*
1	1: yes	“All are blank” or at least one is “marked”	Stands as original value	Stand as original value	
2	1: yes, missing, or multiple response	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, missing or multiple response	At least one is “marked”	1: yes	Stand as original value	B
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 14:  
Responses to question C02053 and C02054 are both missing.

Definition of “blank or NA” in Coding Table for Note 14:  
Responses to questions C02053 and C02054 are either both not applicable (–6), or a combination of not applicable (–6) and missing.

Definition of “marked” in Coding Table for Note 14:  
Any pattern of marks outside “all are blank” or “blank or NA.”

**Coding Table for Note 15:  
C02055, C02056**

N15	C02055 is:	C02056 is :	C02055 is coded as:	C02056 is coded as:	*
1	1: yes	1-3: categorize problem, missing, or multiple response	Stands as original value	Stands as original value	
2	1: yes, missing, or multiple response	-6: not applicable	2: no	.C, question should be skipped	B F
3	2: no, missing, or multiple response	1-3: categorize problem, or multiple response	1: yes	Stands as original value	B
4	2: no	-6: not applicable or missing response	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	
6	Multiple response	Missing response	2: no	.N, valid skip	B

\* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 16:  
C02063, C02064 & C02065**

N16	C02063 is:	C02064 & C02065 Are:	C02063 is coded as:	C02064 & C02065 are coded as:	*
1	1: yes	"All are blank"	Stands as original value	Stand as original value	
2	1: yes, missing or multiple response	At least one is "marked" or "blank or no"	1:yes	Stand as original value	B
3	2: no	At least one is "marked"	1: yes	Stand as original value	F
4	2: no	"All are blank" or "blank or no"	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	"All are blank"	Stands as original value	Stand as original value	
6	Multiple response	"All are blank"	2:no	.N, valid skip if missing .C, question should be skipped if marked	B F

\* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 16:  
Responses to question C02064 and C02065 are both missing.

Definition of "blank or no" in Coding Table for Note 16:  
Responses to questions C02064 and C02065 are either both no (2), or a combination of no (2) and missing.

Definition of "marked" in Coding Table for Note 16:  
Any pattern of marks outside "all are blank" or "blank or NA."

**Coding Table for Note 17:  
C02066, C02067 & C02068**

N17	C02066 is:	C02067 & C02068 are:	C02066 is coded as:	C02067 & C02068 are coded as:	*
1	1: yes	"All are blank"	Stands as original value	Stand as original value	
2	1: yes, missing or multiple response	At least one is "marked" or "blank or no"	1:yes	Stand as original value	B
3	2: no	At least one is "marked"	1: yes	Stand as original value	F
4	2: no	"All are blank" or "blank or no"	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	"All are blank"	Stands as original value	Stand as original value	
6	Multiple response	"All are blank"	2:no	.N, valid skip if missing .C, question should be skipped if marked	B F

\* Indication of backward coding (B) or forward coding (F).

Definition of "all are blank" in Coding Table for Note 17:  
Responses to question C02067 and C02068 are both missing.

Definition of "blank or no" in Coding Table for Note 17:  
Responses to questions C02067 and C02068 are either both no (2), or a combination of no (2) and missing.

Definition of "marked" in Coding Table for Note 17:  
Any pattern of marks outside "all are blank" or "blank or NA."

**Coding Table for Note 18:  
C02069, C02070 & C02071**

N18	C02069 is:	C02070 & C02071 are :	C02069 is coded as:	C02070 & C02071 are coded as:	*
1	1: yes	“All are blank”	Stands as original value	Stand as original value	
2	1: yes, missing or multiple response	At least one is “marked” or “blank or no”	1:yes	Stand as original value	B
3	2: no	At least one is “marked”	1: yes	Stand as original value	F
4	2: no	“All are blank” or “blank or no”	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2:no	.N, valid skip if missing .C, question should be skipped if marked	B F

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 18:  
Responses to question C02070 and C02071 are both missing.

Definition of “blank or no” in Coding Table for Note 18:  
Responses to questions C02070 and C02071 are either both no (2), or a combination of no (2) and missing.

Definition of “marked” in Coding Table for Note 18:  
Any pattern of marks outside “all are blank” or “blank or NA.”

**Coding Table for Note 19:  
C02072, C02073 & C02074**

N19	C02072 is:	C02073 & C02074 are :	C02072 is coded as:	C02073 & C02074 are coded as:	*
1	1: yes	“All are blank” or “blank or no”	Stands as original value	Stand as original value	
2	1: yes, missing or multiple response	At least one is “marked” or “blank or no”	1:yes	Stand as original value	B
3	2: no	At least one is “marked”	1: yes	Stand as original value	F
4	2: no	“All are blank” or “blank or no”	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	“All are blank”	Stands as original value	Stand as original value	
6	Multiple response	“All are blank”	2:no	.N, valid skip if missing	B F

\* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 19:  
Responses to question C02073 and C02074 are both missing.

Definition of “blank or no” in Coding Table for Note 19:  
Responses to questions C02073 and C02074 are either both no (2), or a combination of no (2) and missing.

Definition of “marked” in Coding Table for Note 19:  
Any pattern of marks outside “all are blank” or “blank or NA.”

**Coding Table for Note 20:  
C02075, C02076**

N20	C02075 is:	C02076 is :	C02075 is coded as:	C02076 is coded as:	*
1	1: yes	Marked , missing, or multiple response	Stands as original value	Stands as original value	F
2	2: no	Missing response	Stands as original value	.N, valid skip	
3	2: no, missing or multiple response	1: yes, 2: no, or multiple response	1: yes	Stands as original value	B
4	Missing	Missing	Stands as original value	Stands as original value	
5	Multiple response	Missing	2: no	.N, valid skip	B

\*Indication of backward coding (B) or forward coding (F).

## **APPENDIX D**

### **SAS PROC CONTENTS—ALPHABETICAL CHILD 2002**

## The CONTENTS Procedure

Data Set Name:	IN.HCS02C_1	Observations:	11296
